

Elastic adhesives and sealants

# **Polyurethanes**

# Flex 310 Polyurethane

## Adhesive and sealant based on PU | strong | permanently elastic | ISEGA-certified

WEICON Flex 310 PU is permanently elastic, strong, paintable, and resistant to weather, ageing, fresh and sea water and free of silicone. This versatile adhesive and sealant based on Polyurethane (PUR) can be used for the bonding and sealing of numerous materials such as metals, plastics, ceramics, wood, glass and stone. It can be used in tank and apparatus engineering, carriage, container and vehicle construction, in ventilation and air conditioning systems, the energy and electrical industry, and in all applications where silicones or products containing silicones are not suitable.

### **Technical Data**

Base		1-C. polyurethane
Cure type		moisture-curing
Stability/run-off	ASTM D 2202	1.0 mm
Density		1,17 g/cm <sup>3</sup>
Curing condition		from +5°C to +35°C and 40% to 70% rel. air air humidity
Processing temperature		+5°C to +40°C
Curing speed	in the first 24 h	2 -3 mm
Skin-over time		45 min.
Gap bridging up to max.		5 mm
Max. sealing joint width		25 mm
Tensile strength	ISO 37 / S3A	2 MPa
Tensile strength of the pure adhesive and sealant	ISO 37	2 MPa
Elongation at break (tensile)	DIN 53504/ASTM D412	450 %
Medium lap shear strength (DIN EN 1465/ASTM D 1002)		1,6 MPa
Tear resistance	DIN 53515 / ASTM D 1002	9 kN/m
Volume change	DIN 52451	-6 %
Hardness (Shore A)	DIN ISO 7619	45±5
Temperature resistance		-40 °C to briefly +90 °C (approx. 2 h) +120 °C
Tg after curing at room temperature		~ -45 °C
Building material class	DIN 4102	B 2
Shelf life		12 mon.
Approvals / Guidelines		
ISSA Code		75.509.34
IMPA Code		812943

#### Surface pre-treatment

Surfaces must be clean and free of grease. Many surface soilings, such as oil, grease, dust and dirt can be removed with WEICON

Surface Cleaner. For heavily soiled metal surfaces, we recommend Cleaner Spray S; for removing old colour residues or adhesive

residues, WEICON Sealant and Adhesive Remover is ideal. Most materials can be bonded to and among each other. For certain materials or special requirements, we recommend the use of a

bonding agent (primer). Mechanical surface pre-treatment e.g. by grinding or sanding can also improve the adhesion considerably.

### **Processing**

Application methods Cartridge gun for 310 ml cartridges, compressed air gun, we recommend a version with piston rod (WEICON Compressed Air Cartridge Gun), automatic dosing systems. Joining the components In order to guarantee and ideal wetting, the bonding parts need to be joined, before the adhesive skins over (skin-over time).

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation. We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the requested properties are recommended. A claim cannot be derived from them.

Elastic adhesives and sealants

# Flex 310 Polyurethane

### **Storage**

When unopened and stored in normal climate (+23°C and 50 % rel. air humidity), WEICON Elastic Adhesives and Sealants have a shelf life of 12 months.

#### Instructions for use

When using WEICON products, the physical, safety-related, toxicological and ecological data and regulations in our EC safety data sheets (www.weicon.com) must be observed.

### Accessories

10025241	V-Joint Nozzle, 1 PCE
10033114	Compressed Air Cartridge Gun, 1 PCE
10020751	Cartridge Gun Special, 1 PCE
10000441	Cartridge Gun, 1 PCE

### Available sizes

10004287	Flex 310 Polyurethane, 300 ml, white
10002571	Flex 310 Polyurethane, 300 ml, black
10002573	Flex 310 Polyurethane, 300 ml, grey

#### Conversion table

$(^{\circ}C \times 1.8) + 32 = ^{\circ}F$	Nm x 8.851 = lb·in
mm/25.4 = inch	$Nm \times 0.738 = Ib \cdot ft$
$\mu$ m/25.4 = mil	Nm x 141.62 = oz·in
$N \times 0.225 = Ib$	mPa⋅s = cP
$N/mm^2 x 145 = psi$	$N/cm \times 0.571 = Ib/in$
MPa x 145 = psi	$kV/mm \times 25.4 = V/mil$

Note
The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation. We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.
