## Dear customers and partners,

Thank you for your interest in WEICON products and solutions.

In our catalogue we present more than 500 specialised products – adhesives, sealants, technical sprays, high-performance assembly pastes, greases and stripping tools. Our products can be used in all areas of industry and trade and in a great variety of applications and processes.

### Spotlight on new products

In the 2026 catalogue, we present the Green Tube\*, our new packaging for flexible adhesives and sealants, which is significantly more sustainable than previous plastic packaging. We introduce our new solutions in the area of technical sprays and, in the TOOLS section, a set that we have put together specifically for the photovoltaic sector.

### WEICON Plastic Metal

We have decades of experience in developing high-performance epoxy resin systems for a wide range of international industrial sectors. These systems are suitable for numerous applications such as adhesive bonds, potting, coating or permanent repairs on various materials.

### Customised solutions

In addition to these established solutions, we develop customised systems designed to perform where standard products reach their limits. From extreme temperatures and special loads to specific processing requirements – we create customised epoxy resin solutions to meet almost any challenge. Where other materials reach their limits, WEICON provides innovative products that deliver the right solution for your specific application. WEICON Epoxy Solutions reliably protects your equipment and systems from wear, failures or chemical damage!

As you can see, WEICON is always moving forward, but one thing is certain:

We at WEICON believe in long-term connections!

# WEICON Middle East

On March 1st, 2005, our first branch office, WEICON Middle East LLC, was founded in Dubai in the United Arab Emirates.

Meanwhile, more than 750 customers are supplied and supported by the WEICON Middle East team. Adhesive specialists, trained at the Fraunhofer Institute in Bremen (Germany), flexibility and extremely short delivery times are just a few of the many strengths of our team in the United Arab Emirates. Even at summer temperatures of up to +45°C, over 1,000,000 different WEICON products have been sold and shipped to our customers in the region.

The following countries are currently supported by the WEICON team in Dubai: United Arab Emirates, Saudi Arabia, Bahrain, Kuwait, Oman, India, and eleven countries in East Africa. The branch office has an area of approx. 1,100 sqm. Up to 150 pallets with WEICON products can be stored in Dubai. This enables us to guarantee that our customers are supplied locally, quickly and reliably with our products.

Thorsten Lutz and his team are responsible for the distribution of WEICON products and the technical support of our customers in the entire Gulf region. The team at WEICON Middle East is made up of twelve employees, six of whom work as field sales representatives.

**WEICON  
Inc.**

Since September 1st, 2008, WEICON is represented in North America by WEICON Inc. in Kitchener, Ontario, Canada.

We supply customers in the most important branches of industry of the Canadian economy, e.g. production and manufacturing, mining and the oil and natural gas industry, with our products.

WEICON Inc. has office and storage space of approximately 320 sqm. More than 30,000 WEICON articles intended for our customers in North America are stored here at 50 pallet stations and on additional shelf space.

# WEICON Türkiye

Since April 2011, WEICON has been operating a branch office in Istanbul, Türkiye. WEICON Kimya Sanayi Tic. Ltd.Şti. provides support for our customers on the Bosphorus.

With its millions of inhabitants between Europe and Asia, Istanbul is the ideal location for our branch office in Türkiye. Our customers and partners in neighbouring countries are supplied with WEICON products from there as well.

The branch office has a large storage area. This assures that our products are available and enables us to guarantee that customers always receive our products quickly.

The team of the branch office under the leadership of Tolga Aksöz is responsible for providing our customers in the region with service and support.

# WEICON Romania

Our branch office in Romania was founded in March 2012. In 2013, it has been relocated to a new building.

The registered office of WEICON Romania has been located near Targu Mures in the heart of Romania since November 2013. Our employees in Targu Mures currently support numerous customers throughout Romania.

The warehouse stocks the whole WEICON product range, which ensures that customers are supplied quickly and flexibly with our products.

# WEICON South Africa

In November 2013, we founded our African subsidiary  
WEICON SA Pty Ltd. in Muizenberg near Cape Town

Branch Manager, Kyle Farla, oversees a team of eight well-trained employees including sales representatives in Johannesburg, Durban, Port Elizabeth and Cape Town.

This way, we can ensure that our customers receive the best and direct service from our team.

In addition to South Africa, our office in Cape Town also serves the neighbouring countries of Botswana, Zimbabwe, Zambia and Namibia.

Our flexibility and a very short delivery time are our strengths and distinguish us from other competitors on the market.

Our branch has an area of approx. 220 sqm. The warehouse in Muizenberg has space for up to 45 pallets of WEICON products. This enables us to guarantee that our customers are supplied with products quickly and reliably by the WEICON team on site.

# WEICON South East Asia

WEICON South East Asia Pte. Ltd. – our branch in Singapore.

At the end of 2015, we opened our international branch in Singapore. Majid Bahmani and his team are responsible for the support of our customers in South East Asia.

Our location enables us to quickly react to growing demands and to support the interesting and challenging projects in this region.

Thanks to our team, our on-site warehouse and our network of local distributors, we can ensure fast delivery and personal service.

WEICON

# Czech Republic

In March 2016, we founded our 7th international branch in Teplice in the north of the Czech Republic.

The Czech Republic is a very interesting market with great economic potential. The country has been a member of the European Union since May 2004. Now, 13 years later, it is one of the most developed industrial nations in Central and Eastern Europe. The Czech economy is strongly oriented towards the industry, in particular the automotive industry, metalwork and engineering, the chemical industry and the food and beverage industry. This provides a strong market for our products.

WEICON Czech Republic s.r.o. is the name of our branch. Its headquarters are located in Teplice, in the north of the Czech Republic close to the Czech-German border. The branch is managed by the local manager Vladimír Dufek.

Since 2017

# WEICON Ibérica S.L.

In early 2017, we founded our 8th international branch in Madrid, the capital of Spain.

The head of our branch, Alejandro González Cámara, and his team are responsible for customer services as well as customer acquisition in the Iberian Peninsula.

Spain is one of the most important European industrial nations and it is very important for us to be present there. Significant economic branches within the state are the foodstuffs, automotive and mechanical engineering industry. These areas are continuously expanding and indicate good growth figures. We benefit from this development through our new branch in Spain.

CresciBusiness Award 2024

# WEICON Italia S.r.L.

Since 2018

In October 2018, we founded our 9th international branch in Italy.

WEICON Italia s.r.l., which is the name of the new branch, is situated in the Italian port city Genoa on the country's northwest coast. By founding our new international branch, we will consolidate and further establish our position in the Italian market. "We are looking forward to a very promising future in Italy," says Ralph Weidling.

"Italy is a very interesting market for us, which we have been involved in for quite some time now. The country is one of the biggest industrial nations in the world and it is extremely important for us to be present there. Italy's most important economic sectors are the machine, aircraft and vehicle construction industries, the shipbuilding industry as well as the chemical and textile industry, and the manufacturing of electronic products.

Therefore, Italy is a big market for our products. With our new branch in Northern Italy, we want to take advantage of this positive situation," Weidling further explains.

# WEICON Colombia

Since 2024

We have had our own branch in South America since 2024 – more precisely at the northern tip of South America, in Colombia.

WEICON Colombia S.A.S, as the new branch is called, is located in Medellín in the north-west of the country. The branch is managed by local managing director Daniel Mesa Saldarriaga.

“We have been working successfully with Daniel for years, as he worked for a technical dealer in Colombia who sells our products. By founding our new branch, we will consolidate and expand our market position. We are looking forward to a very promising future in Colombia,” says Ralph Weidling.

“Colombia is a very interesting market for us, and its economy is growing. Our products can be used in important economic sectors in Colombia, such as mining, the maritime industry and metal construction. The country therefore offers a strong sales market for our products,” explains Ann-Katrin Weidling.

# WEICON Australia Pty Ltd

With the establishment of our eleventh branch in Australia, we are now represented on every continent worldwide.

WEICON Australia Pty. Ltd, the official name of the branch, is based in Yatala, between Brisbane and the Gold Coast, on the east coast of Australia. The branch is headed by managing director Joelle del Rio.

"We've been working with Joelle for years. She joined us in Münster in 2020 as a student trainee in our e-commerce department. Two years ago, she emigrated to Australia and set up the online business with our products there. We are looking forward to a successful collaboration with Joelle and her team and to a good start in Australia," says Ann-Katrin Weidling.

About us

# WEICON Production GmbH

Our WEICON Production plant is located in Schwalmthal on the Lower Rhine. The focus is on research and development in order to offer our customers customised products. To this end, we have been cooperating with various universities and research institutes for years and are constantly expanding our product portfolio.

## Speciality products for the industrial sector

Our Schwalmthal plant produces special chemical products such as two-component epoxy resin systems for coating, wear protection and repair work. We develop casting compounds and adhesive systems, such as impact-resistant adhesives and adhesives with approvals for use in the food sector. In total, we have more than 250 formulations that have been developed for a wide variety of chemical products.

Our special products from WEICON Production are used in many areas of industry, such as mechanical engineering, waste water technology, the chemical industry, the marine sector, the paper industry and power stations.

"Thanks to our WEICON Production site in Schwalmthal, we have been able to considerably expand our range of special adhesive systems. This enables us to respond even more closely to the individual wishes and requirements of our customers and to offer them adhesives that meet their needs precisely," says Ralph Weidling.

"The option of customising adhesives to our customers' specific applications is in high demand and is the perfect addition to our extensive range of services," adds Ann-Katrin Weidling.

WEICON

# Epoxy Solutions

We have decades of experience in developing high-performance epoxy resin systems for a wide range of international industrial sectors. Our range of coating systems, epoxy adhesives, versatile urethanes and practical repair sticks for quick repairs offers the right solution for any application.

Individually tailored  
**SOLUTIONS**

WEICON Epoxy Solutions represents tried-and-tested specialist systems that have been successfully used worldwide across a variety of industries. If no ready-made solution is available, our experts develop a customised version precisely tailored to your specific requirements.

**PLASTIC METAL  
SPRAY SYSTEM**

- Reliable processing
- Considerable time savings
- No risk of clogging

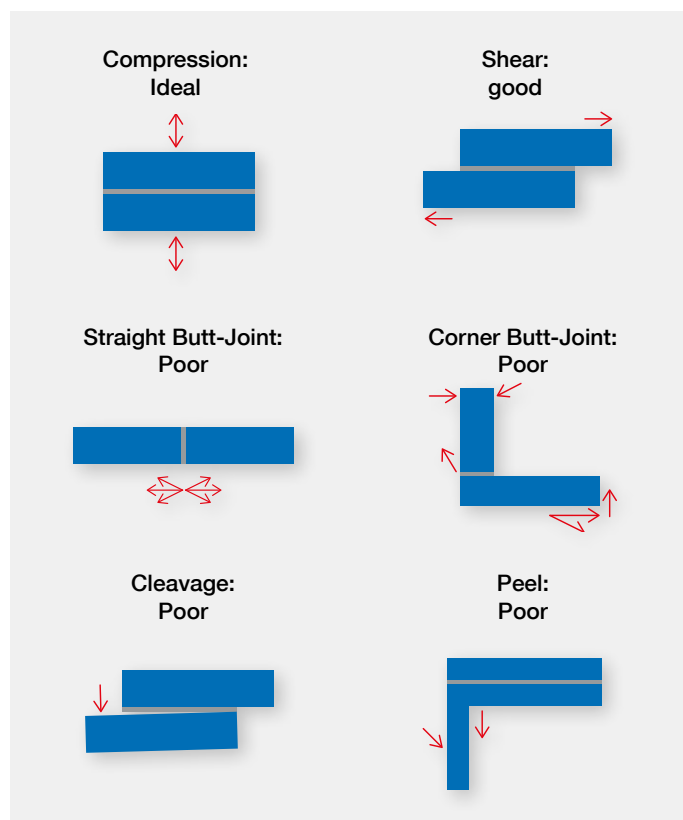

# Adhesive Bonding Basics

## Design and Construction of Bonding

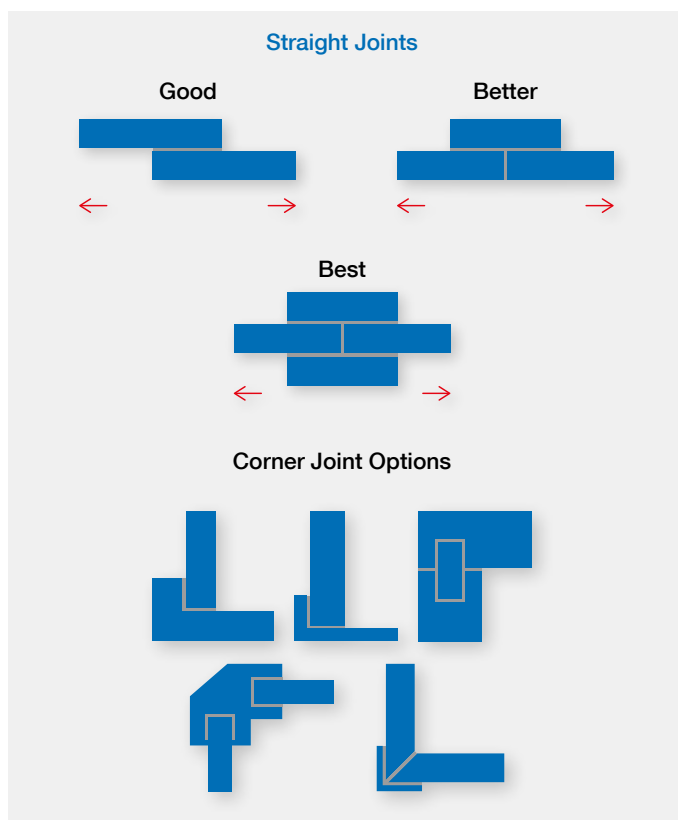

Adhesives are used in all areas of modern industry. Their use improves the quality and efficiency of components, parts and entire manufacturing processes. In addition to adhesion, the design of the joint, the surface preparation, the gap filling ability, the viscosity, the professional use of the adhesive and the conditions of use are important factors for a permanently functional bond.

## Joint Designs

### Typical Joints

### Suggested Improvements

You can find more interesting facts on the topic of **“adhesive bonding”** here

**WE** explain

Are you unsure which  
adhesive is right for you?  
**Contact us!**

## Surface Preparation and treatment

Most materials can be bonded without extensive surface pre-treatment. We recommend cleaning each surface thoroughly with WEICON Surface Cleaner before bonding. Depending on the degree of soiling, further cleaning steps should be carried out beforehand. In order to maintain the maximum performance and process reliability of a bond, it may be advisable to treat the surface further after cleaning. This can be done mechanically (by grinding or sandblasting), chemically (by primer or adhesive cleaner) or highly energetically (flame treatment, corona or plasma). Combinations of these processes are also possible. All the methods mentioned serve to change the surface tension to such an extent that the adhesive can wet the surface in the best possible way.

### Surface Treatment

- ▶ Solvent wiping
- ▶ Mechanical abrasion
- ▶ Primers
- ▶ Chemical pretreatment
- ▶ Corona or plasma treatments
- ▶ Flame

#### Low Surface Energy

Poor Wetting

#### High Surface Energy

Good Wetting

#### Mechanical abrasion

#### Sandblasting

#### Primer

#### Flame/Plasma

## Gap Fill and Adhesive Viscosity

The viscosity of the adhesive and the gap bridging are closely related. The higher the viscosity of the adhesive, the greater its ability to bridge gaps. It is important to note the maximum gap bridging for each product. Exceeding this maximum value can weaken the strength of the bond. To help classify viscosity, the following list provides information on everyday substances and their respective viscosities – from very low-viscosity water to high-viscosity peanut butter.

Substance	Water	Milk	Rapeseed oil	SW40 Motor oil	Castor oil	Maple syrup	Wood glue	Honey	Chocolate syrup	Mustard	Peanut butter
Viscosity mPa.s = cP	1	3	85–140	450–650	1.000	5.000	10.000	10.000	25.000	50.000	250.000

# Adhesive Bonding Basics

## Adhesive Selection

When selecting the most suitable adhesive for an engineering application, a number of factors must be considered. The following tables will help narrow down the options. Our specialists will be happy to help you choose the right product for your needs.

Adhesion					Cured State	
Chemistry	Metal	Glass	Plastic	Composite	Flexibility	Hardness
Anaerobic	excellent	not applicable	not applicable	not applicable	low	rigid
Cyanoacrylate	very good	poor	excellent	good	low to medium	rigid to very soft
Epoxy - 2-Part	excellent	excellent	fair	excellent	low to medium	rigid to very soft
MS Polymer	very good	good	good	very good	high	very soft
Polyurethane	very good	good	fair	excellent	medium to high	semi-rigid to soft
Structural Acrylic - 2 Part MMA	excellent	product-specific	excellent	excellent	medium	semi-rigid

Solvent Resistance			Temperature Resistance

## Applications Plastic Metal

# Two-component epoxy resin systems

Add the hardener

Mix resin and hardener thoroughly and bubble-free

Apply mixed components

- ▶ providing fast and durable repairs
- ▶ bondings
- ▶ coatings

## Applications

For workshops and maintenance departments in all industries, WEICON Plastic Metal is the ideal product for:

- ▶ repairs on aluminium and light alloy
- ▶ reconditioning and repairing castings, pipes and tanks
- ▶ filling blowholes and microporosities
- ▶ working over shafts, sliding bearings, pumps and housings
- ▶ welding without preheating (wherever welding is problematic or impossible)

In industrial design and manufacturing, WEICON Plastic Metal is used for making moulds and models, in particular:

- ▶ as an aid for making moulds for rubber and injection moulded parts
- ▶ making dies
- ▶ templates and models for pre-production testing
- ▶ lining of cutting tool guides
- ▶ making fixing devices

## Contour Spatula Flexy

Versatile use, e.g. for coating and processing 2C-adhesives. The spatula is perfect for applying adhesives on large or small surfaces. It is made of wear-resistant polyamide.

## Epoxy Resin Systems

## Plastic Metal

## WEICON A

Pasty | steel-filled | certified by DNV

WEICON A has a DNV certificate and is particularly suitable for repair and maintenance work in the maritime industry. The epoxy resin system is highly filled with steel pigments, magnetic and its pasty texture allows application even on vertical surfaces.

It can be used to remove corrosion damage and pitting or to repair holes and blowholes. For example, it can be used to reproduce heavy steel components showing severe damage by corrosion and pitting. In this case, WEICON A provides a real alternative to welding, as the application of the epoxy resin does not cause thermal distortion as in welding. The 2-component system can be used for repairs on tanks and pipes as well as for repairing cracks in engine or pump housings and machine parts. It is ideal for use in sewer systems where pipes and pipelines are exposed to strong media influences.

Other applications include the manufacture of models, moulds, tools and clamping devices. WEICON A can be used in mechanical engineering, in toolmaking, in the cement industry, in power plants, in model and mould making, and in many other industrial sectors.

► 0.2 kg 10054381    ► 0.5 kg 10000003    ► 2.0 kg 10000006

## WEICON B

Pasty | steel-filled | long pot life

The epoxy resin system WEICON B is particularly suitable for detailed reproductions in model and mould making, for the production of tools, templates, gauges and clamping devices, and for filling blowholes and microporosities on castings and steel parts as well as for general repair works where a steel-filled casting compound is advantageous.

The reconstructing of severely damaged steel components with WEICON B causes no thermal distortion of the components and thus no impairment of the metal structure, as for example during weld overlay. Due to the long pot life and curing time, larger quantities can be applied per working step. It can be used in mechanical engineering, toolmaking, model and mould making as well as many other areas.

## WEICON C

aluminium-filled | temperature-resistant up to 220°C (428°F) | drinking water approval according to BS 6920

WEICON C is a temperature-resistant and flowable epoxy resin system especially for industrial use. The adhesive is non-corrosive, anti-magnetic and cures practically without shrinkage.

WEICON C is particularly suitable as an adhesive for large-surface applications, for the casting of moulds, and for the production of fixing devices and tools (e.g. injection moulds). It can be used in tool and mould making as well as in many other industrial areas, which are exposed to high thermal stress.

### WEICON BR

**Pasty | bronze-filled | non-corrosive**

The epoxy resin system WEICON BR is particularly suitable for filling blowholes and for repairing and reconditioning bronze parts and bronze castings.

It can be used in the entire marine and shipping industry as well as in many other industrial sectors. For example, it can be used to reproduce bronze components that show severe damage. Thereby, WEICON BR offers a real alternative to costly brazing.

10054386	10012669	10012670

### WEICON F2

**Flowable | aluminium-filled | non-corrosive**

The epoxy resin system WEICON F2 is suitable for the casting of models, moulds and templates, for the repair of porous and damaged castings, for the production of prototypes and holding devices, and for the casting of dies to verify accuracy.

It can be used in toolmaking, model and mould making and many other areas of industry.

10054388	10000061	10000062

### WEICON F

**Pasty | aluminium-filled | non-corrosive**

WEICON F is especially suitable for applications on parts made of aluminium, its alloys, magnesium, and other light metals.

WEICON F can be used for cost-effective repairs of all kinds, for filling shrinkage defects in light metal castings, and for the reconstruction of components. The epoxy resin system can be used in tool making, model and mould making, and in many other industrial sectors.

## WEICON HB 300

**Pasty | steel-filled | high-temperature-resistant up to 280°C (536°F) for short periods of time**

WEICON HB 300 is pasty, steel-filled and resistant to high temperatures up to 200°C (392°F) (for short periods up to 280°C/536°F) and is processed in a mixing ratio of 1:1.

The epoxy resin system is also suitable for applications on vertical surfaces and can be used for repairs and adhesive bonding of castings and metal parts, for filling blowholes, for repairing damages on containers, car bodies and machine parts, and for sealing pumps and pipes. The product can be used in mechanical and industrial engineering, in equipment engineering, and in many other areas of industry.

WEICON HB 300

## WEICON HT 111

**Steel-filled | pasty | high-temperature-resistant**

The epoxy resin system WEICON HT 111 is used to repair and touch up metal parts. It is pasty, steel-filled and high-temperature-resistant up to 200 °C (392 °F). For a short period of time, it can withstand temperatures up to 280 °C (536 °F). WEICON HT 111 is chemical-resistant, non-corrosive and is processed with a mixing ratio of 1:1.

The repair material is suitable for processing on vertical surfaces and can be used for metal repairs and bonding on castings and metal parts, for filling blowholes, for repairing damage to containers, car bodies and machine parts, and for sealing pumps and pipes. Due to its properties, the composite material is particularly suitable for applications in mechanical and plant engineering, apparatus engineering and many other areas of industry.

### WEICON Ceramic HC 220

**Wear protection | temperature-resistant up to +220 °C | drinking water approval according to BS 6920**

The epoxy resin system WEICON Ceramic HC 220 provides high abrasion resistance and serves as wear protection for heavily used surfaces. It is temperature-resistant up to +220 °C, flowable, ceramic-filled, resistant to chemicals and has a high adhesive strength. Ceramic HC 220 can be easily processed with a paint brush and applied to large surfaces.

The epoxy resin systems is non-corrosive, anti-magnetic and cures practically without shrinkage. The product can be used in mechanical and plant engineering, in equipment engineering, and in many other areas of industry where high temperature loads are part of daily work.

# Epoxy Resin Systems

## Plastic Metal

### WEICON Ceramic BL

**Wear protection | increased efficiency | drinking water approval according to BS 6920**

WEICON Ceramic BL is filled with silicon carbide and zirconium silicate, offers high chemical and temperature resistance as well as extreme wear protection and high abrasion resistance. The epoxy resin system is especially suited for the lining of heavily stressed pump housings, as wear protection for slide bearings, slides, funnels and pipes and for the repair of castings, valves and blower fans. A coating with WEICON Ceramic BL, which gives surfaces a very smooth finish, increases the flow speed of liquids and thus increases the efficiency of pumps, pipes, valves, etc. by 5 % to 20 %.

The product can be used in mechanical and plant engineering, in apparatus engineering and in many other areas of industry. Wear-resistant final coating for all Plastic Metal types. WEICON Ceramic BL is suitable in combination with one of the other WEICON Plastic Metal types for a system build-up as a surface finish for visual inspection.

► 0.2 kg 10054394    ► 0.5 kg 10000093    ► 2.0 kg 10005233

### WEICON GL-S

**Flowable | ceramic-filled | wear protection | control layer | temperature-resistant up to +180 °C (+356 °F)**

The epoxy resin system WEICON GL-S provides high abrasion resistance and serves as wear protection for heavily used surfaces. It is flowable, spreadable (can be applied with a paint brush), has a high initial strength, is mineral-filled, and resistant to chemicals.

WEICON GL-S is suitable in combination with one of the other WEICON Plastic Metal types for a system build-up as a surface finish for visual inspection. Due to its long recoat time of five hours, GL-S is especially suitable for applications at higher ambient temperatures or for larger surfaces. It is particularly suitable for lining heavily stressed pump casings, as wear protection for slide bearings, chutes, funnels and pipes, and for the repair of castings, valves and fan blades.

The product can be used in mechanical and plant engineering, in equipment engineering, and in many other areas of industry.

SURFACE FINISH

## WEICON WL

**Surface coating | excellent base coat for stainless steel surfaces | with residual elasticity**

The WEICON WL epoxy resin system is used to coat surfaces that are subject to stresses. It has a high adhesive strength, especially on stainless steel. It is liquid, sprayable, spreadable (can be applied with a brush), self-levelling, retains residual elasticity, is ceramic-filled and chemical-resistant.

Owing to its long pot life, WEICON WL can be used for applications with higher ambient temperatures or for larger surfaces. Due to the high flowability of WEICON WL, it is important to ensure a low layer thickness and to observe the layer sequence time. WEICON WL is well suited for a system build-up in combination with other Plastic Metal types.

For example, the 2-component epoxy resin can be used as a primer when lining pump casings made of stainless steel that are subject to heavy stress. The surface coating can be used in the field of wastewater technology, on pumps, in water pumping, in mechanical and plant engineering, in apparatus engineering and in many other areas of industry.

► 0.2 kg 10067876    ► 0.5 kg 10067882    ► 2.0 kg 10067887

## WEICON Food Grade

**Wear protection | corrosion protection | foodstuffs approval | drinking water approval according to BS 6920**

WEICON Food Grade is a flowable 2-component epoxy resin system with a high content of fine mineral fillers. The coating system has been approved by the Ruhr District Institute of Hygiene for contact with aqueous and fatty foodstuffs up to 70 °C. It is used both to protect surfaces against wear and corrosion and as an adhesive.

The coating is easy to apply and adheres to a wide variety of surfaces even under mechanical stress. The wear protection has very good chemical resistance and is suitable for coating a wide variety of parts, such as pumps, conveyor systems, lifting screws, hoppers, tanks, and pipes.

WEICON Food Grade is suitable on its own or in combination with one of the other WEICON Plastic Metal types for a system build-up.

# Epoxy Resin Systems

## Plastic Metal

### WEICON Anti-Static

**Wear protection system | high chemical resistance | antistatic**

WEICON Anti-Static is a liquid, antistatic 2-component epoxy resin system with a high content of fine ceramic fillers. It is used to protect surfaces against wear and corrosion. By combining high-strength particles with a viscoplastic polymer matrix, the system offers a high level of wear protection. It has good chemical resistance and high abrasion resistance. The coating adheres very well even under vibration and elongation on a wide variety of surfaces and does not drip. The wear protection system is free of tar and solvents and cures almost without shrinkage. Anti-Static is suitable for coating a wide variety of parts, such as rollers, pumps, chutes, conveyors, lifting screws, separators, hoppers, propellers, fans, and heat exchangers.

WEICON Anti-Static is suitable in combination with one of the other WEICON Plastic Metal types for a system build-up as an antistatic surface finish.

**APPLICATIONS  
AND PRODUCTS!**

### WEICON Anti-Stick

**Anti-stick effect | increased efficiency | sprayable**

WEICON Anti-Stick is a liquid, grey 2-component epoxy resin system with mineral fillers for the protection of heavily stressed surfaces against aggressive chemicals and corrosion. It was specially developed for application with low-pressure equipment. In addition to the mineral fillers, Anti-Stick contains special additives that create an anti-stick effect and thus prevent flour, dust or suspended particles, for example, from sticking. The epoxy resin system has good chemical and thermal resistance up to +120 °C. It is free from solvents and cures with virtually no shrinkage.

A coating with WEICON Anti-Stick, which gives surfaces a very smooth finish, increases the flow speed of liquids and thus increases the efficiency of pumps, pipes, valves, etc. by 5 % to 20 %. Anti-Stick is applied directly to the parts by sandblasting after thorough preparation of the substrate. The coating adheres very well to a wide variety of surfaces and is suitable for many different parts such as plain bearings, chutes, funnels and pipes as well as for coating castings and valves. The system can be used in mechanical and plant engineering, in apparatus engineering, in the paper industry, in the bulk goods industry, in exhaust gas systems, in mining, in open-cast mining, in chemical plants and in many other areas of industrial production. In any case, preliminary tests under practical conditions are recommended; especially if the parts are additionally exposed to increased temperature or mechanical stress.

WEICON Anti-Stick is suitable on its own or in combination with one of the other WEICON plastic metal types for a system build-up as an anti-stick coating.

## WEICON WP

**Pasty | high strength | ceramic-filled | extremely high resistance against abrasion and wear | residual elasticity and impact-resistant**

WEICON WP serves as protection for surfaces subject to heavy wear. A coating with the epoxy resin system offers high resistance to wear and abrasion and is extremely resistant to chemicals.

WEICON WP prevents metal loss and, depending on the application, replaces previously used wear-resistant alloys, ceramic tiles or rubber lining as well as welded metal coatings. It can be used both for the reconditioning of worn metal surfaces and as a wear-resistant coating. A particularly high level of protection is achieved when wear is caused by laterally impacting particles.

## WEICON WPG-19 **NEW**

**Extreme wear protection | pasty | fibre-reinforced | ceramic-filled**

WEICON WPG-19 is a fibre-reinforced, ceramic-filled, 2-component epoxy resin system. It is used as wear protection in industrial applications. The grey coating contains ceramic beads up to two millimetres in size and protects surfaces against erosion and abrasion caused by the impact of coarse particles.

The system can be applied with a spatula. It is viscoplastic, highly impact-resistant and extremely resistant to abrasion. It is used for coating and lining various surfaces and components in industrial plants. It is used, for example, to protect gutters, bends, hoppers, tanks, chutes and many other processing systems that are exposed to abrasion and impact.

# Epoxy Resin Systems

## Plastic Metal

### WEICON TI

**Pasty | titanium-filled | temperature-resistant up to +200°C (+392°F) (briefly up to +260°C/+500°F)**

WEICON TI has high pressure resistance and very good chemical resistance. It is particularly suitable for repairs of pumps, valves, wear plates, ball bearing seats, shafts and propellers, and for lining pump housings and slide bearings.

The epoxy resin system can be used in mechanical and industrial engineering, in equipment engineering, and in many other areas of industry.

► 0.2 kg 10054397    ► 0.5 kg 10013464    ► 2.0 kg 10013475

### WEICON SF

**Pasty | steel-filled | certified by DNV**

WEICON SF has a DNV certificate and is particularly suitable for quick repairs and repair work on leaking pipes, housings and gears, for anchoring and for the production of clamping devices.

The epoxy resin system can be used in mechanical engineering, tool production, model and mould making, the maritime industry and many other areas.

► 0.2 kg 10009769    ► 0.5 kg 10000071    ► 2.0 kg 10000072

### WEICON ST

**Thixotropic | can be applied with a spatula | metal-filled | non-corrosive**

WEICON ST is suitable for versatile repairs and repair works on machine parts and workpieces made of stainless steel, such as tanks, pipes, containers, funnels, and flanges.

The epoxy resin system can be used in the chemical industry, in the entire marine and shipping sector, in sewage plants, in the paper industry, and in many other areas.

### WEICON Fire Safe

**Flame-retardant | strong adhesion | trowelable**

WEICON Fire Safe is a white, flame-retardant, trowelable 2-component adhesive. It is suitable for fire protection applications and is used to attach wear protection ceramics or steel parts to a wide variety of surface materials, such as metal, concrete, or similar.

The adhesive system shows very high adhesive strength, is hard-flexible after curing and has been modified to be impact-resistant. Even under the most extreme conditions, the adhesive does not become brittle. It shows good wear protection properties in particle erosion, has good chemical resistance and is solvent-free. Fire Safe contains additives that cause self-extinguishing within a few seconds. It was tested in accordance with DIN EN ISO 340 at the DMT in Dortmund and passed the test successfully.

► 0.2 kg 10062919    ► 0.5 kg 10062920    ► 1.0 kg 10062921

## WEICON Ceramic W

### Pasty | ceramic-filled | wear-resistant

The epoxy resin system WEICON Ceramic W offers high wear protection and high abrasion resistance. It is resistant to chemicals and has a high temperature resistance up to 230°C (446°F); for short periods of time even up to 250°C (482°F).

Ceramic W is non-drip, can be processed with a spatula, and applied on vertical surfaces or even overhead. It is suitable for adhesive bonding or lining aluminium oxide bricks in mill construction, for lining heavily stressed pump housings, as wear protection for slide bearings, slides and pipes, and wherever the use of dark products is not desired for visual reasons. It can be used in mechanical and industrial engineering, in mill construction, equipment engineering, and many other areas of industry.

## WEICON HP

### Pasty | mineral-filled | shock-resistant | adheres to wet and moist surfaces

WEICON HP is a 2-component epoxy resin system with high adhesive strength, enormous impact strength as well as high residual elasticity and abrasion resistance.

Due to its high elongation at break and the pasty texture of the epoxy resin, WEICON HP can be used for adhesive bonding, repairs, and for lining heavily used equipment. Particularly on wet and moist surfaces, the adhesive is able to build up a very good adhesion to various materials.

## WEICON UW

### Pasty | mineral-filled | adheres to wet and moist surfaces

WEICON UW is a 2-component epoxy resin system with fast curing. It is particularly suitable for repairs and repair works, for example on pipes, pumps, tanks, and containers.

Due to its special formulation, WEICON UW also offers very good adhesion when bonded under water. Therefore, it can be used in the entire marine and shipping sector, in sewage plants, and wherever moisture and wetness may cause problems with the adhesion.

## Plastic Metal

### WEICON Casting Resin Plus 90

**Casting compound | crystal clear | low viscosity | up to 90 mm layer thickness**

The epoxy resin system WEICON Casting Resin Plus 90 is a casting compound which cures crystal clear. Its special formulation allows high layer thicknesses up to 90 mm. The compound can also be used to coat sensitive surfaces and protects against damages. The casting resin has a low viscosity, high mechanical stability, is impact-resistant, has a high moisture resistance and a good UV resistance. It can be processed very well manually and mechanically - whether by grinding, filing or drilling.

Casting Resin Plus 90 is particularly suitable for applications with high visual requirements. Whether in the production of design objects, furniture construction, trade fair construction, yacht and boat building, wood processing, arts and crafts, or gardening and landscaping - the casting resin is suitable for a wide range of applications.

### WEICON Casting Resin MS 1000

**Liquid | unfilled | low viscosity**

WEICON Casting Resin MS 1000 is a transparent and very flowable epoxy resin system with high mechanical strength. It is suitable for a wide range of applications.

MS 1000 adheres well to metal, wood, rigid foam and many plastics. It can be used for large-surface adhesive bonding or for laminating composite threaded bushes and screws. Due to its low viscosity, the epoxy resin system is also suitable for the casting of electric components.

It can be used for the production of fibre composites, in tool and mould making, in the electrical industry, in machine construction, and in many other industrial fields. MS 1000 shows good wetting and penetration results of glass fabric and is therefore well-suited for laminating glass, aramid and carbon fibre for the production of fibre-reinforced components. It can also be easily combined with different fillers (powdery, fibrous, fabric).

**WEICON WR****Liquid | steel-filled | wear-resistant**

WEICON WR is suitable for areas where metal parts are subject to heavy wear due to friction. For example, the epoxy resin system can be used for repairs and for casting around shafts, for casting bearings, cutting and punching tools, for the production of castings, copy milling models and moulds, for underpouring machines and foundations, and as a wear-resistant base layer before the final coating with WEICON Ceramic BL.

It can be used in mechanical engineering, toolmaking, model and mould making, and in many other industrial sectors.

**WEICON WR**

**WEICON WR2****Pasty | mineral-filled | wear-resistant | high abrasion resistance**

WEICON WR2 is a pasty wear protection and is particularly suitable for areas where the application of casting compounds is not possible, such as repairs of conveyor systems, guide rails and slideways. The epoxy resin system can also be used to prevent wear on metal surfaces which are exposed to high abrasion and erosion. It serves as a wear-resistant base layer before the subsequent coating with WEICON Ceramic BL.

WR2 can be used in mechanical and industrial engineering, in equipment engineering, and in many other industrial sectors.

## Plastic Metal

### Epoxy Resin Putty

**High-strength | versatile | temperature-resistant up to +200 °C**

WEICON Epoxy Resin Putty is a metal-free, kneadable 2-component compound. The product can be used for various purposes. It is suitable for the reconditioning and repair of castings, the rebuilding of shafts, slide bearings, pumps and housings, the renewal of defective threads, the production of templates and models, and for repair works on aluminium, light metal and injection moulded parts. The compound can be used to seal pipes and tanks and to fix screws and hooks. It can be used to remove corrosion damage and pitting or to repair holes and blowholes.

Epoxy Resin Putty adheres particularly well to all metals and also to ceramics, glass, stone, concrete, wood, rubber and many plastics. When cured, WEICON Epoxy Resin Putty is machinable, paintable and resistant to petrol, oil, esters, salt water and most acids and alkalis. It has a high-temperature-resistance up to +200°C (+392°F), is non-magnetic and non-corrosive. Due to the simple mixing ratio of 1:1 by weight and volume, resin and hardener can be portioned very easily in the desired quantity. WEICON Epoxy Resin Putty can be used in machine construction, tool construction, model and mould making, and in many other industrial applications.

### Balancing Putty

**Kneadable balancing compound | fast application without tools**

WEICON Balancing Putty is an easy-to-use, cold-curing 2-component epoxy resin system. The resin putty is used especially for balancing armatures for electric motors. Compared to machining processes such as drilling or milling, this type of balancing has several advantages. No tools are required for the processing of the balancing putty. And no work is required on the armature core. This results in a quality improvement in terms of motor noise and efficiency. The use of putty saves time, as e.g. deburring the balanced areas is not necessary. Armatures, which were single-plane balanced by machining, can be two-plane balanced with the Balancing Putty without requiring additional time. No metal chips are created, which can get caught in the winding and cause damage. The potential risk of accidents during drilling and/or milling is eliminated. For example, the Balancing Putty is not shaken off in the test run (in uncured condition) during the balancing process at 3000 rpm (diameter of the armature 40mm).

### ABRASION RESISTANCES ABRASION MEASUREMENT ACCORDING TO TABER

	Density (g/cm³)	Abrasion volume (cm³)
Steel STW 22 (Reference)	7.9	0.1
WEICON Ceramic HC 220	1.7	0.1
WEICON Ceramic BL	1.9	0.2
WEICON GL-S	1.9	0.2
WEICON HP	1.5	0.3
WEICON WR	2.4	0.5
WEICON WR2	1.9	0.6
WEICON Ceramic W	1.6	0.9

The Taber abrasion test according to DIN ISO 9352 is used to determine the abrasion resistance of various material types. For this, two friction wheels grind over the surface of a rotating material sample. To intensify the test, the H18 friction rollers are pressed onto the surface of the material with an additional weight of 1 kg. After 1000 rotations, the amount of material ground off is determined.

With this test procedure, our Plastic Metal products can demonstrate their excellent wear protection properties.

## WEICON CBC Chocking Backing Compound

**Certified by ABS | vibration-resistant | impact-resistant**

WEICON CBC is suitable for the shimming and backfilling of systems difficult to align in the industrial and maritime sector. The "ABS Product Design Assessment" certified system serves as a replacement for fittings and worn metal sheets, like steel or other materials, and ensures the direct contact to foundation plates.

The special epoxy resin system has a low viscosity, is very flowable and self-levelling. It has a pot life of 30 minutes and cures nearly shrink-free. It provides a permanent high-static stability and has a high resistance to ageing. The epoxy resin system adheres particularly well to steel and concrete. It has a good compressive strength and is resistant to oils, fuels and many chemicals. It is vibration-resistant as well as temperature-resistant.

Due to almost no cure shrinkage, machines and systems keep their specific alignment after the casting of WEICON CBC.

- ▶ repairs in spaces difficult to access

VIDEO

### WEICON Pipe Repair-Kit

The set is designed for the emergency repair of defective and damaged pipes and pipelines. It comprises one WEICON Repair Stick Multi, a special repair tape made of fibreglass-reinforced plastic, assembly instructions and a pair of protective gloves. The repair tape is impregnated with a special resin and activated by contact with water.

The Pipe Repair-Kit can be processed without any additional tools and is used for the reliable and permanent sealing of cracks and leaks. It is very easy and quick to use and shows excellent adhesive properties, high pressure and chemical resistance as well as temperature resistance up to 150°C.

Within 30 minutes, the tape is fully cured and hard-wearing. Due to the fabric properties of the tape, the resulting high flexibility and the simple processing, the repair kit is particularly suitable for sealing leaks in bends, T-pieces or in spaces difficult to access.

It can be used on many different surfaces such as stainless steel, aluminium, copper, PVC, many plastics, fibreglass, concrete, ceramics and rubber.

The Repair-Kit can be used in various areas of industry for the quick and easy repair of chemical, steam, process and water pipes.

## WEICON Pool Repair-Kit

**Cures reliably even under water | application on wet surfaces | excellent adhesion**

The WEICON Pool Repair-Kit is especially suitable for quick repair work under water. Its excellent adhesive strength enables application on wet surfaces. Thanks to the rapid curing process, it is perfect for repair work on tiles, mosaic tiles, etc.

Repair of mosaic tiles

## Technical Data

Base	epoxy
Filler	mineral
Texture	pasty
Colour	white
Processing temperature	+15 °C to +40 °C
Component temperature	>3 °C (+37,4 °F) above dew point
Mixing ratio by weight	100:83
Mixing ratio by volume	100:95
Viscosity of the mixture at +25 °C (+77 °F)	550,000 mPa·s
Density of the mixture	1.5 g/cm³
Consumption layer thickness 1.0 mm	1.5 kg/m²
Max. layer thickness per step	10 mm

Pot life at 20 °C (+68 °F), 500 g batch	30 min.
Additional layer after (35 % strength)	7 h
Working strength after (80 % strength)	12 h
Final strength (100 % strength)	36 h
Shrinkage	0,12 %
Temperature resistance	-35 °C (-4 °F) to +160 °C (+248 °F)

Mechanical properties after curing	
- Measured after curing at	24 h RT + 4 h 60 °C
Tensile strength DIN EN ISO 527-2	31 MPa
Elongation at break (tensile) DIN EN ISO 527-2	9.0 %
Hardness (Shore D) DIN ISO 7619	75±3

Bond	Use	Pool Repair-Kit
above water →	above water	23.8 N/mm²
above water →	under water	20.5 N/mm²
under water →	under water	15.3 N/mm²

Adhesive bonding following the DIN EN 1465 standard on V2A steel, sand-blasted, after storage for 7 days at 20 °C.

Ideal water temperature for application: +20 °C (+68 °F) to +40 °C (+104 °F)

## Marine Emergency Repair Kits

For emergency repairs and maintenance works on board of ships, we developed three different Repair Kits. WEICON Marine Emergency Repair Kits are equipped with many different products that support you in various cases. The kits cover most cases of offshore emergency repairs and maintenance works during long passages. The Repair Kits differ in the range of included products. Repair Kit 1 covers the most common emergency and maintenance cases. Kit 3 covers many different applications on board. The Repair Kits are suitable for all ships, where repairs and maintenance have to be carried out frequently.

As a service for our customers, WEICON provides the Marine Emergency Repair Kits with all necessary dangerous goods declarations.

+ incl. transport documents  
(IATA, IMO, ADR)

# The easy solution for all repair and maintenance work.

- ▶ even for small repairs
- ▶ the cured product can be machined (drilled, filed, tapped)

## Repair Stick Steel

Certified to  
NSF/ANSI/CAN 61

**Fast-curing | steel-filled | drinking water approval | paintable**

It is particularly suited for the fast and high strength repair and bonding of metal parts and for the patching and sealing of cracks, holes, and leaks in machine parts, tanks and pipelines, containers, pumps and housings, balcony railings, banisters, and torn-out threads. The WEICON Repair Stick Steel can be used in machine and system construction, in tank construction and apparatus engineering, in the foods, cosmetic and pharmaceutical industries and many other applications.

▶ 57 g

▶ 115 g

10010241

10007705

## Repair Stick Aqua

**For underwater applications | ceramic-filled | paintable**

Ideal for quick repairs on damp and wet surfaces and for underwater applications.

For the repair and sealing of cracks, holes, and leaks in petrol and water tanks, radiators, electrical switchboards, sanitary installations and swimming pools. The WEICON Repair Stick Aqua can be used in sanitary and heating system construction, electrical equipment, the maritime sector and many additional industrial applications.

## Epoxy Resin Systems

## Repair Sticks

## Repair Stick Titanium

**Wear-resistant | titanium-filled | high-temperature-resistant up to +230°C (+446°F) (briefly up to +260°C/+500°F) | paintable**

It is suited for the permanent and wear-resistant repair and bonding of metal parts such as tanks and pipelines, aluminium, light metal and injection moulded parts, shafts and slide bearings, pumps and housings and torn-out threads.

The WEICON Repair Stick Titanium can be used in machine and system construction, tank construction and apparatus engineering, and many other industrial applications.

10011973    10011970

## Repair Stick Stainless Steel

**Non-corrosive | fast-curing | stainless steel-filled | drinking water approval | paintable**

For non-corrosive repair and reconditioning of stainless steel and other rustproof metals, such as those in tanks and containers, filling and packing machines, pipes, lines, pumps and housings.

Due to the quick mechanical loading capacity of the mended parts (approx. 60 minutes), expensive and longer downtimes are avoided. The WEICON Repair Stick Stainless Steel can be used in tank construction and apparatus engineering, in the foods, cosmetic and pharmaceutical industries and many other applications.

10025658    10025663

Pipe sealing on a water tank  
Repair Stick Multi-Purpose

## Repair Stick Wood

**Residual elasticity | mineral-filled | paintable**

For permanent repairs of wooden parts with residual elasticity and without shrinkage. For the repair of cracks and bore holes, broken out or broken off wooden parts and for the sealing of joints on windows and door frames, veneers, boards and planks, models and wooden toys.

WEICON Repair Stick Wood can be used in the wood and furniture industry, in model building and many other applications.

► 28 g    ► 56 g  
10010237    10007717

### WEICON Repair Stick Wood

A special item in the product range is the Repair Stick Wood. It was developed for carrying out repairs on furniture, shelving, etc. To enable a "seamless" repair, it has the same density as wood.

After curing, it can be processed like wood. In the test shown below, the WEICON Repair Stick floats on the surface like wood, while competitive products sink to the bottom due to their high density.

## Repair Stick Plastic

**Plastic-filled | drinking water approval | paintable**

Especially for the permanent repair of plastic components and composite materials with residual elasticity such as window and door frames, panelling and bumper bars.

For the bonding of metal parts such as pipes and pipe bends, fittings and flanges, water tanks, pumps and housings.

## Repair Stick Multi-Purpose

**Fast-curing | mineral-filled | drinking water approval | paintable**

The all-round product for quick, elastic and non-shrink repairs and touch-ups on nearly all surfaces. Repair Stick Multi fills and seals cracks, holes, damages and leaks. It can be used on metal, wood, stone, ceramics, plastic and many other materials.

Due to its versatile use, WEICON Repair Stick Multi is suitable for industrial applications as well as for skilled trades or DIY projects.

Repair Stick Copper

## Epoxy Resin Systems

## Repair Sticks

## Repair Stick Copper

Certified to  
NSF/ANSI/CAN 61**Extremely fast-curing | copper-filled |  
drinking water approval | paintable**

The WEICON Repair Stick Copper is suited for the very quick repair (processing time: 3 min.) of cracks and leaks even on damp and wet surfaces such as pipes, pipe bends, fittings, flanges, copper gutters, sheets, water heaters, water tanks, hot, cold water lines, freezer and air conditioning systems.

The WEICON Repair Stick Copper can be used in tank construction and apparatus engineering, in the foods, cosmetic and pharmaceutical industries and many other applications.

► 57 g    ► 115 g  
10010227    10006609

## Repair Stick Concrete

**Fast-curing | ceramic-filled | paintable**

Especially for quick repair and reconditioning of all concrete, stone and ceramic surfaces.

Fills and seals cracks and defects on masonry, stone, concrete and ceramic tiles and on bricks, borders, kerbstones, statues, tombstones and ornaments. It can also be used for the reinforcement of pegs, screws and anchors in outdoor and indoor areas. The WEICON Repair Stick Concrete can be used in the construction industry, in gardening and landscaping, and many other applications.

► 57 g    ► 115 g  
10025685    10025687

## Repair Stick Aluminium

**Non-rusting | fast-curing |  
aluminium-filled | paintable**

For the quick and non-rusting repair and bonding of metal parts. For the repair of cracks, holes and leaks in car bodies, gearboxes and tanks, window frames and profiles, and boats and models.

The WEICON Repair Stick Aluminium can be used in machine and system construction, in the automotive industry, in gear construction, window construction, model building and many other applications.

\*1 For easier workability when ambient temperatures are low, the sticks should be warmed up to room temperature (20°C/+68°F) before application.

\*2 Max. 15 mm per procedure

## Test Results

We have conducted a series of laboratory tests to compare sticks from various countries. Some of the test results are summarised in the tables shown below.

# Epoxy Resin Systems

## Repair-Tape

### Repair-Tapes

Flexible, durable and self-fusing repair tape made of fibreglass-reinforced plastic for fast emergency repairs in indoor or outdoor areas. The Repair-Tape is soaked with a special resin and is activated by contact with water.

It enables a very easy and fast application as well as very high adhesive strength on nearly all surfaces. After just 30 minutes, the tape is fully cured and hard-wearing. After curing, the tape can be sanded and painted.

The tape can be applied without additional tools and is used for reliable and durable repairs in industrial applications, skilled trades, around the house, and in the camping and DIY sector.

Tensile shear strength on steel

Adhesive strength of Repair Stick Steel

WEICON Epoxy Adhesives are cold-curing, solvent-free two-component systems with extremely strong bonding properties. They enable material bonds with high tensile and impact strength and are thus ideal for assembly, repairs and production.

In particular in cases of innovative constructions and bonds between different materials such as

- ▶ metals
- ▶ hard plastics
- ▶ fibre-reinforced materials (GFK, CFK, fibreglass etc.)
- ▶ ceramics
- ▶ glass, stone
- ▶ wood etc.

Today's requirements are ever more demanding (e.g. visually appealing joints along with very high strength). These materials are also often combined with each other, which leads to additional demands.

Now with an **improved formula!**

**HIGH-TEMPERATURE-RESISTANT UP TO 180 °C**

Here, the use of WEICON Epoxy Adhesives offers a number of advantages:

- ▶ when using WEICON Epoxy Adhesives, the surfaces of the materials are not altered as they are when e.g. soldering or welding is employed
- ▶ no stresses are caused in the materials, and there is no need to use additional fixing methods
- ▶ using thinner and lighter materials often enables simpler and more cost-effective constructions, which can result in considerable reductions both in weight and costs

### Epoxy Minute Adhesive

improved formula

**High-temperature resistant | viscous | fast-curing**

Universally applicable, two-component epoxy resin system. The adhesive is resistant to high temperatures up to +180 °C, viscous and self-levelling. Very short pot life and fast-curing. The transparent adhesive is suitable for craft applications or demanding DIY projects.

- ▶ 24 ml  
10000133

### Fast-Metal Minute Adhesive

improved formula

**High-temperature resistant | gap-filling | fast-curing**

2-component epoxy resin system for repairs and bonding where larger tolerances need to be bridged. High gap-filling capacity. Suitable for rough and poorly fitting surfaces. Fills cracks, cavities and uneven areas.

High temperature resistance up to +180 °C and extremely strong adhesion. Highly-filled, pasty, very short pot life and fast-curing. Allows for impact-resistant bonds with high tensile and impact strength.

- ▶ 24 ml  
10007785

### Aluminium Minute Adhesive

improved formula

**Resistant to high temperatures | pasty | high impact resistance**

For bonding aluminium and other light metals to each other. Can be used to fill cracks and holes (e.g. on aluminium housings) and to repair light alloy wheels.

Epoxy adhesive: resistant to high temperatures up to +180 °C, low-odour, two-components, aluminium-filled. Cures quickly at room temperature. Gap-filling and non-dripping (thixotropic) with very high tensile and impact strength.

## Epoxy Resin Systems

## Epoxy Adhesives

## Easy-Mix S 50

improved  
formula

**Resistant to high temperatures | extremely strong adhesion | very short pot life**

High-temperature resistant epoxy adhesive for fast repair and maintenance work. Perfect for industrial series production with short cycle times.

The adhesive offers high temperature resistance up to +180°C, extremely strong adhesion and high tensile strength. It is viscous, self-levelling, has a very short pot life and cures fast.

▶ 50 ml

10005230

Easy-Mix S 50 Set **NEW**

**Comprising:**

Easy-Mix S 50, Quadro Mixing Nozzle A, WEICON Manual Dispenser

▶ 50 ml

10102958

## Easy-Mix S 50 yellow

improved  
formula

**Visually identifiable casting compound | resistant to high temperatures | fast-curing | impact-resistant**

Highly reactive casting compound – can also be used as an adhesive owing to its high adhesive strength and short curing time. The epoxy resin system, which is resistant to high temperatures of up to +180 °C, is viscous, self-levelling, cures quickly and is impact-resistant in its hardened state. The casting compound has a short pot life of 4-5 minutes and adheres excellently to many different surfaces.

▶ 50 ml

10017543

## Easy-Mix N 50

improved  
formula

**Strong adhesion | viscous | long pot life**

2-component epoxy adhesive for manufacturing processes. Thanks to long pot life, highly suitable for production processes with time-delayed assembly and positioning sequences. Impact-resistant, shock-resistant, self-levelling, viscous and with high tensile strength after curing. Can be used on numerous materials such as metal, plastic, fibre composites, ceramics, glass, stone or wood.

▶ 50 ml

10005231

## Easy-Mix N 5000

improved  
formula

**Transparent | strong adhesion | short pot life**

Transparent 2-component epoxy adhesive for bonds where an attractive appearance is important. Strong adhesion, liquid and self-levelling. Pot life of approx. 17 minutes. Can be used on numerous materials such as metal, plastic, fibre composites, glass, stone or wood. Suitable for areas where an attractive appearance is crucial: production of design objects, furniture manufacturing, trade fair construction, shop fitting etc.

▶ 50 ml

10016374

## Easy-Mix Metal

UL-TESTED

improved  
formula

**High-temperature resistant | pasty | fast-curing**

Special 2-component epoxy resin system for bonding metal parts. Pasty, fast-curing and resistant to high temperatures up to +180 °C. Cures to form a viscoplastic and impact resistant bond with high tensile and impact strength. Especially suitable for bonding applications where larger tolerances need to be bridged.

## WEICON Easy-Mix Mixing and Dosing System

Thanks to the modern mixing and dosing system, all types can be cleanly and accurately dosed, mixed and applied automatically in just one step.

That way, a uniform quality and process safety is guaranteed in a production series.

Product advantages:

- ▶ ready for use
- ▶ dosing, mixing and application in just one working step
- ▶ tedious mixing by hand is no longer necessary, so no mixing and dosing mistakes are possible
- ▶ speedy in application
- ▶ faster cycle times in series production possible
- ▶ economical in use, as minimal material wastage

Information on the  
mixing and dispensing  
system can be

### WEICON Belt Repair-Kit

**Pasty | highly elastic, wear-resistant, impact- and abrasion resistant | high resistance to chemicals and pressure**

WEICON Belt Repair-Kit is a 2-component polyurethane system for the fast repair and coating of rubber surfaces.

It has a high curing speed, high elasticity and wear resistance, is impact-resistant and abrasion-resistant, and has a particularly high tear resistance. Thanks to its high mechanical strength, it is suitable especially for repairs on rubber and metal components, which are exposed to impacts, abrasion or vibrations.

The Belt Repair-Kit offers fast and easy processability. After just 30 minutes, the treated surface can already be sanded and smoothed.

The system is suitable for various applications, such as the repair and coating of conveyor belts, the repair of rubber coatings, for use as flexible wear protection, and for the fast repair of worn-out rubber surfaces.

In addition to the polyurethane system, the set comprises a primer for surface pre-treatment, and a spatula to spread the compound evenly.

In order to cover a broader application range, in addition to the classic 500 g working package, which needs to be mixed by hand, the product is also available as easy-to-use 540 g double cartridge.

### WEICON Belt Repair-Kit SF

**Pasty | fast curing | highly elastic | wear-resistant | impact- and abrasion-resistant | high resistance to chemicals and pressure**

WEICON Belt Repair-Kit SF is a fast curing 2-component polyurethane system. With high elasticity and wear resistance, it is impact-resistant and abrasion-resistant, and has a particularly high tear resistance. Especially suited for the fast and reliable repair of conveyor belts and for the repair and coating of rubber surfaces. Short processing time of two to three minutes. Loadable after one hour. Fully cured after three hours.

### Urethane 85 SF

High wear resistance | fast curing | pasty  
Shore hardness: A 85

WEICON Urethan 85 SF is a special, pasty polyurethane for coating and repairing rubber surfaces. For example, conveyor belts in industrial plants, in open-pit mining or in mines can be repaired with the polyurethane. Urethan 85 SF has a very high wear resistance.

It is free of solvents and is applied at room temperature. Before processing, the surface to be treated must be roughened thoroughly and then wetted with a special two-component primer (rubber primer), otherwise no adhesion to the surface will be developed. The processing time is two to three minutes. No additional heating is necessary for curing. Surfaces coated with Urethan 85 SF are loadable after one hour. Full curing is completed after three hours. A special primer is available for coating metal surfaces.

# Fast Reliable Strong adhesion

High-strength, fast-curing 2-component structural adhesives based on polyurethane with excellent adhesion to a broad range of materials. The high-viscosity formulation enables application even on vertical surfaces. The 2-component system also provides fast and controlled curing. This makes the adhesive bonding process virtually independent of layer thickness, humidity and ambient temperature.

The following materials can be bonded among themselves or to each other with a high tensile, shearing and impact strength:

- ▶ fibre composite materials (e.g. EP-GRP, UP-GRP, CFC, SMC and fibreglass)
- ▶ plastics (e.g. PVC, ABS, PMMA, PC and phenol)
- ▶ polyurethane, epoxies and polyester
- ▶ steel, aluminium and stainless steel
- ▶ wood, ceramic, etc.

WEICON Easy-Mix PU-90 / PU-240 / PU Crystal adhesives are characterised by the following properties:

- ▶ fast initial strength
- ▶ immediate adhesion even to vertical surfaces, no dripping, can be modelled
- ▶ high tensile, shear and impact strengths
- ▶ permanently elastic/impact resistant, low shrinkage
- ▶ for indoor and outdoor use
- ▶ resistant to weathering and chemicals
- ▶ can be sanded and painted after approx. 30 minutes
- ▶ neutral to materials
- ▶ temperature-resistant from -40°C to +125°C (-40 to +257°F)

## Easy-Mix PU-90

VIDEO

WEICON RK-1300/1500 are 2-component systems based on methacrylate, which cure fast at room temperature. Both systems are processed in the "no-mix" procedure, i.e. a mix of both components (adhesive and activator) is not necessary.

Polymerization starts as soon as the adhesive- and activator-wetted components are joined together.

Activator

Adhesive

Join together

## High strength | impact-resistant

RK-1300/1500 allow high-strength bonding of different materials:

- ▶ **metals (also coated), such as steel, aluminium, copper, zinc, alloys, as well as ferrites (ferromagnetic material)**
- ▶ **plastics\*, such as ABS, polystyrene, hard PVC, polycarbonate, polyphenylene oxide, polyester moulding compounds**
- ▶ **fibre composite materials (GRP, CRP, fibreglass etc.)**
- ▶ **wood and cellulose materials (e.g. MDF)**
- ▶ **glass, ceramics and stone**

\*Polyamide, Teflon® and polyolefin etc. only after special surface treatment, for example using fluoridation, low-pressure plasma, corona, flame impingement etc.

WEICON RK-1300/1500 feature special product-specific characteristics:

- ▶ **processing in the "no-mix" procedure**
- ▶ **quick and high initial bonding strength**
- ▶ **residual elasticity and impact resistance**
- ▶ **applicable at a large range of temperatures**
- ▶ **ageing-resistant**

As a result, there are numerous areas of application, in particular during assembly and in industrial processing.

Due to the "no-mix" procedure and the quick, high initial bonding strength, WEICON RK Construction Adhesives are especially suited for manufacturing processes with staggered assembly and positioning processes and high cycle times during serial production.

# High strength Residual elasticity Process-safe

High-strength, fast-curing structural adhesives on the basis of MMA (methyl methacrylate) with excellent adhesion to e.g. fibre composite materials, many plastics, metals and many other materials.

Due to its high viscosity the adhesive can also be applied on vertical surfaces.

The following materials can be bonded with high tensile, shear and peel strength:

- ▶ plastics (e.g. PVC, ABS, PMMA, fibre glass, phenol)
- ▶ polyurethane, epoxies
- ▶ steel, aluminium, stainless steel
- ▶ wood, ceramics and many others

WEICON Easy-Mix Structural Adhesives feature special product characteristics:

- ▶ high tensile, shear and impact strengths
- ▶ rapid strength build-up
- ▶ for indoor and outdoor use
- ▶ resistant to weather conditions and many chemicals
- ▶ sandable and paintable
- ▶ high temperature-resistance

WEICON Easy-Mix Structural Adhesives can be applied universally and are well-suited for the following areas of application:

- ▶ plastics engineering
- ▶ machine building
- ▶ model and mould construction
- ▶ metal construction
- ▶ electrical engineering
- ▶ car body and vehicle construction
- ▶ trade fair and exhibition

WEICON TOOLS®

Other

- ▶ transparent
- ▶ for low surface energy plastics  
**PP | PE | HDPE | LDPE | HDP**
- ▶ for small bonding gaps
- ▶ no pre-treatment necessary

# 1:1 System

Plastics such as PE and PP are used increasingly in nearly all industrial sectors today due to their specific properties such as mouldability, elasticity, break resistance, temperature and heat resistance. For the adhesive bonding of these plastics, until now, the surfaces needed to be extensively pretreated, for example:

- ▶ mechanically (grinding, blasting, etc.)
- ▶ chemically (fluorination)
- ▶ physically (flame treatment, corona, plasma)

With the adhesives WEICON Easy-Mix PE-PP 45 and PE-PP 50, these pretreatments are no longer necessary. The "integrated primer" in the adhesive activates the surfaces and makes high-strength bonds possible.

WEICON Easy-Mix PE-PP 45 and PE-PP 50 are 2-component construction adhesives based on methyl acrylate. They are particularly suitable for structural, high-strength bondings of low surface-energy plastics like PE, PP and TPE.

In addition, WEICON Easy-Mix PE-PP 45 and PE-PP 50 can be used as „universal adhesive“ for plastics like:

- ▶ rigid PVC (polyvinyl chloride)
- ▶ PC (polycarbonate)
- ▶ ABS (acrylonitrile-butadiene styrene)
- ▶ fibre-reinforced materials (GRP, CRP, fibre glass etc.)
- ▶ PMMA (Polymethyl methacrylate)

#### Characteristics:

- ▶ no pre-treatment of the parts to be bonded („integrated primer“)
- ▶ short pot life and processing time
- ▶ fast development of strength
- ▶ high final strength
- ▶ curing with residual elasticity
- ▶ ageing-resistant
- ▶ chemical-resistant
- ▶ pasty, non-drip

## AN IMPOSSIBLE BOND?

The challenge of bonding plastics

\*This information is dependent on the type of materials to be bonded and their respective properties. In case of porous materials or passive surfaces, such as chrome, nickel, etc. the Activator should be applied on both sides. (Bond lines of 0.15 mm to 0.25 mm in width have the highest stability).

WEICON TOOLS®

Other

## Threadlocking

- ▶ screws and nuts
- ▶ stud bolts

## Sealing of threaded pipes and fittings

- ▶ threaded connections
- ▶ hydraulic and pneumatic systems
- ▶ cooler and compressed air systems

## Retaining cylindrical assemblies

- ▶ shaft / hub-connections
- ▶ coupling hubs, pulleys, bearings
- ▶ cylindrical parts;  
slip-, press- or shrunk-fitted

## Flange sealing, gasketing

- ▶ flanges
- ▶ cases
- ▶ lids

WEICONLOCK are one-component anaerobic adhesives and sealants, especially made for metal assembly parts.

For different application areas, our broad range of various strengths and viscosities is available for you.

WEICONLOCK is suitable for all metals and certain plastics. It can be applied either manually or semi / fully automatically. As cost-effective problem solvers, WEICONLOCK products are indispensable in many sectors of industry:

- ▶ automotive industry
- ▶ engine and plant construction
- ▶ manufacture of pumps and pipes
- ▶ hydraulic and pneumatic equipment
- ▶ precision mechanics
- ▶ in electrical engineering and electro-technics and in nearly all fields of repair and maintenance

BAM tested and safety-related evaluated- according to leaflet M 034-1 "List of nonmetallic materials compatible with oxygen" (DGV information 213-075) of BG RCI

How do you choose the right threadlocker?

**WE explain:**

# Anaerobic Adhesives and Sealants

## WEICONLOCK Activator F

### Reduction of curing time

The cure time can be reduced considerably by pre-treatment with WEICONLOCK Activator F, which is recommended for all passive surfaces and which is indispensable at low ambient temperatures (+10°C/+50°F and below) and for large gaps. On non-metallic surfaces, WEICONLOCK is made effective by using the activator.

# WEICONLOCK® Threadlocking

Due to its low viscosity and high capillary action, it penetrates the thread interstices, without the connection having to be loosened beforehand. Ideal for pre-assembled screw connections.

AN 302-90

## AN 302-72

Locking of threads and stud bolts | high-temperature-resistant | DVGW- and drinking water approval

## Gasket Maker

### Permanently elastic special sealant

WEICON Gasket Maker is a strong and permanently elastic special sealant that cures with air humidity and practically without shrinkage. Gasket Maker has a very good adhesion to steel, aluminium, glass, ceramic, and many other materials.

Gasket Maker has an excellent temperature, oil and grease resistance, is pressure- and ageing-resistant, UV-stable and permanently elastic.

The special sealant can be used on engines and water pumps, gears and axles, oil sumps and in many other applications.

# Gasket Maker and Plast-o-Seal®

## Plast-o-Seal®

Permanently plastic universal sealant |  
solvent-free with no unpleasant odour |  
enables immediate assembly

### Features and advantages:

- ▶ for sealing the smoothly treated flanges of machine, gearbox and motor casing flanges
- ▶ can be used on hot and cold surfaces
- ▶ to improve the performance of both old and new gaskets made from paper, cork, felt etc.
- ▶ solvent-free – odourless
- ▶ remains permanently plastic, before and after assembly
- ▶ easy joint dismantling
- ▶ economical in use
- ▶ very good resistance to most fuels, mineral oils, water, air, coolant mixtures based on methanol and glycol, antifreezes, kerosene, fluorocarbon refrigerants etc.
- ▶ max. gap filling capability up to 0.10 mm (without a gasket)
- ▶ non-sag, can be applied to vertical surfaces
- ▶ temperature-resistant from -50°C to +200°C (-58 to +392°F); briefly up to +250°C (+482°F)
- ▶ compensates for manufacturing defects such as scoring and scratches and enables accurate assembly
- ▶ allows accurate assembly and construction with low tolerances
- ▶ no need to overtighten fixings during assembly
- ▶ non-corrosive
- ▶ contains no substances that disturb lacquer wettings (e.g. silicone)
- ▶ fluorescent blue colour

## Thread Sealing Cord DF 175

► plastic can 175 m  
10026655

- for metal and plastic threads
- in extreme temperature ranges between -200°C
- silicone-free
- is used in the area of solar applications
- tested up to 45° reverse rotation
- cost- and time-saving application
- BAM-tested\*

WEICON DF 175 is used

- for almost all sealing of plastic and metal threads
- for ducts and pipes in which extremely aggressive media are transported
- in connection with gaseous or liquid media, such as oxygen, propane, butane and many more
- in the area of drinking water
- in extreme temperature ranges between -200°C (-328°F) and +240°C (+464°F)
- in the area of solar applications
- wherever an unscrewing of the connection (tested up to 45°) without weakening of the sealing effect is required

BAM tested and safety-related evaluated, according to leaflet M 034-1 "List of nonmetallic materials compatible with oxygen" (DGUV information 213-075) of BG RCI

# Thread Sealing Cord and Threadlocking Varnish

## Threadlocking Varnish

**Fast-drying | non-conductive | excellent media resistance**

Threadlocking Varnish is a solvent-based, fast-drying securing and marking varnish with good adhesion to many materials.

The varnish serves as a removable lock, as protection against tampering by unauthorised persons, as a cover for electrically conductive parts and as protection against corrosion and influencing through contact.

The threadlocking varnish is resistant to water, petrol, diesel, mineral oil, paraffin oil and diluted acids and lyes. The threadlocking varnish is essential for locking screw connections of all kinds, protecting against manipulation and unauthorised loosening of screws and connections, documenting quality assurance measures, production control and product inspection through a varnish seal and also for the visual inspection of connected, adjusted parts.

Threadlocking varnish is available in the colours yellow, green and red.

## Cyanoacrylate Adhesives

WEICON Cyanoacrylate Adhesives are cold-curing 1-component adhesives, free of solvents. They quickly polymerise by reacting with moisture both on the surfaces to be bonded and from the air, and cure under light pressure.

They will bond within seconds almost all materials to and among each other, such as:

metals	plastics
glass	ceramics
wood	leather
natural and synthetic rubber	

When using WEICON Cyanoacrylate Adhesives, unlike in the case of welding and soldering, surfaces remain unaltered. No material stress occurs. Thus, more simple and rapid assembly is often possible, and auxiliary fixing devices are not necessary.

The resulting advantages are numerous:

- ▶ enormous time and, therefore, cost savings
- ▶ immediate processing of fixed parts possible
- ▶ high bond strength up to material fracture
- ▶ **clean and visually appealing bondings**

## 1-Component Adhesives and Sealants

# Cyanoacrylate Adhesives

VA 20

**Cyanoacrylate Adhesive for rubber and plastics | low viscosity | very fast curing | ISEGA-certified**

WEICON Contact VA 20 has low viscosity (< 20 mPa•s) and cures very quickly.

VA 20 is suited for the bonding of rubber and plastics and also for precisely fitted metal/ plastic joints.

VA 8312

**Cyanoacrylate Adhesive for rubber and plastics | low viscosity | very fast curing | ISEGA-certified**

WEICON Contact VA 8312 has low viscosity (20- 40 mPa•s) and cures very quickly. VA 8312 is suited for the bonding of various rubber materials such as solid rubber or cellular rubber, plastics and EDPM elastomers. The adhesive is certified by the ISEGA research and evaluation company and can be used as an adhesive in the food technology.

In combination with WEICON CA-Primer, VA 8312 can also be used for polyolefines (PEpolyethylene, PP-polypropylene). In combination with WEICON Contact Filler\*, VA 8312 is suited for the instant bonding and filling of cracks, clefts, holes and uneven surfaces.

## VA 8406

**Cyanoacrylate Adhesive for rubber and plastics | ISEGA-certified | low viscosity | very fast curing**

WEICON Contact VA 8406 has low viscosity (20-50 mPa•s) and cures very quickly. It is suited for the fast fixing and bonding of various rubber materials such as solid rubber or cellular rubber, plastics and EPDM elastomers requiring quick fixing.

The adhesive is certified by the ISEGA research and evaluation company and can be used as an adhesive in the food technology. In combination with WEICON CA-Primer, VA 8406 can also be used for polyolefines (PE-polyethylene, PP-polypropylene) and for PTFE and silicones.

▶ 60 g 10019785	▶ 500 g 10000226	

## VA 110

**Cyanoacrylate Adhesive for special requirements | medium viscosity | longer curing | drinking water approval**

The special feature of the product is its NSF registration in accordance with ANSI Standard 61 - Drinking Water System Components. Thus, VA 110 also meets the highest standards and can be used in sensitive areas such as in the pharmaceutical industry, in the manufacturing of cosmetics, in the food industry, in the manufacturing of toys or jewelry industry.

Due to its special formula and the resulting NSF registration, VA 110 can contribute towards improvements in occupational safety and health protection.

## 1-Component Adhesives and Sealants

# Cyanoacrylate Adhesives

## VA 1401

Nonfood Compounds  
Program Listed S4  
Registration 162959

**Cyanoacrylate Adhesive for rubber and plastics | medium viscosity | fast curing | NSF approval**

WEICON Contact VA 1401 has medium viscosity (100-150 mPa•s) and cures quickly. It shows good results on fabric, paper, cardboard, cartons, foam rubber and large-pored elastomers. VA 1401 is a universal type for the bonding of metals, plastics and rubber, both to themselves and among each other.

- |                     |                    |                    |

## VA 300

**Cyanoacrylate Adhesive for rubber and plastics | higher viscosity | longer curing**

WEICON Contact VA 300 has a higher viscosity (200-300 mPa•s) and a longer curing time. It is particularly suited for absorbent and porous products such as wood, cork, leather and ceramics.

VA 300 is also suited for the bonding of metals, plastics and rubber, both to themselves and among each other.

- |                     |                    |                    |

## Contact GEL

**Cyanoacrylate Adhesive for special requirements | pasty (highly thixotropic) | very slow-curing = position correction**

Contact Gel is pasty (highly thixotropic; 60000-90000 mPa•s) and cures very slowly. By using WEICON Activator Spray, the curing time can be reduced.

WEICON Contact Gel is suited for porous surfaces and higher tolerance gaps and can be used on vertical surfaces. Positioning is also possible after the parts have been joined.

WEICON Contact Gel is suited for the bonding of the most diverse products.

WEICON Contact Gel can be used both in the hobby sector and in model building. It can also be used in many different industrial applications.

**VA 2500 HT**

**Cyanoacrylate Adhesive for special requirements | high-temperature-resistant | high viscosity | slow curing | residual elasticity after curing | high peel and impact resistance**

WEICON Contact VA 2500 HT is highly viscous (2000-3000 mPa•s) and temperature-resistant between -50°C (-58°F) and +140°C (+284°F). It hardens slowly with residual elasticity and has high peel and impact strength.

Thanks to its curing with residual elasticity, WEICON Contact VA 2500 HT is particularly suitable under changing climatic conditions. It is insensitive even under a longer influence of humidity. VA 2500 HT is suited for the bonding of the most diverse rubber materials and plastics and also for metal/plastic joints.

## VA 30 Black

**Cyanoacrylate Adhesive for special requirements | rubber-filled | high-temperature-resistant | medium viscosity | longer curing | residual elasticity after curing | high peel and impact resistance**

WEICON Contact VA 30 Black has medium viscosity (300 mPa·s) and is temperature-resistant between -50°C (-58°F) and +140°C (+284°F). It has a longer curing time, is rubber-filled and black, hardens with residual elasticity and has high peel and impact strength. Thanks to its curing with residual elasticity, WEICON Contact VA 30 Black is particularly suitable under changing climatic conditions.

It is insensitive even under a longer influence of humidity. VA 30 Black is ideally suited for the bonding of diverse rubber materials such as solid rubber or cellular rubber, plastics and metal/plastic joints.

### VA 1408

**Cyanoacrylate Adhesive for special requirements | low viscosity | very fast curing | low odour and “blooming”**

WEICON Contact VA 1408 has a low viscosity (20-40 mPa•s) and a reduced “blooming” effect. It cures quickly, is low in odour when processing and less susceptible to moisture effects after curing.

The product is suited for the clean and visually attractive bonding of the most diverse products. WEICON Contact VA 1408 can be used in numerous industrial applications.

### VA 1460

**Cyanoacrylate Adhesive for special requirements | medium viscosity | longer curing | low odour and “blooming”**

VA 1460 has a medium viscosity (120-200 mPa•s) and a reduced “blooming” effect. It cures less quickly, is low in odour when processing and less susceptible to moisture effects after curing.

WEICON Contact VA 1460 is suited for the bonding of the most diverse products. The product can be used in numerous industrial applications.

### VA 1403

**Cyanoacrylate Adhesive for special requirements | high viscosity | slow-curing | low odour and “blooming”**

WEICON Contact VA 1403 is highly viscous (1100-1800 mPa•s), low in odour when processing and has a reduced “blooming” effect. It cures slowly and is less susceptible to moisture effects after curing.

VA 1403 is suited for the clean and visually attractive bonding of various products.

## VM 20

**Cyanoacrylate Adhesive for metals | low viscosity | very fast curing**

WEICON Contact VM 20 has a low viscosity (20-40 mPa•s) and cures very quickly. It is suited for all types of metal bonds, especially for the bonding of precisely fitted parts in serial production.

VM 20 can be used in the metalworking industry, in machine construction, in housing and apparatus engineering and in many other applications.

- ▶ 30 g      ▶ 60 g      ▶ 500 g
- 10019853   10019857   10000254

## VM 120

**Cyanoacrylate Adhesive for metals | medium viscosity | slower curing, a short-term re-alignment of parts is possible**

WEICON Contact VM 120 is suited for all types of metal bonds.

WEICON Contact VM 120 can be used in the metalworking industry, in machine construction, in housing and apparatus engineering and in many other applications.

- ▶ 30 g      ▶ 60 g      ▶ 500 g
- 10019859   10019863   10000262

## VM 2000

**Cyanoacrylate Adhesive for metals | high viscosity | slow curing, allows realignment of parts**

WEICON Contact VM 2000 is highly viscous (1700-2000 mPa•s) and cures slowly, which enables realignment of the bonded parts.

VM 2000 is suited for all types of metal bonds and can also be used on absorbent and porous products.

CA-Activator Spray PS

### CA-Activator Spray PS

The CA-Activator Spray PS accelerates the curing of WEICON Contact Cyanoacrylate Adhesives. It can be applied both before and after the bonding process. The activator enables a quick fixation; however, it can also be used to allow excess adhesive to cure.

When applied to absorbent and porous surfaces, such as wood, foam etc., and all chemically treated surfaces, such as electrogalvanised metal etc., the activator's effectiveness lasts approx. one minute. On non-absorbent surfaces, the activator's effectiveness lasts up to approx. 12 hours.

The pump spray head ensures that the surfaces to be bonded are wetted evenly and precisely with the activator. Use is recommendable with highly viscous WEICON Contact types, large layer thicknesses, absorbent and porous surfaces, passive materials (alkaline surfaces, e.g. galvanised metal parts) and in unfavourable environmental conditions (low temperatures, too low humidity < 30 %).

### Contact Primer for Polyolefines

Without pre-treatment, many plastics are unable to bond or bond only under certain conditions. When these plastics are pre-treated with WEICON Contact Primer, their surface structure changes. Thereby the joining of plastics, like polyethylene (PE) and polypropylene (PP) belonging to the polyolefine group, which are usually difficult to bond, is made possible. Even modern thermoplastic elastomers (TPE), PTFE and related plastics as well as silicones, can be bonded when pre-treated with WEICON Contact Primer.

### CA-Activator

The activator speeds up the curing process of WEICON Cyanoacrylate Adhesives. When applied to absorbent surfaces, like wood or foam etc., and all chemically-treated surfaces, such as zinc-galvanized metals etc., the activator's effectiveness lasts approx. one minute. With non-absorbent surfaces, the activator's effectiveness lasts up to approx. 12 hours.

Due to its special formula and the resulting NSF registration, CA-Activator Spray and CA-Activator Spray AC can contribute towards improvements in occupational safety and health protection.

### CA-Remover

Breaks down and removes all types of cyanoacrylate adhesives. Suitable for cleaning metal parts, tools and many different surfaces that have come into contact with cyanoacrylate adhesives.

- ▶ 30 ml  
10051358

Use is recommendable with:

- ▶ highly viscous WEICON Contact types
- ▶ large thickness of the adhesive layer
- ▶ absorbent and porous surfaces
- ▶ passive materials (alkaline surfaces, like for example zinc coated metal parts).
- ▶ disadvantageous environmental conditions (low temperatures, too low air humidity < 30%)

# Elastic Adhesives and Sealants

## Elastic Adhesives / Sealants

Today, elastic adhesives and sealants are used in many areas of industrial production and assembly. They combine the advantages of adhesive bonding and sealing technology and are used wherever the elasticity and the sealing of a joint are the most important requirements.

Nonfood Compounds  
Program Listed (Category Code)  
(Registration #)

### Surface pre-treatment

Most materials can be bonded well to themselves and among each other. For certain materials or extreme requirements, we recommend the use of an adhesion agent (primer).

A mechanical surface pre-treatment, e.g. sanding or sandblasting, can considerably improve the adhesion.

80%

LESS  
PLASTIC

compared to conventional plastic cartridges

Sustainable packaging as an alternative to plastic cartridges

With the Green Tube, we wanted to develop a real alternative to conventional sealant and adhesive cartridges, as these cannot be recycled after use due to product residues. Because of these residues, plastic cartridges are usually incinerated – and this additionally generates large amounts of climate-damaging CO<sub>2</sub>.

The focus of our innovation: avoiding plastic waste by significantly reducing the proportion of plastic by 80 %. The cartridge casing is made of 100 % cardboard, which can be recycled after use.

The proportion of components that cannot be recycled has been reduced to a minimum. And that's not all: our cardboard cartridge produces 53 % less CO<sub>2</sub> emissions in the manufacturing process than a standard PE cartridge.

## Many advantages

The new WEICON Green Tube can be used with any standard cartridge gun and offers many advantages. Thanks to the tube-shaped bag, the shelf life of the product is extended by more than six months compared to PE cartridges – and this is achieved without any compromises in product quality or user-friendliness.

## Easy to use

## Simple disposal

PLASTIC  
RECYCLING\*RESIDUAL  
WASTEPAPER  
RECYCLING

\* If the hardened product residue has been removed, the lid and tip can be disposed of as plastic waste for recycling. If the product residue has not been removed, the lid and tip must be disposed of as residual waste.

# INNOVATION

## Ergo Connect for Presspack

Ergonomic dosing tip for WEICON Presspack products.

The optimised angle geometry ensures fatigue-free working even over longer periods of time. The two-way thread enables an application radius of 180°. Compatible with WEICON dosing tips and brush top.

## ERGONOMIC handling

## 180° APPLICATION thanks to two-way thread

## IDEAL ANGLE for perfect applications

## SAFE AND FLEXIBLE

### Flex 310 M® Classic

**Suitable for universal use | ISEGA-certified**

WEICON Flex 310 M Classic Adhesive and Sealant is strong, paintable (wet-on-wet), sandable, has outstanding ageing stability and good resistance to UV rays. It is resistant to freshwater and salt water and is free of silicone, isocyanate, halogens or solvents.

The product has an ISEGA certificate and can be used as an adhesive in food technology. Flex 310 M Classic is an elastic adhesive on MS polymer basis and is suitable for the bonding of metals, many plastics, ceramic, wood, glass and stone. WEICON Flex 310 M Classic can be used in metal construction, tank and apparatus engineering, carriage, vehicle and container construction, ventilation and air conditioning systems, in the electrical industry, yacht and boat construction and in all applications where silicones or products containing silicones are not suitable.

### Flex 310 M® Crystal

**Crystal-clear curing | ISEGA-certified**

WEICON Flex 310 M Crystal adhesive and sealant is transparent, strong, paintable (wet in wet), sandable, has outstanding ageing stability and good resistance to UV rays. It contains no silicone, isocyanate, halogens or solvents.

WEICON Flex 310 M Crystal has an ISEGA certificate and can be used as an adhesive in food technology.

WEICON Flex 310 M Crystal is an elastic adhesive on MS polymer basis and is suitable for the bonding of glass, PC\*, PMMA\* and acrylic glass\*, metals, many plastics, ceramics, wood and stone. The product is crystal clear after curing and is particularly suited for elastic joints where the adhesive should or must not be visible.

Flex 310 M Crystal can be used in plastic processing, metal construction, tank and apparatus engineering, in ventilation and air conditioning systems, the electrical and lighting industry, in exhibition stand construction and shopfitting and in all applications where silicones or products containing silicones are not suitable.

\* = Only tension-free bonding

## Flex 310 M® F1X

**Strong adhesion | universally applicable | isocyanate-free**

WEICON Flex 310 M F1X is an elastic adhesive and sealant based on MS polymer. The grey adhesive is very strong and universally suitable for permanently fixing almost all materials to a variety of surfaces. Thanks to the very high initial adhesion, bonding is possible on vertical surfaces and even overhead, both indoors and outdoors. For example, Flex 310 M F1X can be used to bond metals, many plastics, ceramics, wood, glass and stone to each other.

The permanently elastic adhesive can be painted over "wet on wet", is sandable, weather-resistant, moisture-resistant, ageing-resistant, mould-resistant and UV-resistant. It is briefly (\*up to 30 minutes) resistant to temperatures up to 180°C and can be powder-coated after a curing time of four days.

The adhesive and sealant is free of silicone, isocyanates, halogens and solvents and is non-corrosive. Flex 310 M F1X can be used for fixing skirting boards, acoustic panels, strips, frames, panels, boards, tiles, stones and EPDM foil. It can be used in drywall and interior construction, metal construction, tank and apparatus construction, container construction, ventilation and air conditioning technology, trade fair and shop construction, yacht and boat building and wherever silicones or products containing silicone are not suitable.

## Flex 310 M® Stainless-Steel

**For stainless steel, aluminium and non-ferrous metals | ISEGA-certified**

WEICON Flex 310 M Stainless-Steel Adhesive and Sealant is non-corrosive, strong, paintable (wet-on-wet), sandable, resistant to ageing and UV rays and is free of silicone, isocyanate, halogens or solvents. WEICON Flex 310 M Stainless-Steel is an elastic adhesive on MS polymer basis and is suitable for bonding and sealing of seams and joints on metals such as stainless steel, aluminium and non-ferrous metals. Flex 310 M Stainless-Steel can also be used in all application fields where the colour of the adhesive and sealant must match the surface material (e.g. stainless steel, aluminium, etc.).

WEICON Flex 310 M Stainless-Steel can be used in metal construction, tank and apparatus engineering, food industry, in kitchen and sanitary installations, ventilation and air conditioning systems, and in all applications where silicones or products containing silicones are not suitable.

## Flex 310 M® HT 200

**High-temperature-resistant**

The high temperature resistance makes it possible to bond and seal components needing to be subsequently thermal-coated (powdercoated).

WEICON Flex 310 M HT 200 can be used in metal construction, tank and apparatus engineering, in ventilation and air conditioning systems, carriage, container, wagon and vehicle construction.

Flex 310 M HT 200 has been tested in accordance with DIN EN 45545-2 R1, R7, R17 HL3 and fulfils the requirements for rail vehicles. WEICON Flex 310 M HT 200 adhesive and sealant is highly temperature-resistant, has outstanding ageing resistance, and is free of silicone, isocyanate, halogens or solvents.

## MS-Polymers

### Flex 310 M® Liquid black

**Liquid | self-levelling | ISEGA-certified**

Flex 310 M Liquid black is a self-levelling, 1-component casting and coating mass based on polyoxypropylene. The product is permanently elastic and paintable after curing. The flexible adhesive and sealant cures odourless, is resistant to weather and UV rays, has an excellent resistance to ageing and is free of silicone.

Flex 310 M Liquid black can be used in diverse applications for the bonding and sealing of many different materials such as metals, many plastics, ceramics, wood, glass or stone and for insulation and impregnation.

The flexible adhesive and sealant can also be used in other industrial areas, such as in tank and apparatus construction, in car bodywork, container and vehicle construction, in pipeline and fittings construction, in the energy and electrical industries, in sound insulation and insulation technology and in plastics technology.

### Flex 310 M® 2 K

**Fast-curing**

The WEICON Flex 310 M 2 K Adhesive and Sealant is very strong, non-corrosive, paintable (wet in wet), sandable, weather-resistant, resistant to UV rays and is free of silicone, isocyanate, or solvents.

Flex 310 M 2 K is a strong 2-component system on a hybrid polymer basis which enables fullsurface bonding of larger parts and which can be used to fill gaps of up to ten millimetres. It is suitable for the bonding of almost all materials such as metal and many plastics.

WEICON Flex 310 M 2 K can be used in metal construction, tank and apparatus engineering, machine and system construction, in the furniture industry, in ventilation and air conditioning systems, in the electrical industry, yacht and boat construction and in all applications where silicones or products containing silicones are not suitable.

**Speed-Flex®**

**Replaces traditional fixings | ISEGA-certified**

WEICON Speed-Flex is very strong, pasty, stable, paintable (wet-on-wet), resistant to ageing, weathering, and UV rays and is free of silicone, isocyanate and halogen. WEICON Speed-Flex has an ISEGA certificate and can be used as an adhesive in foodstuff technology.

WEICON Speed-Flex is an adhesive on MS polymer basis with extremely strong initial strength and is suitable for the bonding of metals, many plastics, ceramics, wood, glass and stone.

Speed-Flex replaces traditional fixings such as screws, pegs, rivets, etc. The very high initial strength makes bonding possible even on vertical surfaces in indoor and outdoor areas. WEICON Speed-Flex can be used for drywall and interior work, metal construction, tank and apparatus engineering, in ventilation and air conditioning systems, in exhibition stand construction and shopfitting and in all applications where silicones or products containing silicones are not suitable.

**Speed-Flex® Crystal**

**Crystal-clear adhesion | ISEGA-certified**

Speed-Flex Crystal is a quick-acting, strong and general-purpose power adhesive on MS polymer basis.

Due to its crystal-clear curing properties, Speed-Flex Crystal is particularly suitable in areas which should remain visually appealing, where no adhesive seam should be visible. Thus e.g. transparent plastics, acrylic glass or other materials can be connected quickly, cleanly and reliably.

**Windscreen Adhesive**

**Elastic 1-C adhesive and sealant for mounting glass and window panes | ISEGA-certified**

WEICON Windscreen Adhesive is an elastic 1-C adhesive and sealant based on MS-Polymer, which is specially designed to mount glass and window panes. For example, the adhesive bonds windscreens, rear windows and side windows in powered industrial trucks, agricultural machines, and construction machines. It is also suitable for furniture manufacture or for installations in gardening and landscaping.

Windscreen Adhesive provides high adhesive strength on many materials and cures with air humidity. The adhesive shows excellent ageing resistance and good UV stability. It is joint-filling, odourless, and free of silicones, isocyanates, halogens, and solvents.

### Natural Stone Adhesive **NEW**

**Fast | strong adhesion | for indoor & outdoor use**

WEICON Natural Stone Adhesive is a strong adhesive for fixing natural stone, stone and ceramics. Thanks to its very high initial adhesion and rapid build-up of adhesive strength, bonding is even possible on vertical surfaces such as walls. The stone adhesive is suitable for many indoor and outdoor applications. It is frost-proof, has a high temperature resistance of -40°C to +90°C as well as high weather and UV resistance. The Natural Stone Adhesive hardens quickly and has a very high final strength. After curing, the adhesive can be sanded and remains elastic to compensate for movements. The stone adhesive is silicone-free, isocyanate-free, halogen-free and solvent-free.

It can be used in a wide variety of applications, e.g. for bonding window sills, tiles, skirting boards, decorative mouldings or stair treads. WEICON Natural Stone Adhesive adheres very well to a wide variety of materials, such as wood, wood-based materials, plastics, metals, glass and mineral substrates. It is available in grey and white.

## Aqua-Flex

### Ideal for wet and moist surfaces | ISEGA-certified

WEICON Aqua-Flex Adhesive and Sealant is strong, has outstanding ageing stability, and is resistant to weathering, UV rays, freshwater and salt water. It is free of silicone, isocyanate, halogens or solvents. Aqua-Flex has an ISEGA certificate and can be used as an adhesive in foodstuff technology.

WEICON Aqua-Flex is an elastic adhesive and sealant on MS polymer basis for wet and damp substrates. It is suitable for the bonding of numerous materials such as metal, plastic, ceramics, wood, glass and stone.

Aqua-Flex can be used for pipeline and cable work, tank and apparatus engineering, in ventilation and air conditioning systems, gardening and landscaping, in sanitary installations and in all applications where silicones or products containing silicones are not suitable.

## Recoating behavior of 1-Component Elastic Adhesives and Sealants (MS polymers and polyurethanes)

WEICON MS polymers and polyurethanes are basically free of substances which are harmful to the coating composition, such as silicone, and can thus be "recoated".

Various paints and varnishes are widely available, for example:.

- ▶ alkyd resin
- ▶ acrylate resin
- ▶ nitrocombil
- ▶ polymerisate resin paints
- ▶ polyurethane varnishes (DD varnishes)
- ▶ epoxy resin lacquer
- ▶ polyester lacquer

Except for the above-mentioned alkyd resins, all systems are generally suitable. However, in order to test the compatibility with our products, a suitability in preliminary tests must always be determined individually under the respective practical conditions. Due to the different compositions and the diversity of the substrates, this is essential.

It also must be taken into account that not only the immediate first paint layer or lacquer layer, but also all possible intermediate lacquers or top lacquers, have an effect on the bonding and / or sealing.

WEICON polyurethanes:

- ▶ Flex 310 PU
- ▶ Fast-Bond

Painting only after complete curing with suitable colour coating systems.

WEICON MS-polymers

- ▶ Flex 310 M® in the versions: Classic, Crystal, Stainless-steel, Liquid, Super-Tack, HT 200, 2 K
- ▶ Flex+bond®
- ▶ Solar-Flex®, Aqua-Flex®, Speed-Flex®

Recommendation:  
Directly wet-on-wet, but at the latest within three hours after application of the material. During this period the best adhesion values are achieved. If the adhesive bead is fully cured, pre-treatment should be carried out with e.g. primers (as in the case of plastic coatings).

In general, it must be considered that the curing of the adhesives and sealants is not prevented by a color coating, but will be slowed down.

## Silicone A

### Acetoxycuring | fungicidal

WEICON Silicone A Adhesive and Sealant contains no solvents, is acetoxycuring, strong, permanently elastic, resistant to ageing and chemicals, temperature-resistant up to +200°C (+392°F), extremely elastic (breaking elongation >500%) and can be used universally. Silicone A adheres very well to steel, aluminium, glass, ceramics, and many additional materials.

WEICON Silicone A can be used in machine and system construction, ventilation and air conditioning systems, in the energy and electrical industry, in exhibition construction and shopfitting and in many additional industrial applications.

## Silicone LP

### Acetoxycuring | drinking water approval

WEICON Silicone LP is an acetoxycuring and permanently elastic adhesive and sealant. It is resistant to chemicals, ageing, weathering and UV radiation as well as to temperatures up to +180°C (+356°F).

It adheres very well to steel, aluminium, glass, plastics and many other materials. Silicone LP was developed specially for use in sensitive areas. It can be used as sealant in the food and drinking water sector, for example in dairies, slaughterhouses, in the food and beverage production or in canteen kitchens.

## Silicone F

**Liquid | self-levelling | neutral curing**

WEICON Silicone F Casting and Sealing compound is liquid, self-levelling, spreadable, free of solvents and neutral curing. It is resistant to weathering and ageing, temperature-resistant up to +180°C (+356°F), extremely elastic (breaking elongation of approx. 370%) and can be used universally.

Silicone F can be specially used for elastic bonds, insulation and impregnation and even for the sealing and casting (max. 10 mm) of technical components. It adheres well to steel, aluminium, glass, ceramics, and many additional materials.

Silicone F can be used in machine and system construction, in plastic processing, the energy and electrical industry, in exhibition construction and shopfitting and in many additional industrial areas.

## HT 300

**High-temperature-resistant | acetox curing**

WEICON HT 300 Adhesive and Sealant is red, high-temperature-resistant (+300°C/+572°F), free of solvents, strong and acetox curing. It is resistant to weathering, ageing and chemicals and is extremely elastic (breaking elongation of approx. 300%). HT 300 is particularly suitable for heat-exposed bonds and seals and adheres very well to steel, aluminium, glass, ceramics and many additional materials.

HT 300 can be used in industrial furnaces, flue gas systems, heating installations, exhaust gas routing, heating cabinets and in many additional areas.

Possible primers:	see primer selection table on page 137	see primer selection table on page 137	see primer selection table on page 137	see primer selection table on page 137	see primer selection table on page 137

\*2 For easier processing, the cartridges, tubes, etc. should be heated to room temperature (+20°/+68°F) before use at low temperatures.

\*3 Normal climate +23°C (+73°F) and 50% relative humidity.

\*4 Material combination aluminium/aluminium, cleaned and degreased with Cleaner S, 1 mm layer thickness, 10 mm per minute tearing speed, fast-bond beech/beech, without pre-treatment, 1 mm layer thickness, 5 mm per minute tearing speed.

\*5 The WEICON One-Component Adhesives and Sealants listed above are free of substances that hinder the coating of lacquer, e.g. silicone. Thanks to the special composition, these can be painted over with suitable paint coating systems (no alkyd resin paints). However, to check the compatibility, suitability must always be determined individually in preliminary tests under the respective real-life conditions. This is essential due to the different compositions and the diversity of the substrates. The curing of the adhesives and sealants is only slightly delayed by a coating of paint.

\*\* Protect against UV back radiation

\*2 Protect from UV radiation

Primer M 100: For pretreating non-absorbent surfaces, e.g. metals, plastics, painted surfaces, enamels, ceramic and coated glass.

Primer K 200: For pretreating non-absorbent and painted plastic surfaces and elastomers, e.g. EPDM.

Primer S 300: For pretreating porous and absorbent surfaces.

Primer P 400: For pretreating polyolefins, e.g. PE, PP and difficult-to-bond elastomers.

Primer E 500: For pre-treating silicones.

## Assembly Adhesive

**Strong adhesion | universally applicable |  
for indoor & outdoor use**

WEICON Assembly Adhesive is a strong dispersion acrylic adhesive for assembly, repair and touch-up work.

The adhesive has a high initial adhesion and final strength and cures rapidly. After drying, the Assembly Adhesive can be sanded and plastered over and can be painted over with commercially available paints and varnishes. The adhesive is temperature-resistant in a range from -20°C to +80°C and is suitable for both indoor and outdoor applications. The white flexible adhesive is low-emission and free from solvents.

The Assembly Adhesive is universally applicable and can be used for a wide variety of applications. It is ideal, for example, for surface bonding of wood-based materials (such as skirting boards, decorative mouldings, panels or chipboard), PVC, polystyrene, polystyrene foam boards, PU rigid foam (e.g. insulation boards and cable ducts), mineral materials (e.g. tiles) and metals on absorbent substrates such as plaster, concrete, fibre cement, plasterboard and untreated wood.

# Elastic Adhesives and Sealants

## WEICON Primer M 100

► 250 ml 10023566  
► 25 ml 10060606

For pre-treating non-absorbent metal surfaces (aluminium, steel, stainless steel, brass, copper, zinc, tinplate), plastics (ABS, rigid PVC, PA 6.6, FRP, SMC, PUR), lacquered surfaces, enamel, ceramic, and glass.

## WEICON Primer K 200

► 250 ml 10023567  
► 25 ml 10060609

For pre-treating non-absorbent and lacquered surfaces, plastic materials (ABS, rigid PVC, PA 6.6, FRP, SMC, PUR), metals (aluminium, steel, stainless steel, brass, zinc, tinplate) and elastomers (EPDM).

## WEICON Primer S 300

► 250 ml 10023568  
► 25 ml 10060610

For pre-treating absorbent and/or porous surfaces, like e.g. uncoated hardboards and plasterboards.

## WEICON Primer P 400

► 250 ml 10023569  
► 25 ml 10060612

For pre-treating non-absorbent low-energy surfaces, like e. g. plastics (PE, PP, TPE) and elastomers (EPDM).

## WEICON Primer E 500

► 250 ml 10035220  
► 25 ml 10060616

Especially for silicone - for pre-treating non-absorbent surfaces such as aluminium, VA steel, brass, copper, zinc, tinplate and enamel, ceramic and glass as well as plastics such as ABS, PVC hard, PA6.6, GFC etc.

## Primer Applicator

10032350

For application of WEICON Primer.

## Primer

### Bonding agent

Even without the use of a primer, WEICON Elastic Adhesives and Sealants (on the basis of MS and hybrid polymers) achieve good bonding results on most material surfaces.

## Smoothing Agent

### Simple smoothing of many sealants

The Smoothing Agent is a transparent mixture of non-ionic surface activators. Applying it makes it possible to easily and cleanly smooth off all WEICON Elastic Adhesives and Sealants such as silicone, MS polymers, polyurethane, etc. prior to skin formation.

## Instructions

For an optimum result, the surfaces to be bonded must be clean (Surface Cleaner), dry and as smooth as possible. The processing temperature should be above +10°C (+50°F).

Mounting Tape is not suitable for wallpapers or other sensitive surfaces. A removal of the tape may cause damage to the substrate.

### Transparent

**Moisture-resistant | UV-resistant | strong**

- ▶ load bearing capacity 80 kg/m
- ▶ 19 mm x 3 m (width x length)
- ▶ core size 40 mm

WEICON Mounting Tape Transparent is a double-sided, highly transparent adhesive tape made of pure acrylate adhesive. The tape is particularly suitable for visually demanding structural joints where transparent components need to be bonded permanently both for indoor and outdoor use.

The transparent adhesive tape adheres firmly and securely to almost all smooth surfaces, such as glass, plastics, steel, aluminum, or tiles. The tape works in a temperature range of -40°C to +160°C (-40°F to +320°F) and is UV- and moisture-resistant. In combination with WEICON Adhesives and Sealants, it can be used as a fixing aid for hybrid bonding and ensures the secure positioning of the parts to be bonded.

Mounting Tape Transparent can be used in many different sectors, such as the advertising technology, fair and exhibition construction, kitchen and furniture construction, the caravanning sector, car body and vehicle construction, metal construction and in the electronics industry.

# Mounting Tape

## Grey

**Extremely strong adhesion | for smooth surfaces | high flexibility**

- ▶ load bearing capacity 85 kg/m
- ▶ 19 mm x 3 m (width x length)
- ▶ core size 40 mm

Mounting Tape Grey is a strong, double-sided adhesive tape made of modified acrylic foam. The tape is particularly suitable for the bonding of low-energy plastics, such as PE and PP, as well as for powder-coated surfaces. In combination with WEICON adhesives and sealants, it can be used as a fixing aid for hybrid bonding.

The high flexibility of the tape perfectly compensates tensions when bonding around corners. Mounting Tape Grey has a temperature resistance of -40°C to +120°C (-40°F to +248°F), is UV- and moisture-resistant and suitable for permanent joints both indoors and outdoors.

Mounting Tape Grey can be used in a variety of applications in many sectors, such as car body and vehicle technology, caravanning, metal and apparatus engineering, electronics, mechanical engineering, advertising, shipbuilding and marine technology.

VIDEO

## Spacing Tape **NEW**

**Fixing aid for hybrid adhesives | strong adhesion | for indoor and outdoor use**

The grey spacing tape was specially designed for use in hybrid bonding applications. In such bonding applications, the components to be bonded are secured using two materials – an adhesive and a tape. The strong-adhesion spacing tape, made from modified acrylic foam, acts as a fixing aid for the component to be bonded in this type of application. It holds the component in place until the adhesive, which is intended to permanently secure it, has hardened and reached its full adhesive strength. The tape can be used wherever a defined bonding gap of 3 mm (or more) is required – for example, in applications and coatings using WEICON Plastic Metal. It is also suitable for thick-layer bonding of elastic adhesives and sealants. The spacing tape is highly flexible and adapts perfectly to the surfaces to be bonded. It can be used for permanent bonding both indoors and outdoors. The closed-cell adhesive tape has a high elongation at break of 650%, a temperature resistance from -40 °C to +120 °C and is resistant to UV and moisture.

# Contact adhesives for bonding rubber and metal

## WEICON CONTACT ADHESIVES

### What are contact adhesives?

Contact adhesives belong to the group of physically setting adhesives. These are adhesives that cure without a complex chemical reaction. The adhesive is activated and cures simply by the solvent flashing off. In contrast, with chemically setting adhesives, the adhesive is formed by the chemical reaction of polyaddition, polycondensation or polymerisation.

With the GMK (rubber-metal) adhesives, WEICON offers contact adhesives as 1-component (GMK 2410) and 2-component (GMK 2510) version.

### What are contact adhesives used for?

Contact adhesives are needed wherever high initial strength is required and the bond should be permanently elastic and moisture-resistant.

WEICON GMK Adhesives are preferably used for the bonding of rubber materials to each other and to metal surfaces.

## GMK 2510

### Strong | permanently elastic | temperature-resistant

GMK 2510 is a 2-component adhesive based on polychloroprene for full-surface and permanently elastic bonding of parts which are continuously exposed to dynamic loads. The advantage compared to 1-component contact adhesives is the considerably better adhesion and the improved temperature resistance.

GMK 2510 bonds rubber, metal, textiles, leather, sponge rubber (neoprene), CSM (Hypalon), insulating materials, PU materials with an adhesive coating, wood and many plastics. After curing the bonding is moisture-proof. WEICON GMK 2510 is not suitable for materials such as polystyrene foam, polyethylene, polypropylene parts, PVC soft foam and PVC imitation leather.

## Rubber Metal Adhesive

# GMK 2410

# GMK 2510

## GMK 2410

### Permanently elastic | resistant to humidity

GMK 2410 is an adhesive based on polychloroprene (CR) for the high-strength, full-surface and flexible bonding of

- ▶ rubber to rubber
- ▶ rubber to metal

WEICON GMK 2410 also bonds cellular rubber (e. g. neoprene), leather, felt, insulating material, textiles, wood, and many plastics.

GMK 2410 is not suitable for materials such as expanded polystyrene, polyethylene, polypropylene, flexible PVC foam, and artificial PVC leather. The product can be used for many industrial applications.

Special  
Silicone

WEICON Zinc Spray is approved by the German TÜV and provides a long-lasting cathodic corrosion protection to all metal surfaces. The spray forms a fast-drying, adherent protective layer of microfine zinc flakes.

Zinc Spray thus fulfils higher requirements than those defined by the DIN EN ISO 1461 standard. WEICON Zinc Spray can be used as a high-grade antirust primer, for the coating of welded joints and drilled holes, as a conductive intermediate layer for spot welding and wherever metal must be protected against corrosion.

Northford Compounds  
Program Listed #2  
Registration 156612

## Zinc Spray bright grade

Zinc Spray "bright grade" is approved by the German TÜV and provides a long-lasting cathodic corrosion protection to all metal surfaces. It has a bright colour shade matching hot-dip galvanization.

▶ 400 ml  
10000047

## Zinc-Alu-Spray

Zinc-Alu Spray lastingly protects all metal surfaces against rust and corrosion. WEICON Zinc-Alu Spray forms a fast drying and adherent protective layer and is resistant to many chemicals.

# Surface and Anti-Corrosion Coatings

## Galva Spray

Colour matching hot-dip galvanized surfaces | >450 h salt-spray-test  
DIN EN ISO 9227

WEICON Galva Spray provides a permanent protective layer for all metal surfaces. It protects metals against rust and corrosion and is fast-drying and firmly adhering.

The spray is resistant to salt water and fresh water and temperatures up to +300°C (+572°F). After more than 450 hours in the salt spray test according to DIN EN 9227, metal parts coated with WEICON Galva Spray did not show any corrosion.

The spray can be used for repairs of hot-dip galvanized parts in matching colour, as highly effective antirust primer, e.g. for painting car bodies, as coating on welded and drilled sections and as conductive intermediate layer in spot-welding.

Stainless Steel Spray

## Rust Protection 2000 PLUS

### Special corrosion- and weather-resistant surface coating

Rust Protection 2000 PLUS is a particularly corrosion- and weather-resistant surface coating on the basis of ferric oxide (hematite). The usage of highly-pure ferric oxide pigments in a flaky arrangement achieves permanent, weather-resistant and water-repellent surface protection.

Metal parts coated with Rust Protection 2000 PLUS did not show any corrosion after more than 2000\* hours in a salt spray test. It is used wherever metal structures or systems require prolonged protection against extreme environmental and weather conditions in a visually appealing manner.

WEICON Rust Protection 2000 PLUS can be used on halls and steel structures, iron railing, lattice towers, fences, handrails, balcony grates, rolling gates, outdoor lights, and on points particularly susceptible to corrosion.

## Aluminium-Spray A-100

### Excellent corrosion protection | abrasion-resistant

WEICON Aluminium-Spray A-100 is abrasion-proof, resistant to many diluted acids and lyes, as well as to atmospheric influences. It contains aluminium pigments with a purity grade of approx. 99.5%.

WEICON Aluminium Spray A-100 offers high-grade corrosion protection for all metal surfaces.

WEICON Aluminium Spray A-100 can be used in cooling and ventilation technology, combustion systems, pipelines and machine housings, fibre glass car body components, in model building, arts and crafts, toy manufacturing and in many additional applications.

## Aluminium-Spray A-400

### Highest brilliancy

Aluminium-Spray A-400 has the highest brilliancy and is resistant to many diluted acids and lyes, as well as to wheater effects. It contains aluminium pigments with a purity grade of approx. 99,5%. WEICON Aluminium Spray A-400 offers high-grade corrosion protection for all metal surfaces. Aluminium Spray A-400 can be used in cooling and ventilation technology, combustion systems, pipelines and machine housings, fibre glass car body components, in model building, arts and crafts, toy manufacturing and in many additional applications.

## Stainless Steel Spray

### Corrosion-resistant and effective surface coating

WEICON Stainless Steel Spray is a chemical, corrosion-, and weather-resistant surface coating on the basis of acrylic resin and stainless steel pigments. It is temperature-resistant up to +300°C (+572°F).

Stainless Steel Spray can be used wherever a resistant and effective protective layer is required. The alloy is comprised of e.g. chromium, nickel and manganese.

WEICON Stainless Steel Spray can be used to repair damaged stainless steel parts on truck bodies, silos and pipelines, and outdoor applications. It can also be used for decorative purposes and for the optical refinement of glass, wood, stone, ceramics and most plastics.

### Chrome-Silver Spray

#### High-brilliance anti-corrosive surface coating on aluminium basis

Chrome-Silver Spray is a high-brilliance surface coating. The special formulation and highest purity of the metal pigments create a high-gloss finish.

WEICON Chrome-Silver Spray can be used for prototypes and samples, mirror applications (e.g. reflectors), trade show and exhibition construction, effective decorative work and for the optical refinement of various materials.

► 400 ml

10009426

### Copper Spray

#### High-grade and effective

WEICON Copper Spray is a high-quality, weather-resistant metal spray with high adhesive strength and a high copper content for protective and decorative coatings having an effective non-ferrous metal character for indoor and outdoor use.

It is even used for the optical refinement (copper-plating) of various material surfaces or design parts.

Copper Spray can be used on window sills, gutters and downspouts, outdoor lights and mailboxes, and for arts and crafts and decorative work.

► 400 ml

10000140

### Isolation Spray

#### Transparent insulating and finishing varnish based on acrylic resin

WEICON Isolation Spray is a transparent insulating and finishing varnish based on acrylic resin. It forms a flexible and resistant layer, which shows excellent adhesion to metal, glass, plastic or wood. It is resistant to UV radiation, acids, oils and lyes. It is moisture- and weather-resistant and has high dielectric strength.

The spray protects against moisture as well as different vapours. It serves as protective coating for circuit boards, on electrical connections, switches, switchboards, electronic components and coils, as universal sealant in electrical engineering or for the repair of insulations on electric motors, windings and frames.

## Corro-Protection

**Corrosion protection of metal parts for indoor storages**

WEICON Corro-Protection is a protective film approved by the German TÜV. It lastingly preserves tools and precision components with a dry and waxy layer.

WEICON Corro-Protection can be used as safe corrosion protection for bare, unpainted metal parts, for the indoor storage of workpieces, as corrosion protection during overseas transport and for the conservation of tools and precision components. The protective layer can be removed easily (e.g. with WEICON Cleaner S).

## Brass Spray

**High-grade and effective**

WEICON Brass Spray is a metallic coating with a high brass content and a colour shade typical of brass. For the protection and optical refinement of various materials.

Brass Spray can be used in restoration work, for decorative purposes, in arts and crafts, hobby and do-it-yourself applications. It is suited for the sustainable repair of yellow chrome-plated parts which have been damaged by drilling, welding or milling.

## Cleaner Spray S

Degreases and cleans all metals, glass, ceramics and most plastics

WEICON Cleaner Spray S cleans, degreases and evaporates without leaving residues. Its special valve also makes it possible to work overhead.

Cleaner Spray S can be used on all metals, glass, and ceramics, and on most plastics, and thermoplastics such as PVC, PMMA (acrylic glass), polystyrene etc.

WEICON Cleaner Spray S can be used for cleaning and degreasing before priming and painting, for cleaning machine parts or before other WEICON products are applied on surfaces where a greasy underground would impair their effect.

## Fast Cleaner

Cleaning and degreasing agent for sensitive areas

The Fast Cleaner has an NSF registration for the foodstuffs sector and can therefore be used as a cleaner and degreasing agent for the removal of contamination generated within the scope of maintenance work and for the removal of non-cured adhesive residues in the foodstuffs and beverages industry and in the pharmaceutical and cosmetic industries.

Fast Cleaner is used to clean and degrease surfaces which are bonded or sealed using WEICON Adhesives and Sealants, or which should be coated using WEICON metal sprays.

Fast Cleaner is pH-neutral and material-compatible, and can be used on many different materials such as metals, glass, ceramics and most rubbers and plastics.

## Cleaners and Degreasers

### Industrial Cleaner

**Powerful special cleaner with high yield**

WEICON Industrial Cleaner is suitable for universal use. It cleans, degreases and evaporates without leaving any residues. The cleaner removes grease, oil, soot and other soiling and residues. It cleans many surfaces fast and easily, such as metals, glass and many plastics. Industrial Cleaner can be used in many different areas.

It is even suitable for sensitive surfaces, such as plastics, rubber materials or powder-coated metal pieces. The cleaner operates with a highly compressed propellant. Therefore, it has a very high active ingredient content of 95 %. This means that the cleaner is very economical, so one container covers a significantly higher number of applications.

► 500 ml  
10055297

### Surface Cleaner

**Pre-treatment of bonding surfaces**

WEICON Surface Cleaner is used for the cleaning and degreasing of surfaces to be joined or sealed with WEICON Adhesives and Sealants.

WEICON Surface Cleaner can be applied on materials like metal, glass, ceramics and most plastics. Surface Cleaner can be used, for example, to clean and degrease machine components in the course of maintenance work.

► 150 ml 10024317    ► 400 ml 10024313

### Brake Cleaner

**Multi-purpose cleaner, especially for the automotive sector**

WEICON Brake Cleaner is a universal cleaner for the automotive industry, which cleans, degreases and evaporates without leaving residues.

Brake Cleaner quickly and effortlessly degreases and cleans metals, glass and many plastics. It removes oily and greasy impurities and residues. WEICON Brake Cleaner can be used on brakes (drum and disc brakes, brake pads, brake blocks, cylinders, springs and bushings), clutches (clutch linings and components) and on engine parts (carburetors, fuel and oil pumps, gears etc.).

► 500 ml  
10000148

### Plastic-Cleaner

**Degreases and cleans sensitive surfaces**

WEICON Plastic-Cleaner cleans, degreases and evaporates without leaving residues. WEICON Plastic-Cleaner can be used to clean and degrease sensitive surfaces such as plastics\*, rubber materials or powder-coated metal parts.

Plastic-Cleaner can be used, for example, on window frames, roller blinds, plastic profiles, seals or lacquered flanges in many industrial applications.

► 500 ml  
10005207

Cleaning of plastic applications  
Plastic-Cleaner

## Burner Cleaner

**Especially formulated to remove grease, oil, soot and other dirt accumulations from burner parts**

WEICON Burner Cleaner is a special cleaner for the removal of grease, oil, rust and other impurities from burner parts.

WEICON Burner Cleaner evaporates without leaving residues. WEICON Burner Cleaner can be used on blast connections, baffles plates, fan wheels and in housing interiors, ignition electrodes, etc.

► 500 ml

10009904

## Mould Cleaner

**Cleaner on the basis of highly active organic solvents**

WEICON Mould Cleaner is a special cleaner based on highly active organic solvents. It effectively removes waxes, silicones, oils, non-cured PUR residues and other impurities from plastic, steel or aluminium moulds.

## Cleaners and Degreasers

### Multi-Foam

#### Powerful universal cleaner

WEICON Multi-Foam is a powerful universal cleaner for residue-free cleaning. It is free of phosphates and formaldehyde and contains no corrosive or caustic substances.

Multi-Foam can be used to clean the most diverse surfaces such as metal, plastic, glass, ceramic or lacquered and coated surfaces.

WEICON Multi-Foam can be used universally in industry, skilled trades and DIY applications.

- 150 ml 10063243
- 400 ml 10000144

### Citrus Cleaner

#### Cleaner and degreaser on the basis of citrus essences

WEICON Citrus Cleaner is an all-purpose cleaning agent based on alcohol and citrus peel extracts. Due to its high isopropyl alcohol content of over 75%, WEICON Citrus Cleaner makes use of its disinfectant effect, and thus supports the overall cleaning and disinfection of surfaces. It can be used for all purposes and is equally suited for use in industrial applications, skilled trades, window construction, in public institutions and public transport, in construction companies, and in housekeeping.

It cleans a wide range of materials, such as metals and plastics, glass, and ceramic as well as painted and coated surfaces\*. WEICON Citrus Cleaner is also highly effective and efficient in basic hygiene and supporting additional hygiene measures, in cleaning frequently used hand tools, and in removing stains due to pencils, pens, and markers.

- 400 ml 10032019

\*For safety reasons, the material compatibility should first be checked on a non-visible area.

proven effect according to  
DIN EN 1276 and 1650

### Foam Cleaner

#### For the food industry

WEICON Foam Cleaner is universally applicable and can be used for the cleaning and degreasing of water-resistant surfaces and for the removal of soiling on plastic, glass and textile surfaces.

Due to its NSF A1 registration, the Foam Cleaner is suitable for use in sensitive areas, such as the food and beverage industry as well as in the pharmaceutical and cosmetic industry.

The spray is suitable for the cleaning of conveyor belts with contact to food, for example in production lines or retail shops. It removes soiling on machine housings and cleans scales, flat screens, touch screens, navigation systems and many more. Foam Cleaner eliminates many different impurities, such as oils and greases, fingerprints, soot, nicotine, dust as well as residues of insects. It can be used wherever acidic or alkaline detergents are not allowed. Due to its special formula and the resulting NSF registration, the Foam Cleaner can contribute towards improvements in occupational safety and health protection.

- 400 ml 10050556

## Electro Contact Cleaner

**Cleans and degreases electronic or mechanical components**

WEICON Electro Contact Cleaner is a special cleaner for the fast and effective cleaning and degreasing of all kinds of soiled or corroded contacts.

Electro Contact Cleaner was specially developed for the cleaning of electrical and mechanical components. The special formula with high-purity solvents removes oxide/sulphide layers, combustion residues and resinous or sooty soiling.

WEICON Electro Contact Cleaner reduces voltage loss and increases electric conductivity. Contamination that can cause tracking current is removed. It can be used on electro-technical or mechanical components such as electrical machines, measuring instruments, tools, balances, switches and sensors or electrical connections, contacts, relays and switchboards.

► 400 ml  
10028866

## Sealant and Adhesive Remover

**Removes residues of hardened sealants and adhesives**

WEICON Sealant and Adhesive Remover quickly and easily removes residues of hardened sealants and adhesives as well as lacquers and paints, even from vertical surfaces.

WEICON Sealant and Adhesive Remover can be used on metal, wood, glass, ceramics, polyethylene and polypropylene. It should not be used on sensitive plastics such as PVC, synthetics, linoleum, etc.

Sealant and Adhesive Remover loosens all kinds of sealant residues on cylinder heads, oil sumps, water pumps, exhaust manifolds, valve covers and gearbox flanges. It reliably removes oil carbon residues, paints and lacquers, and eliminates oils, resins, greases and tar. It can also be used as a paint stripper for wood restoration and removes all kinds of adhesives, even cured cyanoacrylate and anaerobic adhesives.

► 400 ml  
10026705

## Compressed-Air Spray

**Universal use | fast and reliable**

WEICON Compressed-Air Spray can be used universally, wherever dust cannot be easily removed by conventional methods and on parts which are difficult to reach.

It allows dust to be removed from inaccessible corners and sensitive surfaces in a dry and contact-free manner. Compressed-Air Spray can be used on hi-fi and video devices (e.g. modules, circuit boards, magnetic heads, disk drives, etc.), in optics (e.g. cameras and lenses), automotive fuse boxes, windshield washer systems, clock mechanisms (quartz clocks), medical technology, model building, measurement technology, and on electronic components and circuit boards.

## Cleaners and Degreasers

### Visor Cleaner

**Cleaner on the basis of highly active organic solvents**

WEICON Visor Cleaner is a special cleaner for the cleaning and care of sensitive plastic and glass surfaces. It is antistatic and anti-reflective, reduces dazzling, and improves the view.

WEICON Visor Cleaner gently removes contamination caused by insects, dirt, dust, grease and nicotine without leaving streaks.

Visor Cleaner can be used on all kinds of visors, on welding face shields, safety goggles, vision protection, safety glass, plastic housings on CNC machines, printers, scanners, etc., and on all other plastic and glass surfaces.

► 200 ml

10029663

### Screen Cleaner

**Cleans carefully without leaving residues**

WEICON Screen Cleaner is a special cleaner for the cleaning and care of sensitive plastic and glass surfaces. It is antistatic and anti-reflective.

Its antistatic effect provides a dirt- and dust-repellent surface. WEICON Screen Cleaner gently removes contamination caused by insects, dirt, dust, grease and nicotine without leaving streaks.

WEICON Screen Cleaner can be used on all flat and plasma screens (computers, mobiles, laptop computers, televisions, scanners, copy machines, etc.) and plastic housings (on computers, scanners, copy machines or televisions).

► 200 ml

10020650

## Stainless Steel Care Spray

### Antistatic cleaning

Stainless Steel Care Spray was specially formulated for the cleaning, protection and care of matt and polished stainless steel surfaces both indoors and outdoors and has an antistatic effect.

WEICON Stainless Steel Care Spray removes and prevents fingerprints, removes lubricating films e.g. from fume hoods, cleans even large surfaces without leaving streaks, and provides a long-lasting protective film which repels water and prevents new dirt from clinging. The product can be used in many applications.

► 400 ml

10012800

## Cockpit-Spray

### Care product for the automotive interior

WEICON Cockpit-Spray is a water-repellent care product for all plastic and rubber parts in motor vehicle interiors. The permanent invisible protective film prevents contamination and creates an easy-care, dust-repellent silky shine.

Cockpit-Spray refreshes dull and weathered plastic. Rubber does not crack and remains supple and elastic.

WEICON Cockpit-Spray eliminates squeaky and creaky noises, and cares for dashboards, inside cladding, all plastic and rubber parts, leather, wood, and chromium, and car roofs covered with synthetic leather.

It prevents door, window and boot seals from freezing, and is used as a lubricant for seatbelts, seat guides, sunroofs, window guides, door locks and wherever greasy soiling can occur.

► 400 ml

## Metal-Fluid

NSF  
Performance Excellence  
Program Listed #2  
Registration 138152

### Universal use | clean | maintain | protect

WEICON Metal-Fluid is a care and cleaning product for indoor matt and polished surfaces and has an NSF registration.

WEICON Metal-Fluid protects, cleans and maintains both metal surfaces and ceramics, wood, glass and plastics. It does not dissolve etched and printed markings or plastic surfaces and rubber seals. Due to its special formula and the resulting NSF registration, Metal-Fluid can contribute towards improvements in occupational safety and health protection.

## Protection and Care

### Belt Dressing Spray

**Suitable for highly stressed power-transmission belts**

WEICON Belt Dressing Spray is a transparent belt coating based on synthetic elastomers for the most diverse types of heavily stressed drive belts.

It increases the service life, prolongs the durability of machines and systems, prevents belt slip, transmits the full drive capacity, eliminates and prevents squeaking, penetrates deep into pores, increases the effectiveness of the tensile strength, increases friction and promotes adhesion, prevents static charging, ensures suppleness and protects against ageing.

Belt Dressing Spray is suitable for many different types of belts made from all common materials such as fabric, leather, rubber or PVC. It can be used for V-belts, link belts, drive belts, flat belts, round belts, toothed belts, transmission belts, ribbed belts or conveyor belts.

WEICON Belt Dressing Spray is particularly suited for all types of drive belts in machines, aggregates, compressors, pumps, generators, conveyors, mills, pillar drills, and cooling units. The product can be used in many industrial sectors.

**Our TIP!**

### Hand Protective Foam

**Waterproof and providing lasting protection**

The skin is the largest and one of the most complicated organs in the human body, it has multifaceted adjustment and defence mechanisms and provides protection against environmental influences.

Bacteria, viruses and fungi can be found everywhere in the environment and also live on our skin. Most of these microorganisms are harmless to us. Some, however, can make us sick when entering our body. Skin damages are one of the many gateways for pathogens to the human body. Therefore, it is important to take care of and protect the skin.

One important element of effective skin protection is the special care with WEICON Hand Protective Foam, which protects your hands from harmful environmental influences for several hours. WEICON Hand Protective Foam provides temporary protection against aggressive sea and industrial environments, chemicals, solvents, alkalis, acids, salts, cleaning agents, oils, greases, cement, mortar, varnishes, adhesives, or longer contact with aqueous media. However, the foam does not replace a conventional protective glove. The Hand Protective Foam does not block skin respiration or dry out the skin, while protecting it against swelling, irritations, inflammations and adhering dirt. That way, the Hand Protective Foam supports the skin in providing a natural protective barrier.

► 250 ml

10021320

### WEICON Hand Protective Foam

- absorbs quickly
- leaves an invisible, non-greasy and waterproof protective film
- non-greasy, non-slip "invisible glove"
- supports the natural barrier of the skin and is dermatologically tested
- easy and hygienic use thanks to spray can

## Rust Converter

neutralises rust | provides a temporary protective coating

WEICON Rust Converter neutralises rust on corroded iron and steel surfaces and reliably stops corrosion. With its special formula of acid and tannin, the rust converter penetrates the rust. It chemically converts iron oxides into a stable layer and provides temporary corrosion protection through zinc phosphate.

Depending on the carbon content of the metal, the treated area changes colour to bluish, brownish or black. The layer provides the perfect base for subsequent protective coatings, e.g. with WEICON Zinc Spray. WEICON Rust Converter achieves optimal results on lightly rusted surfaces with a rust grade of A and B. Loose rust and loose parts should be removed mechanically beforehand. The converter only becomes active when applied to rust or metal and can be used extensively on all rusted areas, such as on machines and equipment, agricultural machinery and motor vehicles. Unlike other converters, WEICON Rust Converter can be washed off the treated surface with clean water and a sponge or soft brush once the reaction time is over. This way, residues that have formed during the conversion process are removed.

### Rust Shock

#### The "chemical wrench"

WEICON Rust Shock is free of mineral oil, grease and silicone.

Rust Shock is a "chemical wrench" and uses its chill effect and capillary properties to loosen threaded joints in seconds.

WEICON Rust Shock can be used in all industrial sectors requiring threaded joints to be loosened.

► 400 ml

10000143

### Rust Loosener Fluid

#### Penetrating oil for sensitive areas

Rust Loosener Fluid is physiologically harmless and has an NSF registration for the foodstuffs sector. This means that it can be used in the foods and beverages industry and in the pharmaceuticals and cosmetics industries.

Rust Loosener Fluid loosens rusted and oxidised screw connections, bolts, levers, joints and hinges as well as seized mechanisms on components. Due to its excellent capillary action, Rust Loosener Fluid can also penetrate the smallest cavities. It secures the function of mechanical parts and electrical contacts. The spray lastingly protects against corrosion and oxidation. It cleans and cares for metal surfaces, mechanical parts and electrical systems.

Due to its special formula and the resulting NSF registration, Rust Loosener Fluid can contribute towards the improvement of workplace safety and health protection.

► 400 ml

10039111

### Rust Loosener and Contact Spray

#### Sixfold function

The sixfold function of Rust Loosener and Contact Spray makes it indispensable for repairs, maintenance and servicing. Thanks to its excellent capillary action, WEICON Rust Loosener and Contact Spray reaches even the smallest intermediate spaces. The 3-way spray valve makes it possible to work in any position (even overhead).

WEICON Rust Loosener and Contact Spray loosens rusted and stiff parts, screws, bolts, joints and hinges, dispels water from ignition systems, secures the function of mechanical parts and contacts, e.g. on distributor caps and spark plugs, sustainably protects against corrosion and oxidation, provides long-lasting lubrication to sliding surfaces, and cleans and maintains metal surfaces, mechanical parts and electrical systems.

► 400 ml

10023536

### Contact Spray

Dispels moisture | prevents leakage current

WEICON Contact Spray is based on a special combination of active ingredients for the protection and care of electrical contacts and components.

It dispels moisture from electrical contacts, prevents leakage currents and voltage loss and keeps contacts, fuses, cable connections, etc. free of oxidation and sulphide layers.

WEICON Contact Spray can therefore be used, for example, on fuse boxes, speaker systems, gate drives, electrical outlets, cable and electrical connections, cable reels and extensions, electrical garden equipment and lighting systems.

► 400 ml

10026740

# Release Agents

## Label Remover

Including special spatula

WEICON Label Remover quickly and easily removes paper labels and residues of acrylate and caoutchouc-based pressure-sensitive adhesives.

Label Remover is suitable for many surfaces such as glass, metal, wood, foil and plastic. WEICON Label Remover easily and safely removes adhesive labels, price tags (e.g. incorrect labels), address and product stickers, identification labels, and label residues. It also removes adhesive residues from foil labels such as vignettes on car windshields.

► 500 ml

10019354

## Chewing Gum Remover

Including special spatula

Chewing Gum Remover even removes old chewing gum and plasticine residues. The chewing gum and plasticine residues are frozen when sprayed on with WEICON Chewing Gum Remover and can be detached immediately and without damaging textiles or floor coatings.

WEICON Chewing Gum Remover removes chewing gum and plasticine residues from upholstered furniture, bus seats (rigid foam), school chairs and tables, textile floorings of all types and elastic and hard floor coverings such as wood and stone floors, PVC and linoleum flooring.

► 400 ml

10021065

## Mould Release Agent

Silicone-free sliding and release agent

Mould Release Agent is a silicone-free sliding and release agent. The high-grade combination of active ingredients, consisting of pure natural products, has a high sliding effect which prevents its adhesion to plastics, moulds, metals and tools.

WEICON Mould Release Agent can be used in plastic processing and for spraying, pressing, and vacuum deforming.

► 400 ml

10000154

## Anti-Spatter Spray

### Silicone-free

WEICON Anti-Spatter Spray contains no silicone and is perfect for cleaning welding nozzles. It also protects workpieces to be welded from the adhesion and penetration of weld spatter without impairing the welding seam.

Anti-Spatter Spray prevents welding spatter from sticking to gas nozzles and the surfaces of workpieces, provides seamless protection during the welding process and eliminates the need for subsequent cleaning of the workpieces with a spatula, brush or chisel. Post-treatment of the workpieces such as bronzing, galvanising, anodising or painting is possible without special cleaning. However, cleaning, e.g. with WEICON Cleaner Spray S, may be necessary in the case of excessive spraying.

► 400 ml

10000160

## Anti-Spatter Spray HP

### long-lasting effect | transparent | silicone-free

WEICON Anti-Spatter Spray HP is a high-quality release agent and lubricant and is used for cleaning welding tips, welding nozzles and gas nozzles. It also protects workpieces and surfaces to be welded from the adhesion and penetration of weld spatter without impairing the weld seam.

The silicone-free Anti-Spatter Spray provides long-term protection for the treated surfaces. Using the spray minimises downtimes and interruptions in the production process for cleaning the welding equipment.

The spray is excellent for use on stainless steel, but can also be applied to many other materials, such as aluminium, structural steel or non-ferrous metals.

The use of the spray eliminates the need to clean the workpieces with a spatula, brush or chisel. Post-treatment of the workpieces (such as bronzing, galvanising, anodising or painting) is possible without special cleaning.

Cleaning, e.g. with WEICON Spray Cleaner S, may be necessary in the case of excessive spraying.

► 400 ml

10101563

## Ceramic Anti-Spatter Spray

### High-temperature-resistant release agent | protective coating for MIG/MAG welding processes

WEICON Ceramic Anti-Spatter Spray is a high-grade release agent and lubricant, which is suitable for extremely high pressures and temperatures. The spray is a ceramic protective coating for MIG/MAG welding processes. It forms an anti-spatter dry film, which prevents the adhesion of welding spatter. That way, welding tips and gas nozzles are protected. The use of the spray minimises downtimes and interruptions in the production process to clean the welding equipment.

Ceramic Anti-Spatter spray is silicone-free. It protects welding heads on welding robots, welding tips and gas nozzles as well as sensitive equipment, cables, sensors etc. against the adhesion of welding spatters. It is also suitable for applications in plasma and laser cutting, brazing, aluminium extrusion, the foundry industry, sinter metallurgy, the glass industry and high-temperature furnace construction.

# Release Agents

## Alu Grinding Protection

Effective with all abrasives |  
silicone-free

WEICON Alu Grinding Protection works like a cooling lubricant and separating agent during the grinding process. It lowers the temperature at the contact point and forms a silicone-free anti-adhesive layer on the abrasive material. The use of WEICON Alu Grinding Protection avoids clogging, and the pores of the grinding media remain open.

WEICON Alu Grinding Protection greatly increases the tool life of an abrasive disc and the grinding performance can be increased by up to 350%. It can be used for all abrasive materials on foundations such as fibre wheels, sheeting, endless grinding bands, abrasive sleeves, orbital sanders, and special machines.

► 400 ml

10018628

## Angle grinding test

For the sanding of aluminium, abrasive flap wheels are used on all common angle grinders powered by an electric motor or compressed air.

Test components were:

- angle grinder (1,400 W)
- flap wheel Ø 125 mm, 60 grit
- approx. 10,000 RPM
- contact pressure approx. 4 kg
- aluminium block (AlSi9Cu3)

By using Alu Grinding Protection, the removal rate could be increased by up to 350 %.

VIDEO

## W 44 T® Multi-Spray

### Multifunctional oil with multiple effects

WEICON W 44 T® is a multifunctional product which, thanks to its special formula and outstanding capillary action, combines corrosion protection, water repellency, lubrication, conservation and cleaning in a single product.

WEICON W 44 T® loosens seized threads, bolts, fittings and valves, penetrates and dissolves rust, dispels moisture from electrical contacts, prevents tracking currents and makes it easier to start wet motors. W 44 T® can also be used as cutting oil for drilling and cutting processes. It eliminates squeaky and creaky noises on hinges, guides, bearings and all types of joints and couplings. It cleans soiled metal surfaces and leaves a long-lasting razorthin film which does not smear or stick and does not attract dust. It protects and preserves all types of tools, machines, and electrical and mechanical precision devices and keeps them functional. The use of WEICON W 44 T® has almost no limitations in workshop, automotive, shipping, electrical, agricultural, household and hobby applications.

## W 44 T®-Fluid

### Multifunctional oil for sensitive areas

W44T-Fluid is a physiologically harmless multifunctional oil and has an NSF registration for the foodstuffs sector. This means that it can be used in the foods and beverages industry and in the pharmaceuticals and cosmetics industries. The resin and acid-free oil unites lubrication, water repellency, corrosion protection, cleaning and conservation in one product due to a special active ingredient formula and excellent capillary action.

W44T-Fluid loosens seized screw connections, bolts, fittings, locks and valves, and penetrates and dissolves rust. It displaces the humidity from electrical contacts, prevents leakage current and facilitates the start-up of wet motors. The oil removes squeaking and creaking noises on hinges, guides, bearings and all types of joints and couplings. It cleans contamination and metal surfaces and leaves a durable, thin film, which does not smear or stick or attract dust, and which protects and maintains all tools, machines, electrical and mechanical precision devices and keeps them functional.

Due to its special formula and the resulting NSF registration, W 44 T Fluid can contribute towards the improvement of workplace safety and health protection.

# Lubricating and Multifunctional Oils

## AT-44 Allround-Spray

### With PTFE super power

WEICON AT-44 is an allround spray with PTFE and without silicone which, thanks to its special formula and very low friction coefficient, combines corrosion protection, cleaning, water repellency, lubrication and conservation in a single product. AT-44 loosens seized threads, bolts, fittings and valves, dispels moisture from electrical cables, prevents tracking currents and makes it easier to start wet motors. It eliminates squeaky and creaky noises on hinges, guides, bearings and all types of joints and couplings. It cleans soiled surfaces and leaves a razor-thin film which does not smear or stick and does not attract dust. It protects and preserves all types of tools, machines, and electrical and mechanical precision devices and keeps them functional.

WEICON AT-44 knows almost no limitations in workshop, automotive, shipping, electrical, agricultural, household and hobby applications.

## Cutting Fluid

### High-performance cutting oil | excellent lubrication | free from mineral

WEICON Cutting Fluid contains no mineral oil. Thanks to its exceptionally high lubricating effect, it enables higher cutting speeds, longer tool life and therefore greater cutting performance.

WEICON Cutting Fluid can be used for drilling, turning, milling, reaming, sawing, punching and thread cutting of all types of steel, cast iron, stainless steel, copper, brass, aluminium and their alloys in all areas of industry.

► 400 ml  
10000161

## Bio-Fluid

### High-purity mineral oil

WEICON Bio-Fluid is a medically pure white oil containing no resins or acids which was specially developed for lubrication and care. It is water-clear, free of solvents, odourless and tasteless, and water-repellent. It shows excellent capillary action and has an NSF registration. Bio-Fluid reduces friction and wear, suppresses squeaky noises, protects against corrosion and removes dirt and rust.

Bio-Fluid can be used for the lubrication, protection and maintenance of precision mechanisms, as a spray oil for production and filling plants, and as a lubricant for filling and packaging systems. It can be used wherever occasional, technically unavoidable contact with food or its packaging can occur. WEICON Bio-Fluid was developed for applications in the food, beverage, pharmaceutical and cosmetic industries.

## Cutting Fluid for Stainless Steel **NEW**

### High-performance lubricant | reduces friction and wear | silicone-free

WEICON Cutting Fluid for Stainless Steel is a high-performance lubricant for all types of metalworking, both non-cutting and cutting. It reduces wear on workpieces and tools. It decreases friction and heat generation on metal parts. The transparent special oil extends the service life of cutting tools and drills. Thanks to its high adhesive strength, the pressure-resistant cutting fluid prevents drill tools from slipping and protects surfaces from damage. It increases the efficiency and precision of cutting tools, delivering optimal results. It is permanently temperature-resistant up to +200 °C. It can be used in metalworking for all cutting operations such as drilling, turning, sawing, milling, reaming, threading or punching. The silicone-free spray is suitable for use on stainless steel, all types of steel, copper, aluminium, titanium, brass and cast iron. The drilling and cutting oil can be used in metalworking and many other industrial applications.

**NSF**
NSF H1 registration for foodstuffs industry

## Silicone-Fluid

**Special sliding and lubricating agent for sensitive areas**

WEICON Silicone-Fluid is a special, physiologically harmless sliding agent and lubricant for sensitive areas. It has an NSF H1 registration for the foodstuffs industry, and can therefore be used in the foods and beverages industry and in the pharmaceuticals and cosmetics industries.

Silicone-Fluid is used as a separating, protection and care agent and can be used on very different surfaces such as plastic, metal, stainless steel and rubber.

Silicone-Fluid has a durable and good surface quality and is temperature-resistant up to +250°C (+482°F). Due to its special formula and the resulting NSF H1 registration, WEICON Silicone-Fluid can contribute towards the improvement of workplace safety and health protection.

## Pneuma-Lube

**Lubricant for pneumatic equipment | high content of PTFE**

As a lubricating and corrosion protection agent, this product is the universal problem-solver for all moving parts in pneumatic equipment and accessories. Its special product formula with a high content of PTFE makes it a multi-purpose product for: lubrication, corrosion protection, cleaning, water repellency and conservation.

Pneuma-Lube not only serves in installation or maintenance of pneumatic equipment and accessories but can also be used on pneumatic tools in operation. The excellent weathering resistance allows the use also in other sectors, e.g. in the on- and offshore industry.

# Lubricating and Multifunctional Oils

## PTFE-Spray

**Grease-free | excellent sliding properties (non-stick)**

WEICON PTFE-Spray is a grease-free PTFE based dry lubricant with excellent sliding properties. WEICON PTFE-Spray adheres to all metal, plastic and wood surfaces. Its high PTFE content greatly reduces the friction coefficient. The coating repels dirt, dust and water and is resistant to oils, greases and many chemicals.

PTFE-Spray can be used on runners and guides, conveyor belts, transport rollers, slides, windows, cutting tools and packing machines. It can also be used as a permanent lubricant for shafts in plastic bearings, as a water-repellent coating for paper seals, cork seals and seal packaging, as a substitute for release agents containing silicone, and wherever oil or grease lubrication is not permitted or desired. The product can be used in many industrial applications.

► 400 ml

## PTFE-Fluid

**Dry lubricant for sensitive areas**

PTFE-Fluid is a special dry lubricant with strong anti-adhesive effect, and has an NSF registration for the foodstuffs sector. This means that it can be used in the foods and beverages industry and in the pharmaceuticals and cosmetics industries.

Due to the high proportion of PTFE, the spray provides an anti-adhesive effect, through which the friction value on the coated surfaces is substantially reduced. PTFE-Fluid is grease-free and adheres to all metal, plastic and wooden surfaces. The coating repels dirt, dust and water and is resistant against oils, greases and many chemicals. Due to its special formula and the resulting NSF registration, WEICON PTFE-Fluid can contribute towards the improvement of workplace safety and health protection.

The spray can be used as permanent lubrication in many sensitive industrial areas such as on sliding and running rails and guides, on conveyor belts, transport rollers and slides, on tilt mechanisms, locks and hinges, on cutting tools and packaging machines, for shafts in plastic bearings and as a coating for solid seals and assembly aids for seal packs.

► 400 ml

## Anti-Friction Spray MoS<sub>2</sub>

**Dry lubricant**

Anti-Friction Spray MoS<sub>2</sub> is a grease-free dry lubricant with pressure and temperature resistance from -200°C (-328°F) to +450°C (842°F). The layer repels dust, dirt and water, resists oils, greases and many chemicals and adheres to metals, plastics and wood surfaces.

The high portion of MoS<sub>2</sub> provides clean sliding lubrication, reduces friction, has excellent emergency running properties and reduces running noises.

WEICON Anti-Friction Spray MoS<sub>2</sub> shortens and improves the slide-in conditions for sliding bearings, gears and other slide pairings, particularly at high pressure load and low sliding speed.

WEICON Anti-Friction Spray MoS<sub>2</sub> can be used on sliding and running rails and guides, conveyor belts, transport rollers and slides, as a coating for cutting, on loading technology products, as a substitute for release agents containing silicone, and wherever oil or grease lubrication is not permitted or desired.

► 400 ml  
10029748

## Top-Lube

### Excellent capillary action

Top-Lube is a synthetic, transparent adhesive lubricant for the permanent lubrication of all types of highly stressed mechanical parts.

WEICON Top-Lube has a high adhesive and spinning strength and shows outstanding capillary action. It is pressure-resistant, water-repellent and can also be used during on-going operation in compliance with the respective safety regulations. It does not attack the following plastics and elastomers: PTFE, PE, PA, fluorinated -, butadiene and silicone rubber, and polychloroprene. The following materials have a limited resistance: PE-LD, POM, PP, NBR.

WEICON Top-Lube can be used on power-transmitting bolts, gearwheels, worm gears, fast-running machine parts, joints, couplings, rollers, ball bearings and spring assemblies in many industrial applications.

► 400 ml

10000156

## Chain and Rope Lube Spray

### Adherent and high-pressure-resistant

WEICON Chain and Rope Lube Spray is a synthetic, transparent adhesive lubricant for the permanent internal and external lubrication of all types of highly stressed chains and wire ropes.

Chain and Rope Lube Spray is particularly strongly adherent, shows excellent capillary action, suppresses noise, repels water and prevents elongation, friction and wear.

WEICON Chain and Rope Lube Spray can be used on all types of chains and wire ropes, gearwheels, worm gears, fast-running machine parts, joints, couplings, rollers, ball bearings and spring assemblies in many industrial applications.

# Grease Sprays

## Adhering Grease extra strong

### Also for underwater applications

WEICON Adhering Grease extra strong is a special lubricant and corrosion protectant even for underwater applications. It provides effective protection against aggressive fluids in maritime applications and in wet plants.

Adhering Grease extra strong is suitable for rolling and sliding bearings even in mixed friction operation, for joints, levers, sliding guides, spindles, spline shafts, exposed gears, worm gears, chains and wire cables and at all sliding speeds permitted for grease lubrication. The product can be used in many applications.

► 400 ml  
10019873

## Spray-on Grease white

### All-purpose sprayable grease

Spray-on Grease white is a multi-purpose sprayable grease with an outstanding adhering strength and excellent aging and pressure resistance. The addition of special wear-reducing and corrosion-inhibiting additives results in temperature stability from -20°C to +150°C (-4 to +302°F) in combination with a long service life. As usual with transparent products, a visual inspection is possible at all times.

WEICON Spray-on Grease white can be used for the long-term lubrication of rods, gearwheels, rollers, ball bearings, hinges, guides and all types of joints and couplings in many industrial applications.

► 400 ml

### Anti-Seize Assembly Spray

**Reliable protection against corrosion, seizing and cold welding**

WEICON Anti-Seize Assembly Spray is high-temperature-resistant and has excellent separating characteristics.

WEICON Anti-Seize is used as a protecting, separating and lubricating agent for highly stressed parts. Ideally compatible solid contents and selected additives enable a wide range of usage.

WEICON Anti-Seize protects against corrosion, seizure and wear, stick-slip phenomena, oxidation, fretting corrosion and electrolytic reactions („cold welding“). The product can be used in many industrial applications.

- ▶ 100 ml 10000216

### Anti-Seize Assembly Spray High-Tech

**Metal-free**

WEICON Anti Seize „High-Tech“ is high-temperature-resistant, has excellent separating characteristics, is metal-free, neutral to materials and has an NSF registration.

Anti-Seize High-Tech is a dry lubricant paste for metal screw connections and particularly suitable when metal-containing pastes can cause electrolytic reactions, when nickel-containing products should or may not be used due to health reasons and when dark metal-containing products should or may not be used for visual reasons.

- ▶ 400 ml 10000221

### Copper Paste Assembly Spray

**Protecting, separating and lubricating agent for highly stressed parts in high-temperature applications**

WEICON Copper Paste Assembly Spray is a protecting, separating and lubricating agent which is high-temperature-resistant, corrosion-resistant and strong. It contains no sulphur, lead or nickel.

Copper Paste Assembly Spray is used as an assembly lubricant for all kinds of threaded joints and sliding surfaces. It forms an effective lubricating and separating film which protects the functional surfaces on plug-in tools, wear bushings, screws, and all kinds of threaded, plug-in and bayonet joints against corrosion and seizing.

It can be used to reduce vibration on brake blocks and guides, brake cams and pins, car and truck battery terminals and other electrical connections, wheel bolts and nuts, and on wear bushings at electrical, compressed air and hydraulic hammers.

# Assembly Sprays and Adhesive Sprays

## Adhesive Spray extra strong

### Special product for strong and reliable adhesions

Adhesive Spray extra strong is a special formula for strong and permanent bonds on rough and uneven surfaces. A special valve allows the adhesive quantities to be adjusted with infinite variability.

WEICON Adhesive Spray extra strong can be used for the bonding of felt, PVC foil, imitation leather, carpets, plastics, cardboard, foam and cellular rubber, insulating materials, soft foam, vinyl, leather, rubber, metal and wood. It is also suitable for large-area adhesive bonding.

► 500 ml

10024662

## Adhesive Spray

### Universal use

WEICON Adhesive Spray can be used universally and bonds light materials to themselves and among each other.

Adhesive Spray is suitable for the bonding of numerous materials such as paper, cardboard, pasteboard, wood, thin veneers, cork, leather, textiles, felt, soft foam, rubber, foam rubber, and plastic film (except for PVC and polyethylene). It is especially suited for the bonding of hard foam (e.g. polystyrene).

► 500 ml

10000162

## Adhesive Spray for detachable joints

### Transparent

WEICON Adhesive Spray for detachable joints is especially suited for detachable and adjustable joints. It is colourless, does not soak through or cause discolouration, and does not leave a wavy surface, even when used on thin materials.

Adhesive Spray for detachable joints can be used to bond paper, cardboard and foils. The joint is detachable when the spray is applied to one side; applying the spray to both sides makes the joint permanent.

WEICON Adhesive Spray for detachable joints can be used, for example, to fuse templates, billboards, posters, photos, decorations in trade show construction, layouts and technical drawings.

## Adhesive Spray Textiles **NEW**

### for removable, repositionable bonds | does not bleed through

Colourless, permanently bonding adhesive spray based on synthetic elastomers for removable, repositionable bonds – does not bleed through or discolour.

Fixes textiles securely to printing plates, holds them reliably in place during the printing process and leaves no marks on the fabric. The special fan spray head can be set to either vertical or horizontal adhesive discharge.

Depending on the fabric, up to 12 m<sup>2</sup> of material can be fixed. Resistant to temperatures from -20 °C to +65 °C (-4 °F to +149 °F). WEICON Adhesive Spray Textiles is perfect for fixing textiles to printing plates and for precise multiple prints. It is also suitable for flash dryers.

► 500 ml

### Leak Detection Spray

**DVGW-approval | foam-forming leak detector according to DIN EN 14291 | non-flammable | anti-corrosive**

The spray is used for the fast, convenient and reliable location of leaks (cracks or porous spots) in pressurized pipes.

WEICON Leak Detection Spray does not form any hazardous compounds with carbon dioxide (CO<sub>2</sub>), propane, butane, acetylene, oxygen, city or natural gases. Leak Detection Spray can be used wherever compressed air, natural or liquid gas is processed, and wherever leaky points can occur on fittings, threaded joints, and connections. It greatly contributes to the safety of pneumatic brakes and gas lines.

► 400 ml  
10002904

### Leak Detection Spray frost-proof

**DVGW-approval | foam-forming leak detector according to DIN EN 14291 | non-flammable | anti-corrosive | frost-proof up to -15°C (+5°F)**

The safe, easy and quick way to find leaks or porous spots on gas pipes. Leak Detection Spray frost-proof does not form any harmful compounds with these gases: carbon dioxide (CO<sub>2</sub>), propane, butane, acetylene, oxygen, coal and natural gas, nitrogen, dinitrogen monoxide (N<sub>2</sub>O) and CFC and is non-flammable.

Leak Detection Spray frost-proof is suitable wherever compressed air or gaseous substances are being used. For example, it can be used on pipes, hoses, fittings, screw connections, valves and adapters.

► 400 ml

**-15 °C**  
(+5 °F)

### Leak Detection Spray viscous

**DVGW-approval | foam-forming leak detector according to DIN EN 14291 | non-flammable | anti-corrosive | non-drip**

WEICON Leak Detection Spray viscous is the quick, easy and reliable way to find leaks in gas and compressed air pipes and fittings. The spray does not form harmful compounds with the following gases: carbon dioxide (CO<sub>2</sub>), propane, butane, acetylene, oxygen, coal and natural gas, nitrogen, dinitrogen monoxide (N<sub>2</sub>O) and CFC and it is non-flammable.

The spray is applicable wherever compressed air or gaseous substances are being used. Typical application areas for the spray are pipes, hoses, fittings, screw connections, valves and adapters.

# Leak Detection Sprays and Crack Testing Agent

## Crack Testing Agent

1 & 3

### Cleaner

Material-neutral special cleaner for the dye penetrant test. Suitable for metals, many plastics, ceramic materials, glass etc. The suitability for plastic has to be tested in advance.

► 500 ml  
10047463

2

### Penetrant

Red diffusion agent with excellent capillary action for the non-destructive material testing - washes off with solvent. Suitable for metals, many plastics, ceramic materials, glass etc. The suitability for plastic has to be tested in advance.

► 500 ml  
10047461

4

### Developer

Colourfast special developer on solvent basis for dye penetrant tests. Suitable for metals, many plastics, ceramic materials, glass etc. The suitability for plastic has to be tested in advance.

► 500 ml  
10047462

ALSO AVAILABLE AS  
SET

10049835

The WEICON Crack Testing Agent Set comprises:  
1 x 500 ml Cleaner (10047463)  
1 x 500 ml Penetrant (10047461)  
1 x 500 ml Developer (10047462)

1

Cleaning the surface with the Cleaner

2

Apply Penetrant and allow to react

3

Clean again to remove excess Penetrant

4

Apply Developer and perform final visual assessment

**Standards and regulations**  
Sample-tested according to DIN EN ISO 3452-2. Low sulphur and halogen content, according to DIN EN ISO 3452-2 and ASME-Code, Section V, Article 6, T641,07-2015.

## Laser Marking Spray **NEW**

**Enhances contrast | highly versatile | suitable for various types of lasers**

WEICON Laser Marking Spray was specially developed for high-quality, permanent and precise laser engravings. The spray is versatile in use and improves the contrast, legibility and quality of laser markings on a wide range of materials. It can be used on steel, stainless steel, copper, brass, aluminium, glass and ceramics.

When applied to the surface to be marked, the spray creates a thin, highly resistant layer. During laser marking, the material bonds with the surface to create a deep black, high-contrast marking that meets the highest standards. Thanks to the innovative formula, the spray produces an extremely scratch-resistant, chemically resistant and UV-resistant marking layer.

WEICON Laser Marking Spray is suitable for various laser types, such as CO<sub>2</sub> lasers, fibre lasers and diode lasers. It is used in industrial applications as well as for individual customisation and decoration. The spray withstands extreme temperatures ranging from -200 °C to +450 °C, with brief resistance up to +500 °C.

► 400 ml  
10105130

## Allround Sealing Spray

**Paintable |  
for indoor and outdoor use**

WEICON Allround Sealing Spray is a sprayable plastic with high adhesive strength for the sealing of leaks. It has been developed especially for the sealing of the finest cracks and seams indoors and outdoors.

It can be used for the sealing of many different things, like gutters, sewage and drainage pipes, caravans, mobile homes, boats, roofs, windows, pool walls, pond foils, cell shafts and ventilation shafts.

The spray is paintable, waterproof and weather- and UV-resistant. It protects metals against corrosion and is free of bitumen and silicone. Allround Sealing Spray adheres to many surfaces, like stone, metal, plastic, wood, enamel, and many more.

# Special Sprays

## Activating Cleaner

**Cleaner and primer in one product | for the pretreatment of bonding surfaces**

Universal cleaning and bonding agent rolled into one product. Specially developed for the pre-treatment of smooth surfaces, such as stainless steel, glass and plastics. The spray is used for an optimum preparation of non-absorbent surfaces. Cleaning and activation of non-porous substrates is carried out in just one step. The spray can improve the adhesive strength of the adhesive used, if necessary.

The Activating Cleaner has a short flash-off time and can be applied quickly and easily. This makes it ideal for use in industrial series production with short cycle times or for bonding applications that have to be carried out at short notice.

► 400 ml

10062859

## Smoke Detector Test Spray

**Silicone-free | evaporates without leaving residues**

WEICON Smoke Detector Test Spray is ideal for a secure checking of the correct functioning of optical or photoelectrical smoke detectors and smoke switches.

The use of Smoke Detector Test Spray does not contaminate the detectors as the spray evaporates completely without residues.

The spray can be used wherever photoelectric smoke detectors are employed, for example in industrial plants, public facilities and private households.

10027381

## Starter-Spray

**For all combustion engines**

WEICON Starter Spray is suitable for the easy and safe starting of combustion engines. The safe cold starting of all engines is made possible by a special combination of ingredients.

Starter Spray is ideal at low temperatures, in damp weather or after longer engine downtimes. The spray protects both the engine and the battery. Starter Spray is suited for both diesel and petrol engines. Whether with or without a catalytic converter, whether a motor vehicle, construction machinery, agricultural machinery, chain saws, lawn mowers, boat engines, motorcycles or scooters – WEICON Starter Spray can be used everywhere.

► 400 ml

10030465

## Freeze Spray

VIDEO

**Precise chilling down to -45°C (-49°F)**

WEICON Freeze-Spray has many uses and is suitable for fault-finding in electronics and for repair works in industrial sector.

Freeze Spray quickly cools parts down to -45°C (-49°F) and allows pin-pointed chilling of even the smallest construction parts.

WEICON Freeze Spray is non-conductive and neutral to materials (with the exception of plastic) and can be used in many industrial and technical applications.

### Fast Cleaner

pH-neutral and material-compatible |  
can be used on many different materials  
such as metals, glass, ceramics and most  
rubbers and plastics | NSF-A1 registration

► 500 ml

10039119

### Industrial Cleaner

Powerful special cleaner  
with high yield

► 500 ml

10055297

### Top-Lube-Fluid

Particularly adherent and pressure-  
resistant | noise-dampening and water-  
repellent | prevents elongation, friction  
and wear

► 400 ml

10039117

### W 44 T®-Fluid

Resin- and acid-free | excellent  
capillary action | lubrication, water  
repellency, corrosion protection,  
cleaning and conservation in one  
product

► 400 ml

10039113

### Anti-Seize High-Tech

White assembly paste, high-  
temperature-resistant | metal-free |  
NSF-H1 registration

► 400 ml

10000221

### Zinc Spray

Long-term cathodic corrosion  
protection | paintable | >1050  
in the salt spray test according  
to DIN EN ISO 9227

► 400 ml

10000016

### Zinc Spray bright grade

Long-term cathodic corrosion  
protection | bright colour shade  
matching hot-dip galvanization

## Technical Sprays

# Technical Sprays for Sensitive Areas

## Technical Sprays

## for sensitive areas

With our selection of chemo-technical products with food certifications, we ensure that you get the right products for your production, maintenance and repair which meet your exact requirements quality- and safety-wise.

We have developed a variety of special products for the most different applications which meet the high standards of the National Sanitation Foundation (NSF). These products can be used in sensitive areas such as food production, food and beverage industry and the pharmaceutical and cosmetic industry. Here our adhesives and sealants, assembly pastes or cleaners can be applied in the different areas of production.

# NSF®

## Lubricants, Release Agents and Anti-Corrosion Agents

<b>H1</b>	Lubricants for use in food processing areas where accidental contact with food cannot be prevented.	Anti-Seize High-Tech   Bio-Fluid (Spray, Technical liquid)   Silicon-Fluid   Spray-on Grease H1   Rust Loosener-Fluid   W 44 T®-Fluid
<b>H2</b>	Lubricants exclusively for areas in which direct or indirect contact with food can be ruled out.	PTFE-Fluid   Top-Lube-Fluid
<b>R2</b>	Coatings for use on structural surfaces, which do not come into contact with food. The product must be applied in a way that prevents direct or indirect contamination of food.	Zinc Spray   Zinc Spray bright grade

## Cleaning Agents

<b>A1</b>	Universal cleaner exclusively for areas in which direct contact with food can be ruled out. Surfaces and equipment must be rinsed thoroughly with drinking water after cleaning.	WEICON Fast Cleaner (Spray, Technical liquid)   WEICON Foam Cleaner
<b>A7</b>	Cleaning agent and polishes for metal surfaces without food contact. Odours must be dissipated completely before contact with food or packaging may occur.	WEICON Metal-Fluid (Spray, Technical liquid)
<b>C1</b>	Cleaner for use in non-food processing areas. Cleaned equipment must be rinsed thoroughly with drinking water before it is returned to food areas.	WEICON Metal-Fluid (Technical liquid)
<b>K1   K3</b>	Solvent cleaner and degreaser for use in non-food processing areas. Solvent adhesive or glue remover without direct food contact.	WEICON Industrial Cleaner (Spray)

### Universal Spatula white

10039185

Special spatula for the gentle removal of the most diverse contamination and residues. Suitable for use in the food industry.

EU Regulation 10/2011/EC plastics with food contact.

## Technical Data

	Colour	Odour	Temp. resistance	Content	Shelf life (months)	Special features
<b>Adhering Grease extra strong</b>	beige	almost odourless	-25°C (-13°F) to +80°C (+176°F)	400 ml	24	adhering even under water
<b>Activating Cleaner</b>	transparent	solvent / alcohol	---	400 ml	24	cleaner and primer in one product; for the pretreatment of bonding surfaces
<b>Adhesive Spray</b>	beige	solvent	-20°C (-4°F) to +65°C (+149°F)	500 ml	12	large surface bonding of light materials
<b>Adhesive Spray extra strong</b>	yellowish	solvent	-20°C (-4°F) to +80°C (+176°F)	500 ml	12	bonding of big surfaces, even with absorbing materials
<b>Adhesive Spray for detachable joints</b>	colourless	solvent	-20°C (-4°F) to +50°C (+122°F)	500 ml	12	does not strike through nor leaves wavy surfaces
<b>Adhesive Spray Textiles</b>	beige	solvent	-20 °C (-4 °F) to +65 °C (149 °F)	500 ml	12	for removable, repositionable bonds, does not bleed through
<b>Allround Sealing Spray</b>	grey	solvent	-50°C (-58°F) to +100°C (+212°F)	400 ml	24	seals reliably and quickly
<b>Alu Grinding Protection</b>	colourless	solvent	-20°C (-4°F) to +130°C (+266°F)	400 ml	24	silicone-free
<b>Anti-Friction Spray MoS<sub>2</sub></b>	anthracite black	solvent	-200°C (-328°F) to +450°C (+842°F) briefly to +500°C (+932°F)	400 ml	24	dry lubricant on MoS <sub>2</sub> basis
<b>Anti-Seize High Tech</b>	white	medical white oil	-40°C (-40°F) to +1,400°C (+2,552°F)	400 ml	24	perfect protection against the seizing of high-alloy steels, NSF H1
<b>Anti-Seize Assembly Spray</b>	anthracite	synthetic oil mixture	-180°C (-292°F) to +1,200°C (+2,192°F)	400 ml	24	extremely high pressure resistance, corresponds to MIL907D
<b>Anti-Spatter Spray</b>	colourless	solvent	---	400 ml	24	silicone-free
<b>Anti-Spatter Spray HP</b>	transparent	almost odourless	---	400 ml	24	silicone-free, long-lasting protection
<b>AT-44 Allround-Spray</b>	yellowish	vanilla	-50°C (-58°F) to +210°C (+410°F)	150 ml 400 ml	24	high-performance lubricating oil with PTFE
<b>Belt Dressing Spray</b>	colourless	mineral oil	-40°C (-40°F) to +80°C (+176°F)	400 ml	24	suitable for highly-stressed powertransmission belts
<b>Bio-Fluid</b>	colourless	almost odourless	-25°C (-13°F) to +120°C (+248°F)	500 ml	24	corresponds to purity grade of DAB10, USDA H1, FDA Regulations, FDA positive list
<b>Brake Cleaner</b>	colourless	citrus	---	500 ml	24	evaporates without residues
<b>Burner Cleaner</b>	colourless	citrus	---	500 ml	24	evaporates without residues
<b>Ceramic Anti-Spatter Spray</b>	white	solvent	---	400 ml	24	excellent adhesion
<b>Chain and Rope Lube Spray</b>	colourless	mineral oil	-40°C (-40°F) to +200°C (+392°F)	400 ml	24	particularly adhesive, pressure-resistant, extremely high capillary action, sound-absorbent
<b>Chewing Gum Remover</b>	---	almost odourless	---	400 ml	24	removes even old chewing gum or modelling clay residues
<b>Citrus Cleaner</b>	colourless	citrus	---	400 ml	24	evaporates without residues, pH neutral
<b>Cleaner Spray S</b>	colourless	orange	---	500 ml	24	evaporates without residues
<b>Cockpit-Spray</b>	colourless	citrus	---	400 ml	24	dust- and water-repellent colour-intensifying, silk-matt
<b>Compressed-Air Spray</b>	---	almost odourless	---	400 ml	24	cleans in a contact-free manner
<b>Contact Spray</b>	transparent	solvent	-20°C (-4°F) to +150°C (+302°F)	400 ml	24	dispels moisture, protects electrical contacts
<b>Copper Paste Assembly Spray</b>	copper	mineral oil	-20°C (-4°F) to +1,100°C (+2,012°F)	400 ml	24	high-temperature-resistant
<b>Corro-Protection</b>	colourless and magenta	solvent	-20°C (-4°F) to +80°C (+176°F)	400 ml	24	on a wax basis
<b>Crack Testing Agent Cleaner</b>	colourless	solvent	0°C (+32°F) to +50°C (+122°F)	500 ml	24	evaporates without residues
<b>Crack Testing Agent Developer</b>	white	solvent	0°C (+32°F) to +50°C (+122°F)	500 ml	24	reliable indication of material errors
<b>Crack Testing Agent Penetrant</b>	red	solvent	0°C (+32°F) to +50°C (+122°F)	500 ml	24	very good penetration properties
<b>Cutting Fluid</b>	colourless	mineral oil	up to +200 °C (392 °F)	400 ml	24	High-performance lubricant
<b>Cutting Fluid for Stainless Steel</b>	colourless	mineral oil	-40 °C (140 °F) to +200 °C (392 °F)	500 ml	24	decreases friction and heat generation on metal parts
<b>Electro Contact Cleaner</b>	colourless	solvent	---	400 ml	24	high-purity solvents
<b>Fast Cleaner</b>	colourless	solvent	-10°C to +50°C (+14°F to +122°F)	400 ml	24	NSF-A1 approval
<b>Fitting Spray</b>	colourless	odourless	-25°C (-13°F) to +120°C (+248°F)	200 ml	24	resin- and acid-free mineral oil
<b>Foam Cleaner</b>	white	odourless	---	400 ml	24	NSF-A1 approval

# Technical Sprays

## Technical Data

	Colour	Odour	Temp. resistance	Content	Shelf life (months)	Special features
Freeze Spray	---	almost odourless	---	400 ml	24	targeted cooling of even the smallest components down to -45°C (-49°F)
Hand Protective Foam	white	odourless	---	200 ml	24	with liposomes, dermatologically tested
Industrial Cleaner	colourless	solvent	---	500 ml	24	high performance, 95 % active ingredient content, NSF-K1,K3 approval
Isolation Spray	colourless	solvent	-40°C (-40°F) to +120°C (+248°F)	400 ml	24	high dielectric strength, material-compatible
Label Remover	colourless	citrus	---	500 ml	24	removes paper and foil labels with special spatula
Laser Marking Spray	anthracite, black	solvent	-200°C t +450°C, briefly up to +500°C	400 ml	24	improves the contrast, legibility and quality of laser markings
Leak Detection Spray	milky	almost odourless	0°C (+32°F) to +50°C (+122°F)	400 ml	24	DVGW-tested
Leak Detection Spray frost-proof	colourless	almost odourless	-15°C (+5°F) to +50°C (+104°F)	400 ml	24	DVGW-tested; frost-proof
Leak Detection Spray viscous	colourless	almost odourless	0°C (+32°F) to +50°C (+122°F)	400 ml	24	non-sag
Metal-Fluid	milky	almost odourless	---	400 ml	24	antistatic effect, NSF-A7 approval
Mould Cleaner	colourless	citrus	---	500 ml	24	removes waxes, oils, silicones and other impurities from moulds and tools
Mould Release Agent	colourless	solvent	-20°C (-4°F) to +130°C (+266°F)	400 ml	24	silicone-free
Multi-Foam	white	citrus	---	400 ml	24	powerful universal cleaner
Plastic-Cleaner	colourless	citrus	---	500 ml	24	for sensitive plastic surfaces
Pneuma-Lube	yellowish	vanilla	-50°C (-58°F) to +210°C (+410°F)	400 ml	24	high-performance lubricating oil with PTFE
PTFE-Fluid	whitish, transparent	almost odourless	-180°C (-292°F) to +260°C (+500°F)	400 ml	24	NSF-H 2 approval
PTFE-Spray	white	almost odourless	-180°C (-292°F) to +250°C (+482°F)	400 ml	24	dry lubricant on a PTFE basis
Rust Converter	beige, transparent	synthetic resin	-50°C to +80°C (-58°F to +176°F) (briefly <15 min. to +160°C/+320°F)	400 ml	24	rust converting, priming, sealing
Rust Loosener and Contact Spray	beige	petroleum	-20°C (-4°F) to +150°C (+302°F)	400 ml	24	sixfold function
Rust Loosener Fluid	beige	almost odourless	-20°C (-4°F) to +150°C (+302°F)	400 ml	24	loosens, lubricates, cleans and protects, NSF H1 approval
Rust-Shock	transparent	solvent	---	400 ml	24	removes rusted-tight screw connections of any type in seconds
Screen Cleaner	white	almost odourless	---	200 ml	24	also suitable for sensitive plastic and glass surfaces
Sealant and Adhesive Remover	pink	solvent	---	400 ml	24	powerful
Silicone Spray	colourless	solvent	-50°C (-58°F) to +250°C (+482°F)	400 ml	24	silicone oil basis
Silicone-Fluid	colourless	odourless	-30 to +250°C (-22 to +482°F)	400 ml	24	NSF-H1 approval
Smoke Detector Test Spray	colourless	solvent	---	150 ml 250 ml	24	silicone-free, evaporates without residues
Spray-on Grease H1	yellowish-white	almost odourless	-40°C (-40°F) to +160°C (+320°F)	400 ml	24	odour- and tasteless high-temperature grease, NSF-H 1 approval
Spray-on Grease white	white	solvent	-20°C (-4°F) to +150°C (+302°F)	400 ml	24	very good adhesive and lubricating properties
Stainless Steel Care Spray	colourless	almost odourless	-20°C (-4°F) to +130°C (+266°F)	400 ml	24	antistatic effect, indoors and outdoors
Starter-Spray	colourless	solvent	---	400 ml	24	for all combustion engines
Surface Cleaner	colourless	solvent	---	400 ml	24	before the application of WEICON Adhesives and Sealants
Top-Lube	colourless	mineral oil	-40°C (-40°F) to +200°C (+392°F)	400 ml	24	particularly adhesive, pressure-resistant, and water-repellent. With excellent capillary action
Top-Lube-Fluid	light yellowish	neutral	-20°C to +250°C (-4°F to +482°F)	400 ml	24	synthetic, transparent, NSF H2 approval
Universal Spray on Grease with MoS <sub>2</sub>	black	almost odourless	-20°C (-4°F) to +120°C (+248°F)	400 ml	24	high-pressure-resistant, long-term grease
Visor Cleaner	white	almost odourless	---	200 ml	24	cleaning without residues and neutral to surfaces
W 44 T® Multi-Spray	yellowish	vanilla	-50°C (-58°F) to +210°C (+410°F)	200 ml, 400 ml, 500 ml	24	multifunctional oil with multiple effect
W 44 T®-Fluid	beige	almost odourless	-20°C to +150°C (-4°F to +302°F)	400 ml	24	loosens, lubricates, protects, separates and maintains, NSF H1 approval

# Technical Liquids

## WEICON Technical Liquids

### Economical | effective

Economic efficiency and health and safety at work - these are all requirements which every company has to fulfil to an increasing degree. That is why products and production systems that reach these requirements are becoming all the more important.

WEICON Technical Liquids meet the highest demands:

- ▶ they contain no flammable propellants
- ▶ no extensive or costly disposal is necessary
- ▶ emissions are reduced
- ▶ less packaging waste
- ▶ only the substance itself is processed

WEICON Technical Liquids are available for the following areas of application:

- ▶ cleaning and degreasing
- ▶ lubrication, care and maintenance
- ▶ release and separating
- ▶ surface and anti-corrosion coatings

## Rust Converter\*

neutralises rust | sprayable | provides a temporary protective coating

WEICON Rust Converter neutralises rust on corroded iron and steel surfaces and reliably stops corrosion. With its special formula of acid and tannin, the rust converter penetrates the rust. It chemically converts iron oxides into a stable layer and provides temporary corrosion protection through zinc phosphate.

Depending on the carbon content of the metal, the treated area changes colour to bluish, brownish or black. The layer provides the perfect base for subsequent protective coatings, e.g. with WEICON Zinc Spray. WEICON Rust Converter achieves optimal results on lightly rusted surfaces with a rust grade of A and B. Loose rust and loose parts should be removed mechanically beforehand. The converter only becomes active when applied to rust or metal and can be used extensively on all rusted areas, such as on machines and equipment, agricultural machinery and motor vehicles. Unlike other converters, WEICON Rust Converter can be washed off the treated surface with clean water and a sponge or soft brush once the reaction time is over. This way, residues that have formed during the conversion process are removed.

## Rust Loosener

### Sixfold function

WEICON Rust Loosener's sixfold function makes it indispensable for repairs, maintenance and servicing. Thanks to its excellent capillary action, WEICON Rust Loosener reaches even the smallest cavities.

WEICON Rust Loosener loosens rusted and stiff parts, screws, bolts, joints and hinges, permanently protects against corrosion and oxidation, durably lubricates sliding surfaces, cleans and maintains metallic surfaces and mechanical parts and is temperature-resistant from -20°C to +150°C (-4 to +302°F).

# Technical Liquids

## Solvents

### Rust Remover liquid

**highly concentrated | removes rust from parts down to bare metal**

WEICON Rust Remover liquid is a special concentrate for removing rust and corrosion. The highly concentrated dip is suitable for sheet metal and steel structures as well as a wide variety of metal parts and removes rust from surfaces down to the bare metal.

Rust Remover liquid can be used without special equipment and requires no special tools. The dip, which is based on an aqueous solution, is diluted with water for standard applications. Rusty parts can be immersed directly. The rust removal concentrate is also suitable for ultrasonic baths and can be reused several times.

The special dip is suitable for a wide range of industrial applications where rust and corrosion need to be removed. For example, it is ideal for removing rust from the inside of fuel tanks.

► 1 L 10101897    ► 5 L 10101900

VIDEO

### Rust Remover Gel

**high reaction speed | very economical | solvent-free**

Gel for fast and reliable removal of rust and tarnish. The Rust Remover Gel can be used on ferrous steel, brushed stainless steel, copper, brass, chrome and silver. It has a high reaction speed, penetrates very well and is very economical. The gel removes tarnish in just a few seconds. With rust, the removal process can take between 15 minutes and 12 hours – depending on the degree of corrosion.

The blue gel does not need to be heated for application, but can be processed at room temperature. This solution is based on natural substances, is solvent-free and ensures gentle rust removal.

WEICON Rust Remover Gel can be used in various areas of industry and trade.

VIDEO

### Aluminium Paint\*

#### Effective | abrasion-resistant

Aluminium Paint is used as corrosion protection and for the optical enhancement of metallic surfaces. Upon contact with moisture, aluminium pigments form a dense, almost impermeable oxide layer on the surface which prevents further moisture penetration.

High abrasion resistance and a long colour shade guarantee are achieved by pigments which evenly distribute themselves throughout the entire coating upon application.

This protects WEICON Aluminium Paint against abrasion and chemical effects after it has thoroughly hardened.

► 375 ml    ► 750 ml  
10027113    10012085

### Brushable Liquid Zinc Coating\*

#### Repair for galvanized surfaces with a colour shade matching hot-dip galvanization

WEICON Brushable Liquid Zinc Coating provides active protection against corrosion for all metallic surfaces and is available in a colour shade matching the galvanization.

With Brushable Liquid Zinc Coating, flaky metal pigments settle parallel to the surface in several, spatially displaced layers on the substrate (shingle effect). This protects the surface longer from penetrating moisture. Optimal corrosion protection is achieved in connection with the simultaneous electro-chemical effect.

► 375 ml    ► 750 ml    ► 2,5 L  
10000327    10000328    10000404

VIDEO

### Brushable Liquid Zinc Paint\*

#### Efficient cathodic corrosion protection

WEICON Brushable Liquid Zinc Paint is a coating used to actively and permanently protect metallic substrates against corrosion.

Brushable Liquid Zinc Paint uses high concentration and pure spherical (round) metal pigments. The high amount of zinc in the coating ensures efficient cathodic corrosion protection.

If the surface is damaged, the zinc molecules react with the air humidity to form zinc oxide molecules which protect the base material from corrosion.

# Surface and Anti-Corrosion Coatings

## Corro-Protection

**Corrosion protection for indoor storage and overseas shipment of metals**

WEICON protective film approved by the German TÜV. It lastingly preserves tools and precision components with a dry and waxy layer.

WEICON Corro Protection can be used as safe corrosion protection for bare, unpainted metal parts, for the indoor storage of work pieces, as corrosion protection during overseas transport and for the conservation of tools and precision components. The protective layer can be removed easily (e.g. with WEICON Cleaner S).

## Surface Cleaner

### Pre-treatment of bonding surfaces

WEICON Surface Cleaner is used for the cleaning and degreasing of surfaces to be joined or sealed with WEICON Adhesives and Sealants. Surface Cleaner can be applied to materials like metal, glass, ceramics and most plastics.

WEICON Surface Cleaner can be used, for example, to clean and degrease machine components in the course of maintenance work.

## Electro Contact Cleaner

### Cleans and degreases electronic or mechanical components

WEICON Electro Contact Cleaner is a special cleaner for the fast and effective cleaning and degreasing of all kinds of soiled or corroded contacts.

WEICON Electro Contact Cleaner was specially developed for the cleaning of electronic and mechanical components. The special formula with high-purity solvents removes oxide/ sulphide layers, combustion residues and resinous or sooty soiling. WEICON Electro Contact Cleaner reduces voltage loss and increases electric conductivity.

Contamination that can cause tracking current is removed. It can be used on electrotechnical or mechanical components such as electrical machines, measuring instruments, tools, balances, switches and sensors or electrical connections, contacts, relays and switchboards.

10037688	10025839	10025840	10053459

## Cleaner M

### Classified as non-hazardous | fast-drying | non-flammable

WEICON Cleaner M cleans and degreases all metals, plastics, rubber, glass, ceramic, wood, or painted and coated surfaces. It is powerful and precise in cleaning grease, oil, resin, soot, wax, release agents, forming substances, cooling lubricants as well as label and adhesive residues.

Cleaner M is ready to use, fast-drying, non-flammable and classified as non-hazardous. The cleaner is easy and safe to use. It can be used, for example, to clean and degrease machine components and tools. Its special formula consisting of special surfactants and alcohols does not contain any silicone defoamers, is non-greasy and therefore contributes significantly to the process-safe cleaning of components in production processes.

## Cleaners and Degreasers

### Fast Cleaner

#### Cleaning and degreasing agent for sensitive areas

The Fast Cleaner has an NSF registration for the foodstuffs sector and can therefore be used as a cleaner and degreasing agent for the removal of contamination generated within the scope of maintenance work and for the removal of noncured adhesive residues in the foodstuffs and beverages industry and in the pharmaceutical and cosmetic industries.

Fast Cleaner is used to clean and degrease surfaces which are bonded or sealed using WEICON adhesives and sealants, or which should be coated using WEICON metal sprays.

Fast Cleaner is pH-neutral and materialcompatible, and can be used on many different materials such as metals, glass, ceramics and most rubbers and plastics. Due to its special formula and the resulting NSF registration, the Fast Cleaner can contribute towards improvements in occupational safety and health protection.

### Cleaner S\*

#### Degreases and cleans all metals, glass, ceramics and most plastics

WEICON Cleaner S cleans, degreases and evaporates without leaving residues.

It can be used on all metals, glass, and ceramics, and on most plastics, and thermoplastics such as PVC, PMMA (acrylic glass), polystyrene etc. WEICON Cleaner S can be used for cleaning and degreasing before priming and painting, for cleaning machine parts or before other WEICON products are applied on surfaces where a greasy underground would impair their effect.

## Brake Cleaner\*

**Multi-purpose cleaner, especially for the automotive sector**

WEICON Brake Cleaner is a universal cleaner for the automotive industry, which cleans, degreases and evaporates without leaving residues.

WEICON Brake Cleaner quickly and effortlessly degreases and cleans metals, glass and many plastics. It removes oily and greasy impurities and residues.

Brake Cleaner can be used on brakes (drum and disc brakes, brake pads, brake blocks, cylinders, springs and bushings), clutches (clutch linings and components) and on engine parts (carburettors, fuel and oil pumps, gears etc.).

## Brake Cleaner AF

**Universal cleaner for the automotive sector | acetone-free**

WEICON Brake Cleaner AF is an acetone-free universal cleaner for the automotive sector. The liquid agent cleans, degreases and evaporates completely without residue.

Brake Cleaner AF quickly and effortlessly degreases and cleans metals, glass, rubber materials, powder-coated surfaces and many plastics and reliably removes oil and grease soiling and residues.

The cleaner can be used on brakes (drum and disc brakes, linings, brake pads, cylinders, springs and bushes), clutches (clutch linings and parts) or engine parts (carburettors, petrol and oil pumps, gearboxes, etc.). However, it is also suitable for cleaning plastic profiles, seals or painted surfaces and can be used in many areas of industry and trade.

## Plastic Cleaner

**Degreases and cleans sensitive surfaces**

WEICON Plastic-Cleaner cleans, degreases and evaporates without leaving residues. It can be used to clean and degrease sensitive surfaces such as plastics\*, rubber materials or powder-coated metal parts.

Plastic-Cleaner can be used, for example, on window frames, roller blinds, plastic profiles, seals or lacquered flanges in many industrial applications.

# Technical Liquids

## Cleaners and Degreasers

### Workshop Cleaner

**Free of solvents and phosphate | bio-degradable**

Workshop Cleaner cleans and degreases all metals, plastics, types of rubber, glass, ceramics and wood. It removes grease, oil, resin, rust, wax, nicotine, insect dirt, bitumen and tar specks.

Workshop Cleaner is free of solvent, emulsifier and phosphate compatible with oil separators (ÖNORM B 5105) and, in accordance with EC-guidelines, biodegradable. It is highly concentrated and can be diluted to the proportion 1:40 (max.).

Workshop Cleaner contains selected foamless tensides and, in addition to manual cleaning, can be used in high-pressure cleaners, part washing machines and spray apparatuses (e.g. Pump Dispenser WPS 1500).

### Citrus Cleaner

**Cleaner and degreaser on the basis of citrus essences**

proven effect according to  
DIN EN 1276 and 1650

WEICON Citrus Cleaner is an all-purpose cleaning agent based on alcohol and citrus peel extracts. Due to its high isopropyl alcohol content of over 75%, WEICON Citrus Cleaner makes use of its disinfectant effect, and thus supports the overall cleaning and disinfection of surfaces. It can be used for all purposes and is equally suited for use in industrial applications, skilled trades, window construction, in public institutions and public transport, in construction companies, and in housekeeping. It cleans a wide range of materials, such as metals and plastics, glass, and ceramic as well as painted and coated surfaces\*.

WEICON Citrus Cleaner is also highly effective and efficient in basic hygiene and supporting additional hygiene measures, in cleaning frequently used hand tools, and in removing stains due to pencils, pens, and markers.

## Stainless Steel Care

### Antistatic effect

Stainless Steel Care was specially formulated for the cleaning, protection and care of matt and polished stainless steel surfaces both indoors and outdoors and has an antistatic effect.

WEICON Stainless Steel Care removes and prevents fingerprints, removes lubricating films e.g. from fume hoods, cleans even large surfaces without leaving streaks, and provides a long-lasting protective film which repels water and prevents new dirt from clinging. The product can be used in many applications.

# Protection and Care

## Release Agents

### Mould Release Agent

#### Silicone-free sliding and release agent

The high-grade combination of active ingredients, consisting of pure natural products, has a high sliding effect which prevents its adhesion to plastics, moulds, metals and tools.

WEICON Mould Release Agent can be used in plastic processing and for spraying, pressing, and vacuum deforming.

### Anti-Spatter

#### Welding protection | VOC-free and non-hazardous | temporary corrosion protection

WEICON Anti-Spatter is a release emulsion for high-temperature welding applications. It prevents welding spatter from adhering to and burning onto surfaces during MIG/MAG welding as well as laser and plasma cutting. It protects welding nozzles, welding accessories and workpiece surfaces, ensuring excellent welding results. The quality of the weld seam remains unaffected. WEICON Anti-Spatter also provides effective temporary corrosion protection and is effective both wet and dry.

It is suitable for welding austenitic material, steel and various other materials. The product can be used in vehicle construction, special machine engineering, steel construction, apparatus and plant engineering, shipbuilding, automotive manufacturing and many other industrial sectors.

WEICON Anti-Spatter is transparent, odourless, VOC-free, non-hazardous, silicone-free and solvent-free. After welding, the emulsion does not interfere with galvanising or painting processes.

## W 44 T®

### Multifunctional oil with multiple effects

W 44 T® is a multifunctional product which, thanks to its special formula and outstanding capillary action, combines corrosion protection, water repellency, lubrication, conservation and cleaning in a single product.

W 44 T® loosens seized threads, bolts, fittings and valves, penetrates and dissolves rust, dispels moisture from electrical contacts, prevents tracking currents and makes it easier to start wet motors. W 44 T® can also be used as cutting oil for drilling and cutting processes. It eliminates squeaky and creaky noises on hinges, guides, bearings and all types of joints and couplings. It cleans soiled metal surfaces and leaves a long-lasting, razor-thin film which does not smear or stick and does not attract dust.

It protects and preserves all types of tools, machines, and electrical and mechanical precision devices and keeps them functional. The use of WEICON W 44 T® has almost no limitations in workshop, automotive, shipping, electrical, agricultural, household and hobby applications.

10011715	10007793	10011348	10053483

## AT-44

### With PTFE super power | silicone-free

Thanks to its special formula and very low friction coefficient, WEICON AT-44 combines corrosion protection, cleaning, water repellency, lubrication and conservation in a single product.

WEICON AT-44 loosens seized threads, bolts, fittings and valves, dispels moisture from electrical cables, prevents tracking currents and makes it easier to start wet motors. It eliminates squeaky and creaky noises on hinges, guides, bearings and all types of joints and couplings.

It cleans soiled surfaces and leaves a razor-thin film which does not smear or stick and does not attract dust. It protects and preserves all

types of tools, machines, and electrical and mechanical precision devices and keeps them functional. The use of AT 44 has almost no limitations in workshop, automotive, shipping, electrical, agricultural, household and hobby applications.

# Lubricating and Multifunctional Oils

## Bio-Fluid

### High-purity mineral oil

WEICON Bio-Fluid is a medically pure white oil containing no resins or acids which was specially developed for lubrication and care.

It is water-clear, free of solvents, odourless and tasteless, and water-repellent. It shows excellent capillary action and has an NSF registration.

It reduces friction and wear, suppresses squeaky noises, protects against corrosion and removes dirt and rust. Bio-Fluid can be used for the lubrication, protection and care of precision mechanisms, as a spray oil for production and filling plants, and as a lubricant for filling and packaging systems. It can be used wherever occasional, technically unavoidable contact with food or its packaging can occur.

## Silicone

### Sliding and release agent

WEICON Silicone is a sliding and release agent as well as a preservative and care product for plastic, rubber and metal.

WEICON Silicone provides a durable separating film and good surface properties. It prevents the development of adhesive residue in presses and guides, the adhesion of goods on conveyor belts, chutes and slides. WEICON Silicone protects electrical contacts from moisture, maintains rubber, plastic and metal parts, protects rubber parts from becoming brittle, from freezing and sticking and allows sunroof rails, seat tracks and seatbelts to run smoothly.

## Cutting Fluid\*

### High-performance cutting oil | excellent lubrication | free from mineral oil

WEICON Cutting Fluid contains no mineral oil. Thanks to its exceptionally high lubricating effect, it enables higher cutting speeds, longer tool life and therefore greater cutting performance. WEICON Cutting Fluid can be used for drilling, turning, milling, reaming, sawing, punching and thread cutting of all types of steel, cast iron, stainless steel, copper, brass, aluminium and their alloys in all areas of industry.

## Pneuma-Lube

### Lubricant | corrosion protection | high content of PTFE

As a lubricating and corrosion protection agent, this product is the universal problem-solver for all moving parts in pneumatic equipment and accessories. Its special product formula with a high content of PTFE makes it a multi-purpose product for: lubrication, corrosion protection, cleaning, water displacing and conservation.

Pneuma-Lube not only serves in installation or maintenance of pneumatic equipment and accessories but also can be used on pneumatic tools in operation. The excellent weathering resistance allows the use also in other sectors, e.g. in the on- and offshore industry. The temperature resistance of the spray ranges from -50°C to +210°C (-58°F to 410°F).

### Leak Detector

**DVGW-approval | foam-forming leak detector according to DIN EN 14291 | non-flammable | non-corrosive**

The agent is used for the fast, convenient and reliable location of leaks (cracks or porous spots) in pressurized pipes.

WEICON Leak Detector does not form any hazardous compounds with carbon dioxide (CO<sub>2</sub>), propane, butane, acetylene, oxygen, city or natural gases.

WEICON Leak Detector can be used wherever compressed air, natural or liquid gas is processed, and wherever leaky points can occur on fittings, threaded joints, and connections. It greatly contributes to the safety of pneumatic brakes and gas lines.

► 1 L 10007597 ► 5 L 10002065 ► 10 L 10002066 ► 28 L 10053490

### Leak Detector frost-proof

**DVGW-approval | foam-forming leak detector according to DIN EN 14291 | non-flammable | non-corrosive | frost-proof up to -15°C (+ 5°F)**

The safe, easy and quick way to find leaks or porous spots on gas pipes. Leak Detector frostproof does not form any harmful compounds with these gases: carbon dioxide (CO<sub>2</sub>), propane, butane, acetylene, oxygen, coal and natural gas, nitrogen, dinitrogen monoxide (N<sub>2</sub>O) and CFC and is non-flammable.

Leak Detector frost-proof is suitable wherever compressed air or gaseous substances are being used.

For example, it can be used on pipes, hoses, fittings, screw connections, valves and adapters.

► 1 L 10051092 ► 5 L 10051093 ► 10 L 10051095 ► 28 L 10053497

### Leak Detector viscous

**DVGW-approval | foam-forming leak detector according to DIN EN 14291 | non-flammable | non-corrosive | non-drip**

WEICON Leak Detector viscous is the quick, easy and reliable way to find leaks in gas and compressed air pipes and fittings. The liquid does not form harmful compounds with the following gases: carbon dioxide (CO<sub>2</sub>), propane, butane, acetylene, oxygen, coal and natural gas, nitrogen, dinitrogen monoxide (N<sub>2</sub>O) and CFC and it is non-flammable.

Leak detector is applicable wherever compressed air or gaseous substances are being used. Typical application areas for the spray are pipes, hoses, fittings, screw connections, valves and adapters.

# Technical Liquids

## WSD 400 Pressurized-Air Spray Can

WSD 400 is a refillable spray for the application of most WEICON Technical Liquids.

The can is fillable with compressed air via an adapter (accessories) from the compressed-air ductwork system (optimum working pressure 7,5 bar).

The following accessories for WSD 400 are available:

- ▶ Adapter for filling from every compressed air system
- ▶ Valve set with four different valves and ball valve with intake pipe

## Pump Dispenser WPS 1500

WPS 1500 is a refillable pump dispenser in which many WEICON Technical Liquids can be used. The building-up pressure in the fluid container is achieved by pumping pure air with the pump rod. An integrated security valve opens automatically as soon as the allowed pressure (max. 4 bar) has been exceeded.

Activation of the spray button is enough to achieve steady, uniform fluid emission. By turning the nozzle screw, the rate at which the spray is emitted and the sprayed amount can be smoothly regulated, from strong spray jet to fine spray mist.

The following accessories for WPS 1500 are available:

- ▶ 30 cm plastic extension with 0.8 mm diameter nozzle
- ▶ Sealing sets

Pump Dispenser WPS 1500

10016002

Refillable plastic sprayer with special seals for approx. 1,300 ml Technical Liquid.

www.weicon.com

All kinds of influencing factors, such as moisture and friction, lead to damage due to corrosion, seizure, and wear on machines and installations. Extensive repair and maintenance work at considerable cost are the result.

Especially under critical conditions of application, such as:

- high operation temperatures
- high pressure loads
- outdoor weather conditions

WEICON Anti-Seize assembly pastes are specially developed for these requirements. They are used as protecting and separating agents as well as lubricants for highly stressed parts, especially at high temperatures.

Optimally balanced solids contents as well as selected additives permit a wide range of applications, especially in this area.

Conventional separating agents or lubricants such as mineral oils and greases often cannot provide sufficient lubrication and protection in difficult industrial environments.

Conventional separating agents or lubricants such as mineral oils and greases often cannot provide sufficient lubrication and protection in difficult industrial environments.

The basic components in WEICON Anti-Seize are made of synthetic oils, which have a considerably lower sulphur content than products containing mineral oil. A residue-free vaporisation of the oil at temperatures between +200°C (+392°F) and +250°C (+482°F) is thus possible.

This is particularly important in the case of stainless steels (e.g. for VA material) to prevent stress-corrosion cracking. The safe protection of work pieces and structures made of steel and other metals is thus absolutely necessary for the rational and economic operation of technical installations.

Anti-Seize

# Assembly Pastes

Due to the special formulation and the very fine grinding of the solids contained in WEICON Anti-Seize, irregularities in the protected surface are completely filled – even to a layer thickness of only 12 µm. Only a perfectly sealed surface guarantees a reliable protection against corrosion. An additional sealing effect thus results for special applications, such as flange connections.

WEICON Anti-Seize provides protection against the following:

- ▶ corrosion – seizure – wear
- ▶ stick-slip phenomena
- ▶ oxidation and fretting corrosion
- ▶ electrolytic reactions (“cold welding”)

WEICON Anti-Seize is free of halogens, well-adherent and abrasion-proof, and resistant against hot, cold, and salt water. The extremely low friction coefficient also permits easy disassembly from machines and installations.

In addition, WEICON Anti-Seize assembly pastes are excellent lubricants for statically high-stressed parts and for slowly rotating installations, as long as corresponding relubrication intervals are observed.

With its dual function as a lubricant and corrosion protection agent, WEICON Anti-Seize thus becomes a rationalisation factor, both in terms of saving time and reducing costs.

WEICON Anti-Seize is used sparingly. At a layer thickness of 0.01 mm, 1 kg suffices to cover a surface area of approximately 45 m². Five product variants are available for various areas of application:

Anti-Seize  
Anti-Seize High-Tech  
Copper Paste  
Anti-Seize Nickel

Other

### Anti-Seize

**Reliable protection against corrosion, seizing and cold welding**

WEICON Anti-Seize is used as a protecting, separating and lubricating agent for highly stressed parts. Ideally compatible solid contents and selected additives enable a wide range of usage.

Anti-Seize protects against corrosion, seizure and wear, stick-slip phenomena, oxidation, fretting corrosion and electrolytic reactions ("cold welding").

VIDEO

### Anti-Seize High-Tech

**metal-free**

Anti Seize "High-Tech" is high-temperature-resistant, has excellent separating characteristics, is metal-free, neutral to materials and has an NSF registration.

Anti-Seize "High-Tech" is particularly suitable when metal-containing pastes can cause electrolytic reactions, when nickel-containing products should or may not be used due to health reasons and when dark metal-containing products should or may not be used for visual reasons.

### Anti-Seize Ceramic Paste

**High-performance assembly paste | compatible with stainless steel and other nickel alloys (no chromium-6 formation) | metal-free**

WEICON Anti-Seize Ceramic Paste is a metal- and silicone-free synthetic high-performance assembly paste for universal use. The ceramic paste is resistant to high temperatures, has an exceptionally good release effect and is suitable for any material. The paste contains no free metals and is compatible with stainless steel and other nickel alloys (no chromium-6 formation). The assembly paste is especially suitable when metal-containing pastes can cause electrolytic reactions, when nickel-containing products should or may not be used for health reasons and when dark metal-containing products should or may not be used for visual reasons.

WEICON Anti-Seize Ceramic Paste provides excellent release, protection and lubrication even at high temperatures and high pressure. The paste offers very good protection against corrosion, wear and extreme weather conditions. The assembly paste can be used on bolts, screws, stud bolts, pipe connections, nuts, mechanical seals, etc. Typical areas of application are chemical plants, oil refineries, power stations, paper mills, steelworks and foundries as well as the shipping industry.

## Copper Paste

**Protecting, separating and lubricating agent for highly stressed parts in high-temperature applications**

Copper Paste is corrosion-resistant and strong. It contains no sulphur, lead or nickel.

WEICON Copper Paste is used as an assembly lubricant for all kinds of threaded joints and sliding surfaces. It forms an effective lubricating and separating film which protects the functional surfaces on plug-in tools, wear bushings, screws, and all kinds of threaded, plug-in and bayonet joints against corrosion and seizing.

It can be used to reduce vibration on brake blocks and guides, brake cams and pins, car and truck battery terminals and other electrical connections, wheel bolts and nuts, and on wear bushings at electrical, compressed air and hydraulic hammers. The product can be used in many industrial applications.

## Anti-Seize Nickel

**Assembly paste for extreme conditions**

The assembly paste was developed to resist extreme conditions. It is strongly adherent, water-repellent and resistant to sweet, salt and hot water as well as steam. The high nickel component furthermore provides protection against corroding and corrosive solvents which are contained in diluted hydrochloric acid, sulphur or nitric acid, among others. Anti-Seize Nickel can be applied at a large temperature range between -30°C to +1,450°C.

Anti-Seize Nickel serves as corrosion protection and highperformance fitting grease for static and dynamically extremely stressed screw connections and installation parts and the application at slowly rotating system in the high-temperature range.

The paste protects against corrosion, seizing, wear, stick-slip effects, oxidation and friction corrosion as well as electrolytic reactions, the so-called "cold welding".

For example, Anti-Seize Nickel can be used on seals, valves, screw connections, gear wheels, bearings, jets, conveyor belts, studs, tools or cylinders.

### AL-W

**Special lubricant for underwater applications**

AL-W high performance grease is a special lubricant and corrosion protection which can also be used for underwater applications.

WEICON AL-W offers effective protection against aggressive liquids such as sea or wastewater, both in the maritime sector and in wet plants. WEICON AL-W is suitable for rolling and sliding bearings even in mixed friction operation, for joints, levers, sliding guides, spindles, spline shafts, open gears, worm gears, chains and wire cables and at all sliding speeds permitted for grease lubrication.

### Silicone Grease

**Special lubricant for valves, fittings and sealings | drinking water approval\* | BAM\*\***

Strong and transparent silicone grease with a very good compatibility to plastics, especially for applications on valves, fittings and sealings.

Due to its NSF H1 registration, WEICON Silicone Grease is suitable as lubricant in sensitive areas where inadvertent contact to food is possible. It can be used in the food and beverage industry, in sanitary and heating construction, in the pharma-

ceutical industry as well as in the sealing technology. The grease is particularly material-friendly, neutral in odour and taste and has a temperature resistance of -50°C to +200°C.

WEICON Silicone Grease is suitable for the lubrication of plastics, rubber parts and seals, valves, fittings and gaskets, machines, equipment, slow rotating bearings and as assembly aid for O-rings.

### Silicone Grease HV

**Special lubricant for valves, fittings and sealings | drinking water approval\* | NSF registration | BAM\*\***

Highly viscous, transparent silicone grease with a very good compatibility to plastics, especially for applications on valves, fittings and sealings.

The grease is particularly material-friendly, neutral in odour and taste and has a temperature resistance of -50 °C to +200 °C. Tested by the Ruhr Region Institute of Hygiene („Hygiene- Institut des Ruhrgebiets“) according to the Hygienic Assessment of Lubricants in Contact with Drinking Water by the Federal Environmental Agency of Germany.

Polyphenylene oxide	++	++	++	++	++	++	++
PS - Polystyrene	+	+	+	++	+	++	++
PTFE - Polytetrafluor ethylene	++	++	++	++	++	++	++
PUR - Polyurethane	+	+	+	++	+	++	++
PVC - Polyvinylchloride	++	++	++	++	++	++	++
TPE - Thermoplastic elastomers	0	0	0	0	0	++	++

++ resistant    + resistant to a limited extent    0 not tested, preliminary trials or resistance tests are recommended    -- not resistant

The stated resistance levels are based on laboratory tests and literature notices. A guarantee cannot be provided due to the large number of raw materials used on the one hand and the complex chemical and morphological structure of the polymers on the other. In critical application cases we recommend that you carry out tests and/or consult with our application technology department.

WEICON TOOLS®

# Stripping Tools

reddot winner 2020

Quality and continuity “Made in Germany”  
**INNOVATIVE AND RELIABLE!**

# WEICON TOOLS®

Member of the German Tool Industry Association

We have been developing, manufacturing and distributing high-quality wire stripping tools since 1967.

We present these tools at more than 40 fairs and trade shows every year, all over the world. We keep in constant contact with our users, who tell us about new developments in their work processes and, that way, give us ideas and requests for new or improved WEICON TOOLS.

reddot winner 2020

In the development of our high-quality stripping tools, we have been working together with the company Krampe from Ascheberg-Herbern near Muenster since 1990.

Our consistent key focus in the production process is on precision to ensure that the products we offer are always of exceptional quality.

Our products are made of high-quality materials, hold numerous certificates and are characterised by their outstanding functionality and durability.

# Green Line®

Stripping Tools made from up to  
97% renewable materials

## What is Green Line?

Together with a group of experts, we have developed the **WEICON TOOLS Green Line®**. A tool range made of up to 97 % renewable raw material.

**97 %**  
made from renewable  
resources

## Proven quality

What can we do to enable a sustainable future? That is a question not only many people ask themselves in regards to their own homes, but also more and more companies. We at WEICON have also been tackling this issue for many years.

That is why we have developed the **WEICON TOOLS Green Line®**. In terms of quality, they are in no way inferior to our classic line and are just as robust and durable.

### The material used:

- ▶ is based on plant oils, natural waxes, fibres and minerals
- ▶ is largely produced without the use of the finite resource crude oil
- ▶ has polyamide-like characteristics
- ▶ is produced with renewable energy

### Production with energy generated in-house

Our tools are produced almost entirely with energy generated in-house – thanks to photovoltaic systems.

### Green electricity

At our headquarters in Germany, we now rely on 100 % green electricity.

### Cardboard instead of plastic

Our WEICON TOOLS come in a recyclable cardboard packaging.

### Resource-saving production

Faulty tools as well as the sprue produced during injection moulding are remelted at the beginning of the production chain.

### Repairing instead of replacing

Our WEICON TOOLS are part of the WEICON company – a producer of special chemical products for industrial use. Chemicals and sustainability are incompatible? Not necessarily. With the help of our products, many things can be repaired instead of thrown out and replaced.

# CABLE STRIPPER S 4-28

- ▶ ergonomically designed and fully insulated
- ▶ infinitely adjustable and easy-to-use adjusting wheel
- ▶ precise, quick and safe stripping

## No. S 4-28 Spiral **NEW**

Round, longitudinal and spiral cuts for soft and hard cable insulations

- ▶ for all standard round cables with a diameter of 4 to 28 mm
- ▶ with integrated self-retracting safety blade, which automatically retracts in case of misuse to prevent cuts and injuries
- ▶ blade depth comfortably adjustable from 0-3 mm thanks to lockable adjusting screw (in steps of 0.1 mm)
- ▶ cutting depth 0-3 mm

mm	g	mm²	Ømm	Art.-No.
145	80	-	4-28	10101939

Working range  
**4-28 mm Ø**

## No. S 4-28 Multi

Stripping function integrated in the housing

- ▶ stripping of all standard flexible and solid cables with a cross-diameter between 0.5 and 6 mm²

mm	g	mm²	Ømm	Art.-No.	Green Line (s. page 217)
145	61	0.5-6 (20-10 AWG)	4-28	10030001	10061989

# FLAT AND ROUND CABLE STRIPPER

Enables circular and longitudinal cuts on both flat and round cables

- ▶ for all common flat cables up to a width of 18 mm
- ▶ for all common round cables with a diameter of 6 to 13 mm
- ▶ enables circular and longitudinal cuts on both flat and round cables
- ▶ stripping function integrated in the housing (from 0.5 to 6 mm<sup>2</sup>)
- ▶ precise work even in very narrow spaces, such as in junction boxes or cable ducts
- ▶ cutting depth 0-3 mm
- ▶ blade depth comfortably adjustable from 0-3 mm thanks to lockable adjusting screw (in steps of 0.1 mm)
- ▶ ergonomically shaped handle

mm	g	mm <sup>2</sup>	Flat cables	Round cables	Art.-No.	Green Line (s. page 217)	
164	106	0,5-6 (20-10 AWG)	18 mm	6-13 Ømm	10068090	10105565	

up to 18 mm

# CABLE STRIPPERS

- ▶ ergonomically designed and fully insulated
- ▶ infinitely adjustable and easy-to-use adjusting wheel
- ▶ precise, quick and safe stripping

**modified**  
**Ideal**  
**handle shape**  
**design**

## Working range

- ▶ for all standard round cables from **4-28 mm Ø**

## Design and ergonomics

- ▶ large handle diameter with grip zones for optimal haptics and non-slip work
- ▶ 2-component handle with "ice crack" design

## Adjusting wheel

- ▶ easily accessible adjusting wheel for regulation of the cutting depth

## Safety

- ▶ safety cap on hook blade reduces risk of injury

## Bayonet mount

- ▶ fast tool-free change of blades with bayonet mount

# WIRE STRIPPERS

Automatic wire strippers for all common stranded and solid conductors. A scanning system adjusts automatically to the respective wire diameter, and thus permits fast and simple dismantling and stripping.

## NEW LED WORK LIGHT

### LED

- ▶ luminous flux in lumen 250 lm
- ▶ excellent visibility when stripping cables in dark rooms or in outdoor areas

### Compact design

- ▶ housing made of polycarbonate
- ▶ water and dust resistance according to IP 65
- ▶ small, lightweight and robust

### Light functions

- ▶ adjustable in three levels
- ▶ flush-mounted integrated switch
- ▶ fully illuminates the work area

### Modular

- ▶ the housing can be attached to many WEICON TOOLS Wire Strippers as an upgrade
- ▶ suitable for: No. 5, No. 5 Pro, No. 5 Classic, No. 5 Solar Pro, No. 7 Magic, No. 7F, No. 7 Solar

### MOUNTABLE ON BOTH SIDES

### Battery

- ▶ maximum runtime (for 2. level): 2 hours
- ▶ charging time: approx. 40 minutes
- ▶ battery capacity: 180 mAh
- ▶ lithium-battery

### Power supply

- ▶ lithium-battery (rechargeable with supplied USB-C cable)
- ▶ charging port protected with dust cap

### Scope of delivery

- ▶ incl. USB-C connection cable
- ▶ instruction manual

# WIRE STRIPPERS

## No. 7 Magic

The all-rounder for stripping and dismantling  
Pat.no. EP 1 671 407 B1

- ▶ for many different cable types in building installation
- ▶ precise work with optical length scale
- ▶ integrated, well accessible side cutter up to 3 mm Ø

mm	g	Round cables	mm <sup>2</sup>	Art.-No.
170	217	stranded solid	0.5-16 (20-6 AWG) 0.5-10 (20-8 AWG)	10018202

## No. 7-F

Stripping and dismantling of all standard flat cables  
Pat.no. EP 1 671 407 B1

- ▶ precise work with optical length scale
- ▶ integrated, well accessible side cutter up to 3 mm Ø

mm	g	mm <sup>2</sup>	Art.-No.
170	220	flat cables 0.75-4 (18-11 AWG)	10017050

DBGM 20 2019 107 281.4

## Precision Wire Stripper S

**Fast, easy and precise stripping of thin wires and conductors**

Semi-automatic wire stripper for the fast and safe stripping of very fine conductors, strands or wires with small diameters in the range of 0.12-0.8 mm Ø (36-20 AWG). With the adjustable scaled length stop for the working range from 5 to 45 millimetres, the desired stripping length can be set quickly and reliably.

mm	g		Ø	Art.-No.	Green Line (s. page 217)
112	45	stranded solid	0.12-0.8 mm	10055930	10062000

## ESD Precision Wire Stripper

\* ESD = dissipative  
ESD material protects  
against electrostatic  
discharge

mm	g		Ø	Art.-No.
112	45	stranded solid	0.12-0.8 mm	10006673

## Fibre Optic Stripper

10057551

mm	g	Cable type	Ø	Art.-No.
112	45	fibre optic Ø 0.125 mm	primary coating Ø 0.200-0.250 mm	10057551

**fast and easy stripping of fibre optic primary coatings 200-250 µm**

- ▶ for removing the primary coating on fibre optic cables Ø 0.125 mm
- ▶ blade Ø 0.16 mm, opening for cable insertion Ø 0,35 mm
- ▶ precise working thanks to adjustable length stop from 5-45 mm
- ▶ professional cable stripping technology
- ▶ suitable for right- and left-handed users

LWL primary coating  
Ø 0.200-0.250 mm  
(200-250 µm)

fibre optic  
Ø 0.125 mm (125 µm)

# STRIPPING TOOLS

Our stripping tools allow a range of different cables to be safely and conveniently stripped. The flexible tools can even be reliably used in hard-to-reach areas and always provide precise results.

## Coax-Stripper No. 1 F Plus

Quick dismantling and stripping of coaxial cables with only one working step

- ▶ space-saving assembly and disassembly of F-connectors due to integrated open hexagon wrench with 11 mm width across flats
- ▶ gripping jaws for screwing F-connectors onto the cable
- ▶ changeable module inserts via click system

DBGM 20 2017 107 094

mm	g		Ømm	Art.-No.	Green Line (s. page 217)
125	47	for compression connectors	6.0-8.0	10052731	
125	47	for F-screw connectors	6.0-8.0	10051150	10062002
125	47	for compression connectors*	4.0-5.0	10055142	

\*for mini coaxial cables

For further information and illustrations, take a look at page 244 with our spare parts!

### Coax-Stripper No. 2

**Good handling due to ergonomic design**

- ▶ two-level stripping of all common coaxial cables
- ▶ there is no need to adjust the cutting depth
- ▶ also suitable for flexible cables
- ▶ \*length scale (0-17 mm) integrated in the housing

mm	g	Ømm	Art.-No.	Green Line (s. page 217)
110	28	4.8-7.5	10006875	10062004

### Fibre Optic Tube No. 2

Tool for stripping special buffer tubes on fibre optic cables with a diameter of 1.2 mm to 4 mm. Works with core sleeves, e.g. made of PE, with wall thicknesses of 0.15 mm to 0.6 mm.

- ▶ precisely cuts the PE tubes on fibre optic cables
- ▶ fast stripping of the loose tubes
- ▶ modular pair of blades for fibre optic tubes

mm	g	Ømm	Art.-No.
110	36	-	10062188

### Stripper No. 2 Cat

**Easy handling thanks to ergonomic shape**

- ▶ for insulated PVC data cables (e.g. Cat5, Cat6, Cat7, twisted-pair cables) with a diameter of 4.5-10 mm
- ▶ adjusting the cutting depth manually is not necessary
- ▶ the precise adjustment of the blade removes the outer jacket accurately. With the second blade, the foil shield is slit open carefully and can then be easily removed

mm	g	Ømm	Art.-No.
110	28	4.5-10	10054014

### Profibus Stripper No. 2

Stripping tool for e.g. shielded Profibus data cables with a diameter of 5.5 mm to 8 mm, e.g. installing for FastConnect connectors

- ▶ cut optimised for FastConnect connectors
- ▶ optical length scale optimised for different connector types
- ▶ modular pair of blades for Profibus

mm	g	Ømm	Art.-No.
110	35	5.5-8.0	10062190

# STRIPPING TOOLS

## Round Cable Stripper No. 13

Safe work with the ergonomic  
anti-slip handle shape

- ▶ for all standard round cables
- ▶ flush stripping, even in hard-to-reach areas
- ▶ it is not necessary to adjust the cutting depth

mm	g	Ømm	Art.-No.	Green Line (s. page 217)
140	48	6-13	10006883	10062008

6-13 mm  
Increased  
stripping range  
6-13 mm

## Round Cable Stripper No. 13 Classic

Safe work with the ergonomic  
anti-slip handle shape

- ▶ for all standard round cables
- ▶ flush stripping, even in hard-to-reach areas
- ▶ it is not necessary to adjust the cutting depth

mm	g	Ømm	Art.-No.
120	44	8-13	10049329

## Cat Cable-Stripper No. 10

Easy and space-saving stripping of  
data and network cables

- ▶ suitable for e.g. Cat5, Cat6, Cat7 twisted-pair cables (4.5-10mm Ø)
- ▶ integrated length stop, adjustable to the required length
- ▶ safe work with the ergonomic anti-slip handle shape

mm	g	Ømm	Art.-No.
140	48	4.5-10	10051142

### Quadro-Stripper No. 16

#### Multifunctional with optimized cable routing

- circular and longitudinal cutting - stripping - cutting
- exchangeable hook blade, firmly locked in any position
- anti-slip handle shape

mm	g	mm²	Ømm	Art.-No.	Green Line (s. page 217)
125	53	0.5-6 (20-10 AWG)	8-13	10038853	10062006

WEICON TOOLS®

Other

### Combi-Coax No. 3

#### Parallel blade arrangement allows even faster stripping

- allows two- or three-level stripping of all common coaxial cables
- also suitable for flexible cables
- integrated and well accessible side cutter up to 8 mm Ø

mm	g	Ømm	Art.-No.
125	55	4.8-7.5	10013082

# MULTI-PURPOSE STRIPPERS

WEICON TOOLS multi-purpose strippers provide various functions: circular and longitudinal stripping, dismantling and cutting. This allows professional dismantling and stripping with just one tool.

## Mini-Duo No. 150

### Automatic wire stripper

- ▶ allows quick and accurate stripping
- ▶ precise work with integrated length scale
- ▶ easily accessible built-in side cutter for cables up to 6 mm<sup>2</sup>

mm	g	mm <sup>2</sup>	Art.-No.
160	112	0,5-6 (20-10 AWG)	10007413

## Duo-Stripper No. 200

### Professional dismantling and stripping

- ▶ quick and simple stripping from 0.5 mm<sup>2</sup> to 6.0 mm<sup>2</sup>
- ▶ dismantling: working range 4-28 mm Ø
- ▶ spare blade in the handle case

mm	g	mm <sup>2</sup>	Ømm	Art.-No.
160	123	0,5-6 (20-10 AWG)	4-28	10006853

VIDEO

### Duo-Crimp No. 300

Stripping and crimping with just one tool

- insulation removal from 0.5 mm<sup>2</sup> to 6,0 mm<sup>2</sup>
- two crimping ranges are offered (0.5-2,5 mm<sup>2</sup> and 4.0-6.0 mm<sup>2</sup>) according to DIN 46228-2
- integrated, well accessible side cutter up to 6 mm<sup>2</sup>

mm	g	mm <sup>2</sup>	Art.-No.	Green Line (s. page 217)
160	116	0,5-6 (20-10 AWG)	10007406	10062010

# MULTI-PURPOSE STRIPPERS

## Multi-Stripper No. 400

**Multifunctional with 4 functions**

- circular cutting - longitudinal cutting - stripping - cutting
- flush stripping, even in hard-to-reach areas
- safe and space-saving storage with closing clip

mm	g	mm <sup>2</sup>	Ømm	Art.-No.	Green Line (s. page 217)
155	79	0,5-6 (20-10 AWG)	8-13	10001620	10062014

VIDEO

### Data-Strip No. 30

Inner blade can be set to the insulation thickness

- removal of the outer insulation on data cables
- stripping of conductors and stranded wires, e.g. telephone lines
- precise stripping with adjustable length stop (3.5-14 mm)
- integrated, well accessible side cutter up to 8 mm Ø

mm	g	mm²	Ømm	Art.-No.
125	60	0,05-0,5 (0,2-0,8 Ø) (30-20 AWG)	4-10	10033530

3

### Stripper No. 100

Universal tool for dismantling and stripping

- for many different cable types in building installation
- flush stripping on ceilings and walls
- allows circular and longitudinal stripping

mm	g	mm²	Ømm	Art.-No.	Green Line (s. page 217)
140	74	0,5-16 (20-6 AWG)	4-13	10006798	10062016

# CRIMPING TOOLS

The crimp tools were developed for the reliable crimping of various electrical connections. These tools have a ratchet mechanism with a blocking device to ensure a consistently high crimping quality and results that can be precisely repeated. The accurate eccentric setting ensures a high crimping quality thanks to the precisely adjustable crimping force.

## 16 mm<sup>2</sup> HEX **NEW**

hexagonal crimp facilitates insertion into round terminals

- ▶ precise work thanks to ratchet mechanism with blocking device
- ▶ process-safe crimping – tool only opens after the crimping process
- ▶ emergency release in the handle (in the event of misuse)
- ▶ working range from 0.5-16 mm<sup>2</sup> (AWG 20-5)
- ▶ serrated dies made from multi-hardened carbon steel
- ▶ eccentric setting for precisely adjustable crimping force
- ▶ comfortable feel thanks to 2-component handles

mm	g	mm <sup>2</sup>	Art.-No.
222	586	0.5-16 (20-5 AWG)	10100513

## MC4 **NEW**

For all standard solar connectors MC4 | 2.5 / 4 / 6 mm<sup>2</sup>

- ▶ precise work thanks to ratchet mechanism with blocking device
- ▶ process-safe crimping – tool only opens after the crimping process
- ▶ emergency release in the handle (in the event of misuse)
- ▶ modular Multi Change System for quick module changes
- ▶ eccentric setting for adjusting the crimping force
- ▶ comfortable feel thanks to 2-component handles

mm	g	Art.-No.
180	378	10100514

### Module

102	2.5/4/6 mm <sup>2</sup> 14-10 AWG	
-----	--------------------------------------	--

**Multi NEW****Universal crimp tool for various types of electrical connections**

- ▶ precise work thanks to ratchet mechanism with blocking device
- ▶ process-safe crimping – tool only opens after the crimping process
- ▶ emergency release in the handle (in the event of misuse)
- ▶ set of 3: modules for MC4 connectors/insulated wire end ferrules/insulated cable lugs
- ▶ modular Multi Change System for quick module changes
- ▶ eccentric setting for adjusting the crimping force
- ▶ comfortable feel thanks to 2-component handles

mm	g	Art.-No.
180	378	10100515

Interchangeable insert	Module number 100	0.25-2.5 mm <sup>2</sup> 24-14 AWG		
	Module number 101	0.25-6.0 mm <sup>2</sup> 24-10 AWG		
	Module number 102	2.5/4/6 mm <sup>2</sup> 14-10 AWG		

**Storage**

- ▶ safe storage of the modules in a box
- ▶ faster access to the modules
- ▶ dust-protected storage

**ERGO NEW****Universal and ergonomic crimp tool for various types of electrical connections**

- ▶ precise work thanks to ratchet mechanism with blocking device
- ▶ process-safe crimping – tool only opens after the crimping process
- ▶ emergency release in the handle (in the event of misuse)
- ▶ set of 3: modules for MC4 connectors/insulated wire end ferrules/insulated cable lugs
- ▶ modular Multi Change System for quick module changes
- ▶ eccentric setting for adjusting the crimping force
- ▶ comfortable feel thanks to 2-component handles

mm	g	Art.-No.
239	534	10100516

Interchangeable insert	Module number 200	0.5-6 mm <sup>2</sup> 22-10 AWG		
	Module number 201	0.25-6.0 mm <sup>2</sup> 24-10 AWG		
	Module number 202	2.5/4/6 mm <sup>2</sup> 14-10 AWG		

**Storage**

- ▶ safe storage of the modules in a box
- ▶ faster access to the modules
- ▶ dust-protected storage

# SOLAR

## SPECIAL TOOLS

For the stripping and skinning of common photovoltaic cables such as H1Z2Z2-K with a cross-section of 1.5 - 10 mm<sup>2</sup>

1.5-10 mm<sup>2</sup>  
Especially for  
the solar sector  
16-8 AWG

### Side cutter

- ▶ powerful integrated side cutter up to 3 mm Cu/AL

### Safety

- ▶ locking mechanism for safe storage
- ▶ tool can be closed and locked for space-saving storage

### High performance

- ▶ modular, exchangeable blades
- ▶ new stripping range from 1.5-10 mm<sup>2</sup> (16-8 AWG)
- ▶ galvanised, hardened blades
- ▶ suitable for all photovoltaic wires e.g. H1Z2Z2-K 1.5 to 10 mm<sup>2</sup>

### Precision and efficiency

- ▶ precise working thanks to adjustable length stop
- ▶ extended setting from 5-25 mm
- ▶ smooth-running, wear-resistant mechanism

### Design and ergonomics

- ▶ 2-component handle with "ice crack" design
- ▶ maximum force transmission
- ▶ ergonomic and non-slip
- ▶ comfortable feel

### Protection

- ▶ integrated eyelet for attaching a drop guard

### Individualisation

- ▶ optional customisation of the tool with an individual name or number

copper conductor

tin plating

cross-linked polyolefin copolymer according to EN 50618

H1Z2Z2-K

also available  
without LED

125	58	4/6 (12/10 AWG)	10065752
125	58	10/16 (8/6 AWG)	10065754

# SPECIAL TOOLS

For a series of unusual applications, we provide you with special tools which meet these requirements. Whether it is the dismantling of large cable diameters, tools for the solar industry or working on high voltage cables, WEICON TOOLS has the solution!

## LSA Sensor No. 40

For the solderless, screwless and no-stripping inserting and simultaneously cutting of wire ends into LSA punch-down blocks

- ▶ with built-in retractable hook and unlocking blade
- ▶ for conductor diameters 0.35-0.9 mm and wire diameters 0.7-2.6 mm
- ▶ has a sensor for tracing the wire end position

mm	g	Ømm	Art.-No.
185	60	0.35-0.9	10054013

## Electrician Scissors XL

### Cutting - stripping - crimping

- ▶ high cutting performance
- ▶ large diameter to ensure safe and easy use – suitable for small and large hands
- ▶ blades made of special stainless steel
- ▶ secure screw joint that can be readjusted if necessary
- ▶ a safety box is included for safe storage

mm	g	Cu/Al	Art.-No.
160	117	<50 mm <sup>2</sup>	10100025

**CUTTING  
STRIPPING  
CRIMPING**

## Cable Scissors No. 35

### Cutting - stripping - crimping

- ▶ 2-component handles for increased safety
- ▶ high cutting performance
- ▶ blades made of special stainless steel

mm	g	Cu/Al	Cu/Al	Art.-No.
150	90	<35 mm <sup>2</sup>	<50 mm <sup>2</sup>	10039667

Including safetybox  
with belt clip

## SPECIAL TOOLS

### Cable Stripper No. 4 - 29 Spiral

round, longitudinal and circular cutting for soft and rigid cable insulations

- ▶ for all common round cables from 4.5-29 mm Ø
- ▶ cutting depth can be set comfortably from 0-3 mm with lockable control knob in 0.1 mm steps

mm	g	Ømm	Art.-No.
140	136	4.5-29	10058056

VIDEO

### Cable Stripper H.D. No. 1000

1.000 V  
IEC: 60900

Working with voltage up to 1000 Volt\*  
Unit testing according to DIN EN 60900

- ▶ quick cutting of cables with multiple insulations
- ▶ conductor protection with the curved blade tip
- ▶ good transfer of force due to optimised handle shape

mm	g	Art.-No.
215	93	10006865

\*Tools with safety insulation are basic prerequisites for working on live wires and parts.  
Please always pay attention to the legal regulations and follow the corresponding safety advice!

### Dismantling Tool No. 25

For convenient longitudinal and circular cuts

- ▶ safe working thanks to concealed blade
- ▶ wire protection thanks to rounded blade tip
- ▶ easy working even in low temperatures
- ▶ precise, durable, replaceable turning blade

mm	g	Ømm	mm	Art.-No.
210	163	>25 mm	0-5,0 mm	10034292

### Multi-Opener

The ideal tool for the gentle opening of sensitive equipment and dismounting of clipped housings

- ▶ no scratching of sensitive surfaces
- ▶ dissipative ESD material protects against electrostatic discharge
- ▶ flexible fibreglass-reinforced polyamide
- ▶ stainless steel blade to remove adhesive residues

mm	g	Surface Resistance	Art.-No.
180	22	approx. $10^9 \Omega$	10044966

### Easy Opener®

Special tool for the gentle disassembly of sensitive components without damaging the material

- ▶ ideal for loosening switches, luminaires or similar components
- ▶ flexible and stable at the same time
- ▶ three surfaces with different material thickness

mm	g	Art.-No.
180	22	10049687

### MC4 Solar Spanner

Set of 2

- ▶ solar spanner made of fibreglass-reinforced plastic
- ▶ universal tool for mounting solar panels with MC4 connections
- ▶ suitable for: MC4 connectors
- ▶ with integrated unlocking tool for solar connectors

mm	g	Art.-No.
135	42	10101299

# TOOL SETS

With our tool sets, we can offer solutions for almost all industries and many different applications.

## Crimp-Set Pro

Allround equipment for crimping with wire ends

- Duo-Crimp No. 300

WEICON TOOLS®

Other

The cable types shown in the table below are only meant to give an overview of the potential application areas of our tools. WEICON TOOLS can also be used on similar cable types in many cases, of course.

Furthermore, the application suggestions depend on the material, application area and working range. Our tool recommendation is only a suggestion due to the various materials used by cable manufacturers.

# CABLE OVERVIEW

Category	Cable	Wire diameter Example type	Name	Suggested application Dismantling	Suggested application Stripping
<b>Installation Lines</b> (solid conductors)		 (N)YM	PVC coated conductor	All Cable Strippers, No. 13, No. 16, No. 100, No. 200, No. 400, No. 7 Magic	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 400, No. 200
		 NHXMH	Halogen-free sheathed cable (PVC-free)	All Cable Strippers, No. 13, No. 16, No. 100, No. 200, No. 400, No. 7 Magic	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 400, No. 200
		 NI2XY	Installation line (concrete line)	All Cable Strippers, No. 13, No. 16, No. 100, No. 200, No. 400, No. 7 Magic	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 400, No. 200
		 H05V-U	PVC single wire core conductor	---	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 400
		 H07V-R	PVC multiple wire core conductor	---	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 100
			PVC flat twin and earth cable	Flat and Round Cable Stripper, No. 7-F	Flat and Round Cable Stripper, No. 7-F
			Flat rubber cable for medium mechanical loads	Flat and Round Cable Stripper, No. 7-F	Flat and Round Cable Stripper, No. 7-F
		 JB-Y(ST)Y	Installation cable for fire alarm systems	No. 2 Cat, No. 10, No. 30	No. 30
<b>Control and Electrical Lines</b> (stranded conductors)		 H05VV-F	PVC sheathed cable for low mechanical loads	All Cable Strippers (working range from 4 mm), No. 3, No. 200, No. 7 Magic	No. 2, No. 3, No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 400
		 H05RR-F	Rubber tube conductor for light mechanical loads	All Cable Strippers, No. 7 Magic, No. 13, No. 16, No. 100, No. 200, No. 400	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 400
		 (N)FLG6u	Rubber control line	All Cable Strippers, No. 7 Magic, No. 13, No. 16, No. 100, No. 200, No. 400	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 400
		 XYMM K3	PVC construction cable	All Cable Strippers, No. 7 Magic, No. 13, No. 16, No. 100, No. 200, No. 400	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 400
			PVC control line	All Cable Strippers, No. 7 Magic, No. 13, No. 16, No. 100, No. 200, No. 400	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 400
		 H05VV5-F	PVC control line oil resistant	All Cable Strippers, No. 7 Magic, No. 13, No. 16, No. 100, No. 200, No. 400	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 400
		 H05VV-F	PVC hose line for medium mechanical stresses	All Cable Strippers, No. 7 Magic, No. 13, No. 16, No. 100, No. 200, No. 400	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 400
		 H05V-K	PVC fine wire core conductor	---	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 300, No. 400, Precision Wire Stripper S/ESD
		 H07V-K	PVC wiring conductor fine wire	---	No. S 4-28 Multi, Flat and Round Cable Stripper, No. 5 Pro, No. 5, No. 6, No. 7 Magic, No. 7-F, No. 16, No. 100, No. 200, No. 300, No. 400, Precision Wire Stripper S/ESD
		 LFZ-XY	Special PVC loud speaker cable	---	Flat and Round Cable Stripper, No. 7 Magic, No. 7-F
		 LFZ-XY	Special PVC loud speaker cable	---	Flat and Round Cable Stripper, No. 7 Magic, No. 7-F

Category	Cable	Wire diameter Example type	Name	Suggested application Dismantling	Suggested application Stripping
Control and Electrical Lines (stranded conductors)		 (H)03VH-H	PVC twin conductor	---	No. 7 Magic, No. 7-F, Flat and Round Cable Stripper
		 H1Z2Z2-K	Solar cable	Mini-Solar, No. 7 Solar, No. 5 Solar Pro	Mini-Solar, No. 7 Solar, No. 5 Solar Pro
		 LiYY	Electronic control line	No. 2 Cat, No. 10, No. 30	No. 30, Precision Wire Stripper S/ESD
		 SiF	Silicone core conductor	---	No. 2, No. 3
		 H07RN-F	Heavy rubber hose line fine-stranded	No. 13 Classic	No. 5 Pro, No. 5, No. 16, No. 400, No.100
		 H07BQ-F	PUR connection and control cable fine-stranded	Cable Stripper No. 4-28 H, Cable Stripper No. 4-29 Spiral, No. 13 Classic	No. 5 Pro, No. 5, No. 16, No. 400
		 SiHF	Silicone connection and control line	No. 13, No. 13 Classic, No. 16, Cable Stripper No. 4-28 H	No. 5 Pro, No. 5, No. 16, No. 400
Data Cables   Fibre Optic Cables   Coaxial Cables		 RG 59 B/U	Coaxial cable for the transmission of high frequency signals	No. 1, No. 2, No. 3, No. 100	No. 1, No. 2, No. 3, No. 100

## Pre- and Post-treatment of Surfaces

Primer M 100	25 ml	Pre-treatment for bonding non-absorbent surfaces like metals, plastics, lacquered surfaces	10060606
	250 ml		10023566
Primer K 200	25 ml	Pre-treatment for bonding non-absorbent surfaces and lacquered plastic surfaces as well as elastomeres e.g. EPDM.	10060609
	250 ml		10023567
Primer S 300	25 ml	Pre-treatment of porous and absorbent background.	10060610
	250 ml		10023568
Primer P 400	25 ml	Pre-treatment of polyolefines e.g. TPE, PE, PP.	10060612
	250 ml		10023569
Primer E 500	25 ml	Especially for silicone - for pre-treating non-absorbent surfaces such as aluminium, VA steel, brass, copper, zinc, tinplate and enamel, ceramic and glass as well as plastics such as ABS, PVC hard, PA6.6, GFC etc.	10060616
	250 ml		10035220
1K Primer G	50 ml	Special bonding agent for urethanes to pre-treat rubber and metal surfaces.	10104191
Activating Cleaner	400 ml	Cleaner and primer in one product. For the pretreatment of bonding surfaces.	10062859
Smoothing Agent	500 ml	The Smoothing Agent is a transparent mixture of non-ionic surface activators. Applying it makes it possible to easily and cleanly smoothe all WEICON Elastic Adhesives and Sealants such as silicone, MS polymers, polyurethane, etc. prior to skin formation.	10038838
	5 L		10039360
Activator for RK-1300 & RK-1500	100 ml	Activator (100 ml pump dispenser or 1 l bottle) for processing RK cartridges and large containers.	10000128
	1 L		10000131
CA Primer for Polyolefines	10 ml	Pre-treatment for bonding polyolefines in combination with WEICON Contact Cyanoacrylates.	10000275
	100 ml		10000278
	1 L		10000279
CA-Activator Spray	150 ml	Accelerates the curing time of WEICON Contact Cyanoacrylate Adhesives.	10000282
	1 L		10002852
CA-Activator Spray AC	150 ml	Activator for cyanoacrylate adhesive on the basis of acetone. For joints without "blooming" effect, especially with high-viscosity types and larger adhesive layers.	10033805
	1 L		10025897
CA-Remover	30 ml	Breaks down and removes all types of cyanoacrylate adhesives. Suitable for cleaning metal parts, tools, and many other surfaces that have come into contact with cyanoacrylate adhesives.	10051358
CA-Activator Spray PS	150 ml	Heptane-based curing accelerator for WEICON Cyanoacrylate Adhesives with pump spray head – used to wet the surfaces to be bonded.	10067893

# Ancillary Products and Accessories

## Pre- and Post-treatment of Surfaces

Surface Cleaner	150 ml	WEICON Surface Cleaner is used for the cleaning and degreasing of surfaces to be joined or sealed with WEICON Adhesives and Sealants.	10024317
	400 ml		10024313
	1 L		10025301
	5 L		10025288
	10 L		10025292
	28 L		10053467
Activator F Spray	200 ml	Pre-treatment with WEICON Activator F can reduce the curing time considerably. The Activator is recommended for all passive surfaces as well as for low ambient temperatures (< +10°C/+50°C) and for large bonding gaps.	10021433
Activator F Liquid	1 L		10007773
Mould release agent Wax P 500	500 g	Wax P 500 is a release agent on a waxy basis for epoxy resins and polyurethanes. It is especially suitable for release processes from rough and/or porous surfaces.	10026171
Mould release agent Liquid F 1000	1 L	Liquid F 1000 is a release agent on a waxy basis for epoxy resins and polyurethanes. It is especially suitable for release processes from smooth and non-absorbent surfaces.	10026167

## Mixing and Dosing Systems

Hand Dispenser D 50 10:1		Suitable for Easy-Mix PE-PP 45.	10059295
Manual Dispenser	1:1/2:1	Application aid for Easy-Mix products in 50 ml cartridge. Pusher for mixing ratios 1:1 and 2:1.	10101999
	10:1	Application aid for Easy-Mix products in 50 ml cartridge. Pusher for mixing ratio 10:1.	10102860
Mixing nozzle 10:1 B	10 g	Suitable for VA 2407 10 g.	10063091
	50 g	Suitable for Easy Mix PE-PP 45.	10023115
Dispenser Easy-Mix D 50	1:1	Suitable for all Easy-Mix types and PE-PP. Not suitable for VA 2407.	10005237
	2:1	Suitable for all Easy-Mix types and PE-PP. Not suitable for VA 2407.	
Special Piston	1:1, 2:1	For adapting the Easy-Mix D50 dosing gun to Easy-Mix PE-PP 45	10022280
	10:1	For adapting the Easy-Mix D50 dosing gun to Easy-Mix PE-PP 45	10023341
Quadro Mixing Nozzle B		Quadro Mixing Nozzle suitable for Plastic-Bond, Easy-Mix RK-7000, RK-7100, RK-7100 black, RK-7200, RK-7300	10029793
Quadro Mixing Nozzle A		Quadro Mixing Nozzle suitable for Epoxy Minute Adhesive, Aluminium Minute Adhesive, Plastic-Bond Easy-Mix: PU 90, Easy-Mix PU 240, PU Crystal, S 50, S 50 yellow, N 50, N 5000	10005236
Helix Mixing Nozzle B		Helix Mixing Nozzle suitable for Easy-Mix PE-PP 50	10030395
Helix Mixing Nozzle A		Helix Mixing Nozzle suitable for Easy-Mix HT 180, Easy-Mix HT 250, Easy-Mix Metal	10026925
Glass Fibre Cloth Tape		Improves adhesion and pressure resistance of WEICON epoxy resins at many repair and maintenance jobs.	10000913
Injection Packer Set		System for gap compensation on bridges, pillars, machines, and plants. For processing gap-bridging products (WEICON Plastic Metal). The Injection Packer Set comprises a threaded nozzle R1/4"-8 PA6, one metre tube PE 10x8 mm, and a tube valve PE. Injection Packers are available in the sizes 50x30x10 mm and 50x25x25 mm.	10057667
		Injection Packer / flat	10057731
		Injection Packer / rectangular	10057730
Processing Spatula	short (20.5 cm)	For universal use, e. g. processing of two-component adhesives, application of epoxy pastes, removal of adhesive residues, and many others. Available in two different sizes.	10010887
	long (25.5 cm)		10022562
Universal Spatula White		Special spatula for the gentle removal of the most diverse contamination and residues.	10039185
Contour Spatula Flexy		Versatile use, e.g. for coating and processing two-component adhesives. The spatula is perfect for applying adhesives on large or small surfaces. The spatula is made of wear-resistant polyamide.	10010066
Spiral Stirrer stainless steel		Spiral stirrer stainless steel.	10001978
Double Nozzle		Multifunctional spray head for exact dosage in areas difficult to access. Suitable for more than 40 WEICON sprays.	10044969
Dosing Tips A Size 0.5		For WEICON Easy-Mix types, for even more accurate dispensing (except for HT 180, RK-7300 and PE-PP) and for the precise, meticulous and economical application of WEICON Contact	10068261
Dosing Tips S Size 0		For exact, economic and point-to-point applications of WEICON Contact Adhesives.	10068262
Dosing Tips L Size 1		For exact, economic and point-to-point applications of WEICONLOCK.	10001256

# Ancillary Products and Accessories

## Mixing and Dosing Systems

Cartridge Gun "Standard"	For low and medium viscosity adhesives. Suitable for standard cartridges up to 310 ml.	10000441
Cartridge Gun "Special"	Professional quality. Recommended for medium and high viscosity adhesives. Suitable for standard cartridges up to 310 ml.	10020751
Compressed Air Cartridge Gun	For low and medium viscosity materials (310 ml cartridges). 1.45 kN thrust at 6.8 bar operating pressure.	10033114
Dispenser 2C 10:1	Recommended for the 2-component 540g cartridge.	10057514
Mixing Nozzle MFHX	Suitable for Urethane 85 and Urethane 85 SF (540-g-Cartridge), Belt Repair Kit 590 g and Belt Repair Kit SF 590 g	10057191
Cartridge Cutter	For problem-free and safe cutting of plastic cartridge caps as well as for vertical or bevelled cutting of cartridge nozzles.	10022061
Special Mixing Nozzle	For Flex 310 M 2 K fast curing.	10027692
V-Joint Nozzle	For all one-component standard cartridges.	10025241
Primer Applicator	For application of WEICON Primer.	10032350
Presspack Dosing Tip	Dosing tip for the WEICON products Plast-o-Seal, Flex-bond, Black-Seal and Anti-Seize in the presspack.	10045037
Presspack Ergo Connect	Ergonomic dosing tip for WEICON Presspack products. Fatigue-free working thanks to optimised angle geometry. The two-way thread enables an application radius of 180°. Compatible with WEICON dosing tip and brush top.	10060345
Pump Dispenser WPS 1500	Refillable pump dispenser for many WEICON liquids.	10016002
Extension Piece for WPS 1500	Plastic prolongation 30 cm with nozzle 0,8mm (plastic).	10016213
Gasket Kit Viton	Gasket Kit Viton for Pump Dispenser WPS 1500 V	10023969
Pressurized-Air Spray Can WSD 400	Pressurized-Air Spray Can - refillable.	10009301
Spray Valve Set for WSD 400	Valve Set (four different valves and a ball valve with dip tube).	10009303
Adapter for WSD 400	Adapter for filling from the compressed-air mains.	10000393
Pump Dispenser "Standard"	For all WEICON Technical Liquids which are free of solvents and mineral oil.	10000401
Pump Dispenser "Special"	For WEICON Cleaner S, Brake Cleaner and Rust Loosener.	10000402
Adjusting Valve for Cans <div>5 and 10 L 28 L</div>	For the exact dosage of WEICON Technical Liquids from the can.	10000398
Presspack Brush Top	WEICON Presspack brush top for Anti-Seize.	10045486
Brush 35 long, adhesive	Natural bristles 46 mm, for viscous materials	10065455
Brush 35 short, flat, Plastic Metal	Natural bristles 24 mm, for flowable materials	10059417
Brush 60 short, flat, Plastic Metal	Natural bristles 24 mm, for flowable materials	10068373
Green Tube* Empty cartridge casing with lid	-	10104446
Green Tube* Clip nozzle	-	10101992

\* 80 % less plastic compared to conventional plastic cartridges
