

# Silicone A

## Acetox curing | fungicidal

WEICON Silicone A is solvent-free, acetox-curing, strong, permanently elastic, resistant to ageing and chemicals, temperature-resistant up to +180 °C (+356 °F), extremely elastic (breaking elongation >700%) and can be used universally. Silicone A adheres very well to steel, aluminium, glass, ceramics, and many other materials.

Silicone A can be used in machine and system construction, ventilation and air conditioning systems, in the energy and electrical industry, in exhibition construction and shopfitting and in many other industrial applications.

## Approvals / Guidelines

ISSA Code	75.628.28
IMPA Code	815207

## Surface Pre-Treatment

Surfaces must be clean and free of grease. Many surface soilings, such as oil, grease, dust and dirt can be removed with WEICON Surface Cleaner. For heavily soiled metal surfaces, we recommend Cleaner Spray S; for removing old colour residues or adhesive residues, WEICON Sealant and Adhesive Remover is ideal. Most materials can be bonded to and among each other. For certain materials or special requirements, we recommend the use of a bonding agent (primer). Mechanical surface pre-treatment e.g. by grinding or sanding can also improve the adhesion considerably.

## Processing

Processing Cartridge gun for 310 ml cartridges, compressed air gun, we recommend a version with piston rod (WEICON Compressed Air Cartridge Gun), automatic dosing systems. Processing tube (only transparent) Squeeze out by hand Close tube again immediately after use, opened tubes should be used up as quickly as possible. Joining the components In order to guarantee an ideal wetting, the bonding parts need to be joined, before the adhesive skins over (skin-over time).

## Storage

Store in the unopened original container at room temperature. Avoid sources of heat and direct sunlight.
