# **Release Agents**

# **Alu Grinding Protection**

### Effective with all abrasives | silicone-free

WEICON Alu Grinding Protection works like a cooling lubricant and separating agent during the grinding process. It lowers the temperature at the contact point and forms a silicone-free anti-adhesive layer on the abrasive material. The use of Alu Grinding Protection prevents clogging and the pores of the grinding material remain open. Alu Grinding Protection greatly increases the tool life of an abrasive disc and the grinding performance can be increased by up to 350%. WEICON Alu Grinding Protection can be used on all abrasive materials, on foundations such as fiber wheels, sheeting, endless grinding belts, sleeves, orbital sanders, and special machines.

### Technical data

Odour	solvent
Colour	transparent
Silicone-free	yes
Temperature resistance	-20°C to +130°C
Shelf life	24 mon.

#### **Processing**

Spray the part to be cleaned generously and allow product to take effect; wipe with a clean cloth, if required. Repeat, if necessary. Protect plastic and varnished surfaces.

#### Storage

Pressurized container. Protect from direct sunlight and temperatures above +50°C.

## Instructions for use

When using WEICON products, the physical, safety-related, toxicological and ecological data and regulations in our EC safety data sheets (www.weicon.com) must be observed.

#### **Available sizes**

10018628 Alu Grinding Protection, 400 ml, transparent Alu Grinding Protection, 400 ml, transparent 10059941

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation. We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the requested properties are recommended. A claim cannot be derived from them.
