

# Stripping Tools

## LWL Fibre Tube No. 2

WEICON Stripping Tools enable the fast and safe stripping of all common round cables. The product range of stripping tools includes different types, which provide easy handling and accurate results.

The stripping tool Fibre Optic Tube No. 2 has been specially designed for quick access to the optical fibres in loose tubes in buffer tubes from 1.2 mm to 4 mm diameter. It is suitable for a wall thickness of 0.15 mm to 0.6 mm. With the knife in the module and a special insertion point, the buffer tube can be conveniently put through the handy tool. This gives the user fast and process-safe access to the optical fibre in no time at all. The knife in the stripping tool easily cuts the buffer tube (e.g. made of PE) and the user can simply bend the tube without damaging the sensitive glass fibre. If necessary, the insertion point and the knife in the half-shells can be replaced or renewed as modules.

### Technical Data

Cable type	precisely cuts the PE tubes on fibre optic cables
Application area	special buffer tubes on fibre optic cables with a diameter of 1.2 mm - 4 mm. Works with core sleeves, e.g. made of PE, with wall thicknesses of 0.15 mm - 0.6 mm
Additional use	modular pair of blades for fibre optic tubes
Material	fibreglass-reinforced polyamide
Inner blade	replaceable
Accessories	Modul inserts with fixed blades, changeable, art. no. 52101001
Weight	36 g
Length	110 mm
Article number	52003002

Attention:  
Tool not to be used on live cables or conductors.
