

Repair-Tape

Flexible, durable and self-fusing repair tape for applications in indoor or outdoor areas.

Flexible, durable and self-fusing repair tape made of glass-fibre reinforced plastic for quick emergency repairs in indoor or outdoor areas.

The tape is soaked with a special resin and is activated by contact with water.

It can be applied very easily and fast and shows very high adhesive strength on almost all surfaces. After just 30 minutes, the tape is fully cured and hard-wearing. After curing, the tape can be sanded and painted over. It has high chemical and temperature resistance – from 50 °C / (-58 °F) to +150 °C (302 °F) for short periods. The tape can be applied without additional tools and is used for reliable and durable repairs in industrial applications, skilled trades, around the house, and in the camping and DIY sector.

Instructions for use

When using WEICON products, the physical, safety-related, toxicological and ecological data and regulations in our EC safety data sheets (www.weicon.com) must be observed.

Storage

Store in unopened original container at constant room temperature in a dry place. Avoid sources of heat and both direct and indirect sunlight. Once opened, the shelf life is reduced.

Characteristics

Base	polyurethane
Material thickness before curing	0,594 mm
Material thickness after curing	1,147 mm
Minimum shelf life at room temperature	24 mon.

Processing

Processing temperature	+10 °C to +35 °C
Cure temperature	+6 °C to +40 °C

Curing

Pot life at 20 °C	3 - 5 min.
Handling strength (35 % strength)	7 min.
Final strength (100 % strength)	30 min.

Mechanical properties after curing

Tensile strength	35 MPa
Compressive strength	30 bar
Hardness (Shore D) ASTM D 1706	70

Thermal parameters

Temperature resistance	-50 °C bis +120 °C (briefly +150 °C)
