

Fast Cleaner

Cleaning and degreasing agent for sensitive areas | NSF registration

The Fast Cleaner has an NSF registration for the food sector and can therefore be used as a cleaning and degreasing agent for the removal of contamination generated during maintenance work and for the removal of adhesive residues in the food and beverage industry as well as in the pharmaceuticals and chemical industries. Fast Cleaner is used to clean and degrease surfaces which are bonded or sealed with WEICON adhesives and sealants, or which are going to be coated with WEICON Metal Sprays. Fast Cleaner is pH-neutral and material-compatible and can be used on many different materials such as metals, glass, ceramics and most rubbers and plastics. Due to its special formula and the resulting NSF registration, the Fast Cleaner can contribute towards improvements in occupational safety and health protection.
