

WSD 400 Pressurized-Air Spray Can

Aluminium can | versatile use

WSD 400 refillable spray can suitable for processing most WEICON Technical Liquids. Filling with compressed air is done by means of an adapter (accessory) via the compressed air network (optimum operating pressure 7.5 bar). The range of accessories for the WSD 400 includes an adapter for filling on any compressed air system as well as a spray set with four different spray heads and a ball valve with suction pipe.

Technical Data

Filling quantity	400 ml
Container volume	600 ml
Operating pressure	5 - 10 bar
Deformation pressure	26 bar
Bursting pressure	42 bar

Characteristics

Minimum shelf life	at room temperature	∞ mon.
--------------------	---------------------	--------

Approvals / Guidelines

MIL-Spec	complies with	MIL-T-83523
----------	---------------	-------------

Dosing and Processing Tools

Application

Before refilling with active ingredient, allow residual air to escape; then unscrew the nut and pull out the spray valve. Hold the can vertically and fill to max. 2/3 (approx. 400 ml). Insert the spray valve and tighten the nut by hand. Fill with compressed air (min. 5 - max. 10 bar). If different fillers are used, clean the container. After filling, only tighten the nut by hand! In case of frequent use, check the seal in the cap. WSD 400 is approved for the use of various WEICON products (see brochure WEICON Technical Liquids). Do not fill with liquids that are alkaline or degrade plastics. Do not use corrosive or toxic gases, vapours or liquids.

Instructions for use

When using WEICON products, the physical, safety-related, toxicological and ecological data and regulations in our EC safety data sheets (www.weicon.com) must be observed.

Accessories

10009303	Spray Set for WSD 400, 1 PCE
10000393	Adapter for WSD 400, 1 PCE
