# WEICON TOOLS®

Member of the German Tool Industry Association

We develop, manufacture and distribute high-quality wire stripping and other special tools for the industry and professional users and can look back on more than 55 years of success.

We present these tools at more than 40 fairs and trade shows every year, all over the world. We keep in constant contact with our users, who tell us about new developments in their work processes and, that way, give us ideas and requests for new or improved WEICON TOOLS.

This exchange of information generates a process that regularly results in product innovations and modifications and therefore enables us to constantly offer our customers the perfectly engineered and up-to-date solutions they need.

In the development of our high-quality stripping tools, we have been working together with the company Krampe from Ascheberg-Herbern near Muenster since 1990.

Our consistent key focus in the production process is on precision to ensure that the products we offer are always of exceptional quality.

Our products are made of high-quality materials, hold numerous certificates and are characterised by their outstanding functionality and durability.

# Green Line®

## What is Green Line?

Not just a **GREEN** look

Together with a group of experts, we have developed the **WEICON TOOLS Green Line®**. A tool range made of up to 97 % renewable raw materials, which is recyclable and has an excellent life cycle assessment.

**97%**  
made from renewable resources

## Eco-friendly quality

What can we do to enable a sustainable future? That is a question not only many people ask themselves in regards to their own homes, but also more and more companies. We at WEICON have also been tackling this issue for many years.

That is why we have developed the **WEICON TOOLS Green Line®**. In terms of quality, they are in no way inferior to our classic line and are just as robust and durable.

### The material used:

- ▶ is based on plant oils, natural waxes, fibres and minerals
- ▶ goes through a closed CO<sub>2</sub> cycle and is recyclable
- ▶ is largely produced without the use of the finite resource crude oil
- ▶ has polyamide-like characteristics
- ▶ is produced CO<sub>2</sub> neutrally and with renewable energy

## Production with energy generated in-house

Our tools are produced almost entirely with energy generated in-house – thanks to photovoltaic systems.

## Green electricity

At our headquarters in Germany, we now rely on 100 % green electricity.

## Cardboard instead of plastic

Our WEICON TOOLS come in a recyclable cardboard packaging.

## Resource-saving production chain

Faulty tools as well as the sprue produced during injection moulding are remelted at the beginning of the production chain.

## Repairing instead of replacing

Our WEICON TOOLS are part of the WEICON company – a producer of special chemical products for industrial use. Chemicals and sustainability are incompatible? Not necessarily. With the help of our products, many things can be repaired instead of thrown out and replaced.
