

Electro Contact Cleaner

Cleans and degreases electrical or mechanical components

WEICON Electro Contact Cleaner is a special cleaner for the fast and effective cleaning and degreasing of all kinds of soiled or corroded contacts. It was specially developed for the cleaning of electronic and mechanical components. The special formula with high-purity solvents removes oxide/sulphide layers, combustion residues and resinous or sooty soiling. WEICON Electro Contact Cleaner reduces voltage loss and increases electric conductivity. Contamination that can cause surface leakage current is removed. WEICON Electro Contact Cleaner can be used on electrotechnical or mechanical components, such as electrical machines, measuring instruments, tools, balances, switches and sensors or electrical connections, contacts, relays and switchboards.
