

Multi-Opener

The Multi-Opener can be used for the gentle opening of sensitive equipment and dismounting of clipped housings. The opener is produced entirely in Germany and is made of glass fibre-reinforced polyamide and a dissipative ESD material that protects against electrostatic discharges.

The tool is used to open housing parts without scratching the sensitive surfaces. Other applications include the removal of components from electronic devices, the levering off of flat connectors or the gentle opening of clipped components. In addition, the Multi-Opener can be used, for example, to open plinth panels easily and without lever marks and to easily scrape off adhesive residues with the recessed stainless steel blade.

Technical Data

Application area	Gentle opening of sensitive components in the electronics sector
Material	fibreglass-reinforced polyamide
Additional value	made of conductive ESD material, bleeder resistor approx. 10 ⁹ ohm blade for scraping off adhesive residues
Weight	22 g
Length	180 mm
Article number	MA52800000

Attention:
Tool not to be used on live cables or conductors.
