

## Dismantling Tool No. 25

WEICON Stripping Tools enable the precise, fast and safe stripping of all common round cables. The product family of cable strippers includes different types featuring different additional functions and thus meeting the individual application requirements of their users.

The Dismantling Tool No. 25 is designed for stripping cables up to a sheath thickness of 5 mm. The knife can be used for both longitudinal and circular cutting. Circular cutting can be carried out on cables with an outer diameter of 25 mm or more. Cutting of the outer insulation is done by small lever movements and simultaneous pressing of the serration against the insulation. The tool consists of an impact-resistant polyamide body with an inserted, double-edged blade and a gear wheel connected to it. It safely enables longitudinal and circular cuts to be made on the cable outer sheath, irrespective of whether the work is carried out on the cable end or on intermediate pieces. The cutting depth can be adjusted in steps from 0 to 5 mm by simply turning the adjusting head (via detents of 0.1 mm). The shape of the blade allows stripping of the outer sheath, including any aluminium shields, up to a sheath thickness of 5 mm without damaging the underlying layers. The operation can be carried out without problems even at very low temperatures (-10°C). The blade of the tool has a hardness of min. 48 HRC and is easily replaceable.

### Technical Data

Cable type	cables with an outer sheath of up to 5 mm
Application area	Longitudinal and circular cutting possible from $\varnothing$ 25 mm
Material	impact-resistant polyamide, steel, brass
Hardness grade blade	48 HRC
Inner blade	adjustment in 0.1 mm steps, easy to replace
Additional value	Including handy storage box
Approval / certificate	EN 10020
Accessories	Spare blade, art. no. 52953020
Weight	163 g
Length	210 mm
Article number	MA52000025

Attention:  
Tool not to be used on live cables or conductors.
