WEICON TOOLS ®

No.1 in Form & Funktion

We develop, manufacture and distribute high-quality wire strippers and other special tools for the industrial sector and professional users. WEICON TOOLS can look back on almost 60 years of continuous success.

We present these tools at more than 40 fairs and trade shows every year, all over the world. We keep in constant contact with our users, who tell us about new developments in their work processes and, that way, give us ideas and requests for new or improved WEICON TOOLS.

This exchange of information generates a process that regularly results in product innovations and modifications and therefore enables us to constantly offer our customers the perfectly engineered and up-to-date solutions they need.

In the development of our high-quality stripping tools, we have been working together with the company Krampe from Ascheberg-Herbern near Muenster since 1990.

Our consistent key focus in the production process is on precision to ensure that the products we offer are always of exceptional quality.

Our products are made of high-quality materials, hold numerous certificates and are characterised by their outstanding functionality and durability.

Green Line ®

Stripping Tools made from up to 97% renewable materials

What is Green Line?

Together with a group of experts, we have developed the **WEICON TOOLS Green Line®**. A tool range made of up to 97 % renewable raw material.

97 %
made from renewable resources

Proven quality

What can we do to enable a sustainable future? That is a question not only many people ask themselves in regards to their own homes, but also more and more companies. We at WEICON have also been tackling this issue for many years.

That is why we have developed the **WEICON TOOLS Green Line®**. In terms of quality, they are in no way inferior to our classic line and are just as robust and durable.

The material used:

▶ is based on plant oils, natural waxes, fibres and minerals
▶ is largely produced without the use of the finite resource crude oil
▶ has polyamide-like characteristics
▶ is produced with renewable energy

Production with energy generated in-house

Our tools are produced almost entirely with energy generated in-house – thanks to photovoltaic systems.

Green electricity

At our headquarters in Germany, we now rely on 100 % green electricity.

Cardboard instead of plastic

Our WEICON TOOLS come in a recyclable cardboard packaging.

Resource-saving production

Faulty tools as well as the sprue produced during injection moulding are remelted at the beginning of the production chain.

Repairing instead of replacing

Our WEICON TOOLS are part of the WEICON company – a producer of special chemical products for industrial use. Chemicals and sustainability are incompatible? Not necessarily. With the help of our products, many things can be repaired instead of thrown out and replaced.

+ Spiral Cut

CABLE STRIPPER
No. S 4-28 SPIRAL

Inner blade
▶ rotatable inner blade for fast round, longitudinal and spiral cuts
▶ suitable for soft and hard cable insulation
▶ cutting depth 0-3 mm

Safety
▶ retractable small hook blade, operated via a slider
▶ enables safe working compared to conventional fixed blades, e.g. fixed, locked blade of cutter knife

Safety blade
▶ with integrated self-retracting safety blade, which is automatically retracted in the event of misuse to prevent cutting injuries
▶ convenient when using spiral cut: make a small cut at the end of the insulation – this makes it easier to peel off the insulation

Working range
▶ for all standard round cables from 4-28 mm Ø
▶ holding bracket made of glass fibre-reinforced polyamide

Spiral switch
▶ switch to lock the blade only when using the spiral cutting function

Functions
▶ adjustment wheel only for switching between spiral cut or round cut

Precision and efficiency
▶ cutting depth easily and precisely adjustable from 0-3 mm thanks to lockable adjustment wheel (in 0.1 mm increments)

No. S 4-28 Spiral **NEW**

Round, longitudinal and spiral cuts for soft and hard cable insulations

▶ for all standard round cables with a diameter of 4 to 28 mm
▶ with integrated self-retracting safety blade, which automatically retracts in case of misuse to prevent cuts and injuries
▶ blade depth comfortably adjustable from 0-3 mm thanks to lockable adjusting screw (in steps of 0.1 mm)
▶ cutting depth 0-3 mm

4in1 Flat and Round Cable Stripper   NEW

Enables circular and longitudinal cuts on both flat and round cables

▶ circular cuts – stripping – longitudinal cuts – square cuts
▶ for all common flat cables up to a width of 18 mm
▶ for all common round cables with a diameter of 6 to 13 mm
▶ enables circular and longitudinal cuts on both flat and round cables
▶ stripping function integrated in the housing (from 0.5 to 6 mm²)
▶ precise work even in very narrow spaces, such as in junction boxes or cable ducts
▶ blade depth comfortably adjustable from 0-3 mm thanks to lockable adjusting screw (in steps of 0.1 mm)

CRIMP TOOLS

NEW

The crimp tools were developed for the reliable crimping of various electrical connections. These tools have a ratchet mechanism with a blocking device to ensure a consistently high crimping quality and results that can be precisely repeated. The accurate eccentric setting ensures a high crimping quality thanks to the precisely adjustable crimping force.

16 mm² HEX **NEW**

CABLE OVERVIEW

The cable types shown in the table below are only meant to give an overview of the potential application areas of our tools. WEICON TOOLS can also be used on similar cable types in many cases, of course.

Furthermore, the application suggestions depend on the material, application area and working range. Our tool recommendation is only a suggestion due to the various materials used by cable manufacturers.
