

# Green Line®

Stripping Tools made from up to 97% renewable materials

## What is Green Line?

**97%**  
made from renewable resources

Together with a group of experts, we have developed the **WEICON TOOLS Green Line®**. A tool range made of up to 97 % renewable raw materials and has an excellent life cycle assessment.

## Proven quality

What can we do to enable a more sustainable future? That is a question not only many people ask themselves in regards to their own homes, but also more and more companies. We at WEICON have also been tackling this issue for many years.

That is why we have developed the **WEICON TOOLS Green Line®**. In terms of quality, they are in no way inferior to our classic line and are just as robust and durable.

### The material used:

- ▶ is based on plant oils, natural waxes, fibres and minerals
- ▶ is largely produced without the use of the finite resource crude oil
- ▶ has polyamide-like characteristics
- ▶ is produced with renewable energy

Wire Stripper  
**No. 5** Space-saving thanks to locking mechanism  
Precise working due to adjustable length stop (5-12 mm)  
Art.-No. 10061997

Cable Strippers | Wire Strippers | Multifunctional Stripping Tools

**WEICON TOOLS®**  
No.1 in Form & Funktion

Since 1967, WEICON GmbH & Co. KG has been developing, producing and distributing an extensive range of stripping tools. This range includes cable strippers, wire strippers and multi-purpose strippers. The WEICON TOOLS were developed for precise, fast and safe stripping of all common cable types. They carry the GS quality seal by the TUV Nord and were developed considering occupational safety aspects.

The tools are tailored specifically to the needs of professional users, and are also suitable for crafts and industrial applications as well as for domestic use.

## Production with energy generated in-house

Our tools are produced almost entirely with energy generated in-house – thanks to photovoltaic systems.

## Green electricity

At our headquarters in Germany, we now rely on 100 % green electricity.

## Resource-saving production chain

Faulty tools as well as the sprue produced during injection moulding are remelted at the beginning of the production chain.

## Repairing instead of replacing

Our WEICON TOOLS are part of the WEICON company – a producer of special chemical products for industrial use. Chemicals and sustainability are incompatible? Not necessarily. With the help of our products, many things can be repaired instead of thrown out and replaced.

## Cardboard instead of plastic

Our WEICON TOOLS come in a recyclable cardboard packaging.

Wire Stripper  
**Precision Wire Stripper S**

Fast, easy and precise stripping of thin wires and conductors
