# SAFETY DATA SHEET

1/10

According to Work Health and Safety (WHS) Australia

Visor Cleaner Spray

### Section 1. Identification

| Product identifier | : | Visor Cleaner Spray |
|--------------------|---|---------------------|
| Product code       | : | 112110              |

#### Relevant identified uses of the substance or mixture and uses advised against

Aerosol product

| Supplier's details                                   | : WEICON GmbH & Co. KG<br>Königsberger Str. 25,<br>48157 Münster, Germany<br>phone:+49 251 93220,<br>email: info@weicon.de,<br>URL: www.weicon.de |
|--|---|
| e-mail address of person<br>responsible for this SDS | : msds@weicon.de  |

#### National contact

WEICON Australia Pty. Ltd 1/55-65 Christensen Road, Stapylton QLD 4207 Phone: +61 493473383 E-Mail: info@weicon.com.au website: www.weicon.com.au

Emergency telephone number

: National Poison Information Center: Tel: 131126 TRANSPORT / EMERGENCY CONTACT (24h): Tel: +61 2 8014 4558 (English) TRANSPORT / EMERGENCY CONTACT (24h): Tel.: 1800 074 234 (English)

### Section 2. Hazard(s) identification

| Classification of the substance or mixture          | : | AEROSOLS - Category 1  |
|---|---|--|
| GHS label elements                                  |   |  |
| Hazard pictograms                                   | : |  |
| Signal word   | : | DANGER   |
| Hazard statements                                   | : | H222, H229 - Extremely flammable aerosol. Pressurized container: may burst if heated.  |
| Precautionary statements                            |   |  |
| Prevention  | : | <ul> <li>P210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.</li> <li>P211 - Do not spray on an open flame or other ignition source.</li> <li>P251 - Do not pierce or burn, even after use.</li> </ul> |
| Response  | : | Not applicable.  |
| Storage   | : | P410 + P412 - Protect from sunlight. Do not expose to temperatures exceeding 50 $^{\circ}$ C/122 $^{\circ}$ F.   |
| Disposal  | : | Not applicable.  |
| Supplemental label elements                         | : | Not applicable.  |
| Other hazards which do not result in classification | : | None known.  |

| Date of issue/Date of revision | : 2/19/2025 | Date of previous issue | : 1/9/2025 | Version : 5.3 |
|--------------------------------|-------------|------------------------|------------|---------------|
|--------------------------------|-------------|------------------------|------------|---------------|

### Section 3. Composition and ingredient information

Substance/mixture

: Mixture

| Ingredient name | % (v/v) | CAS number | Classification   |
|-----------------|---------|------------|--|
| butane          | ≤3      | 106-97-8   | FLAMMABLE GASES - Category 1<br>GASES UNDER PRESSURE -<br>Compressed gas   |
| isobutane       | ≤3      | 75-28-5    | FLAMMABLE GASES - Category 1<br>GASES UNDER PRESSURE -<br>Compressed gas   |
| ammonia         | ≤0.3    | 1336-21-6  | ACUTE TOXICITY (oral) - Category 4<br>ACUTE TOXICITY (inhalation) -<br>Category 3<br>SKIN CORROSION/IRRITATION -<br>Category 1<br>SERIOUS EYE DAMAGE/ EYE<br>IRRITATION - Category 2A<br>Corrosive to the respiratory tract. |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

The total concentration of ingredients in this product, reported or not in this section, is 100%.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

| Eye contact  | <ul> <li>Immediately flush eyes with plenty of water, occasionally lifting the upper and lower<br/>eyelids. Check for and remove any contact lenses. Get medical attention if irritation<br/>occurs.</li> </ul>                           |
|--------------|---|
| Inhalation   | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.  |
| Skin contact | <ul> <li>Flush contaminated skin with plenty of water. Remove contaminated clothing and<br/>shoes. Get medical attention if symptoms occur.</li> </ul>  |
| Ingestion    | <ul> <li>Wash out mouth with water. If material has been swallowed and the exposed<br/>person is conscious, give small quantities of water to drink. Do not induce vomiting<br/>unless directed to do so by medical personnel.</li> </ul> |

#### Most important symptoms/effects, acute and delayed

| Potential acute health effect | <u>S</u>  |  |  |  |
|-------------------------------|---|--|--|--|
| Eye contact                   | : No known significant effects or critical hazards.                                       |  |  |  |
| Inhalation                    | : No known significant effects or critical hazards.                                       |  |  |  |
| Skin contact                  | : No known significant effects or critical hazards.                                       |  |  |  |
| Ingestion                     | : No known significant effects or critical hazards.                                       |  |  |  |
| Over-exposure signs/symptoms  |   |  |  |  |
| Eye contact                   | : Adverse symptoms may include the following:<br>irritation<br>redness                    |  |  |  |
| Inhalation                    | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing |  |  |  |
| Skin contact                  | : No specific data.   |  |  |  |
| Ingestion                     | : No specific data.   |  |  |  |

#### Indication of immediate medical attention and special treatment needed, if necessary

| Date of issue/Date of revision | : 2/19/2025 | Date of previous issue | : 1/9/2025 | Version : 5.3 | 2/10 |
|--------------------------------|-------------|------------------------|------------|---------------|------|
|--------------------------------|-------------|------------------------|------------|---------------|------|

### Section 4. First aid measures

| Notes to physician         | : Treat symptomatically. Contact poison treatment specialist immediately if large<br>quantities have been ingested or inhaled. |
|----------------------------|--|
| Specific treatments        | : No specific treatment.   |
| Protection of first-aiders | : No action shall be taken involving any personal risk or without suitable training.   |

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising from the chemical     | : Extremely flammable aerosol. Runoff to sewer may create fire or explosion hazard.<br>In a fire or if heated, a pressure increase will occur and the container may burst, with<br>the risk of a subsequent explosion. Gas may accumulate in low or confined areas<br>or travel a considerable distance to a source of ignition and flash back, causing fire<br>or explosion. Bursting aerosol containers may be propelled from a fire at high speed. |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

### Section 6. Accidental release measures

| Personal precautions, protec                          | tiv | e equipment and emergency procedures   |
|---|-----|--|
| For non-emergency<br>personnel                        | :   | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. In the case of aerosols being ruptured, care should be taken due to the<br>rapid escape of the pressurized contents and propellant. If a large number of<br>containers are ruptured, treat as a bulk material spillage according to the<br>instructions in the clean-up section. Do not touch or walk through spilled material.<br>Shut off all ignition sources. No flares, smoking or flames in hazard area. Put on<br>appropriate personal protective equipment. |
| For emergency responders                              | :   | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions                             | :   | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| Methods and materials for containment and cleaning up |     |  |
| Cmall anill   | _   |  |

Small spill: Stop leak if without risk. Move containers from spill area. Use spark-proof tools and<br/>explosion-proof equipment. Dilute with water and mop up if water-soluble.<br/>Alternatively, or if water-insoluble, absorb with an inert dry material and place in an<br/>appropriate waste disposal container. Dispose of via a licensed waste disposal<br/>contractor.

# Section 7. Handling and storage

#### Precautions for safe handling

| Protective measures  |   | Put on appropriate personal protective equipment (see Section 8). Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn, even after use. Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Avoid breathing vapor or mist. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous. |
|--|---|--|
| Advice on general occupational hygiene                             |   | Eating, drinking and smoking should be prohibited in areas where this material is<br>handled, stored and processed. Workers should wash hands and face before<br>eating, drinking and smoking. Remove contaminated clothing and protective<br>equipment before entering eating areas. See also Section 8 for additional<br>information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | i | Store in accordance with local regulations. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use.   |

# Section 8. Exposure controls and personal protection

#### Control parameters

#### **Occupational exposure limits**

| Ingredient name | Exposure limits  |  |  |
|-----------------|--|--|--|
| butane          | <b>Safe Work Australia (Australia, 12/2019).</b><br>TWA: 1900 mg/m³ 8 hours.<br>TWA: 800 ppm 8 hours.  |  |  |
| isobutane       | ACGIH TLV (United States, 1/2021).<br>[Butane] Explosive potential.<br>STEL: 1000 ppm 15 minutes.  |  |  |
| ammonia         | Safe Work Australia (Australia, 10/2022).<br>[Ammonia]<br>STEL: 24 mg/m <sup>3</sup> 15 minutes.<br>STEL: 35 ppm 15 minutes.<br>TWA: 17 mg/m <sup>3</sup> 8 hours.<br>TWA: 25 ppm 8 hours. |  |  |

| Appropriate engineering<br>controls | : | Use only with adequate ventilation. If user operations generate dust, fumes, gas, vapor or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapor or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment. |
|-------------------------------------|---|--|
| Environmental exposure controls     | : | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.  |

#### Individual protection measures

# Section 8. Exposure controls and personal protection

| Hygiene measures       | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Wash contaminated clothing before reusing. Ensure that eyewash stations and<br>safety showers are close to the workstation location.   |
|------------------------|---|
| Eye/face protection    | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.   |
| Skin protection        |   |
| Hand protection        | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. Recommended : 1 - 4 hours<br>(breakthrough time): Protective gloves made of nitrile rubber (material thickness of<br>0,4 mm); EN 374-5 Cat. III 4 - 8 hours (breakthrough time): Protective gloves made<br>of Viton®/ butyl rubber (material thickness of 0,7 mm); EN388 Cat.II / EN374 Cat.III /<br>EN374-2 |
| Body protection        | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves.   |
| Other skin protection  | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended : organic vapor (Type AX) and particulate filter   |

# Section 9. Physical and chemical properties

| Physical state   | : Aerosol.                            |
|--|---------------------------------------|
| Color  | : White.                              |
| Odor   | : Fruity.                             |
| Odor threshold   | : Not available.                      |
| рН   | : 11.4 [Conc. (% w/w): 100%]          |
| Melting point  | : Not applicable.                     |
| Boiling point, initial boiling<br>point, and boiling range | : Not available.                      |
| Flash point  | : Closed cup: Not applicable.         |
| Evaporation rate   | : Not available.                      |
| Flammability   | : Not available.                      |
| Lower and upper explosion limit/flammability limit         | : Not available.                      |
| Vapor pressure   | : 300 to 400 kPa (2250 to 3000 mm Hg) |
| Relative vapor density                                     | : Not available.                      |
| Relative density   | : Not applicable.                     |
| Density  | : 0.9 to 1 g/cm³ [20°C (68°F)]        |
| Solubility(ies)<br>Not available.                          | :                                     |

### Section 9. Physical and chemical properties

| Solubility in water                        | : Not available.  |
|--|-------------------|
| Miscible with water                        | : No.             |
| Partition coefficient: n-<br>octanol/water | : Not applicable. |
| Auto-ignition temperature                  | : Not applicable. |
| Decomposition temperature                  | : Not available.  |
| Heat of combustion                         | <b>:</b> 1.7 kJ/g |
| Viscosity                                  | : Not applicable. |
| Flow time (ISO 2431)                       | : Not available.  |
| Particle characteristics                   |                   |
| Median particle size                       | : Not applicable. |
| Aerosol product                            |                   |
| Type of aerosol                            | : Spray           |
|  |                   |

### Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : Avoid all possible sources of ignition (spark or flame).   |
| Incompatible materials             | : No specific data.  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

# Section 11. Toxicological information

#### Information on toxicological effects

Acute toxicity

| Product/ingredient name | Result                | Species | Dose                     | Exposure |
|-------------------------|-----------------------|---------|--------------------------|----------|
| butane                  | LC50 Inhalation Vapor | Rat     | 658000 mg/m <sup>3</sup> | 4 hours  |
| isobutane               | LC50 Inhalation Vapor | Rat     | 658000 mg/m³             | 4 hours  |
| ammonia                 | LD50 Oral             | Rat     | 350 mg/kg                | -        |

#### Acute toxicity estimates

Not available.

#### Irritation/Corrosion

| Product/ingredient name | Result                 | Species | Score | Exposure            | Observation |
|-------------------------|------------------------|---------|-------|---------------------|-------------|
| ammonia                 | Eyes - Severe irritant | Rabbit  | -     | 0.5 minutes<br>1 mg | -           |
|                         | Eyes - Severe irritant | Rabbit  | -     | 250 ug              | -           |

#### Sensitization

Not available.

#### **Mutagenicity**

Not available.

### Section 11. Toxicological information

#### **Carcinogenicity**

Not available.

#### Reproductive toxicity

Not available.

#### **Teratogenicity**

Not available.

#### Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure)

Not available.

#### **Aspiration hazard**

Not available.

#### Information on the likely : Not available. routes of exposure

#### Potential acute health effects

| Eye contact  | : No known significant effects or critical hazards. |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards. |
| Skin contact | : No known significant effects or critical hazards. |
| Ingestion    | : No known significant effects or critical hazards. |

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>irritation<br>redness                    |
|--------------|---|
| Inhalation   | : Adverse symptoms may include the following:<br>respiratory tract irritation<br>coughing |
| Skin contact | : No specific data.   |
| Ingestion    | : No specific data.   |

#### Delayed and immediate effects and also chronic effects from short and long term exposure

| Short term exposure            |   |
|--------------------------------|---|
| Potential immediate effects    | : Not available.                                    |
| Potential delayed effects      | : Not available.                                    |
| Long term exposure             |   |
| Potential immediate<br>effects | : Not available.                                    |
| Potential delayed effects      | : Not available.                                    |
| Potential chronic health et    | fects   |
| Not available.                 |   |
| General                        | : No known significant effects or critical hazards. |
| Carcinogenicity                | : No known significant effects or critical hazards. |
| Mutagenicity                   | : No known significant effects or critical hazards. |
| Teratogenicity                 | : No known significant effects or critical hazards. |
| Developmental effects          | : No known significant effects or critical hazards. |
| Fertility effects              | : No known significant effects or critical hazards. |
| Date of issue/Date of revision | : 2/19/2025 Date of previous issue : 1/9/2025       |

### Section 11. Toxicological information

#### Numerical measures of toxicity

#### Acute toxicity estimates

| Product/ingredient name | Oral (mg/<br>kg) | Dermal<br>(mg/kg) | Inhalation<br>(gases)<br>(ppm) | Inhalation<br>(vapors)<br>(mg/l) | Inhalation<br>(dusts<br>and mists)<br>(mg/l) |
|-------------------------|------------------|-------------------|--------------------------------|----------------------------------|--|
| butane                  | N/A              | N/A               | N/A                            | 658                              | N/A  |
| isobutane               | N/A              | N/A               | N/A                            | 658                              | N/A  |
| ammonia                 | 350              | N/A               | N/A                            | 3                                | N/A  |

### Section 12. Ecological information

#### **Toxicity**

| Product/ingredient name | Result                        | Species                                | Exposure |
|-------------------------|-------------------------------|--|----------|
| ammonia                 | Acute LC50 37 ppm Fresh water | Fish - <i>Gambusia affinis</i> - Adult | 96 hours |

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

| Product/ingredient name | LogPow | BCF | Potential |
|-------------------------|--------|-----|-----------|
| butane                  | 2.89   | -   | Low       |
| isobutane               | 2.8    | -   | Low       |

#### Mobility in soil

Soil/water partition : Not available. coefficient (Koc)

**Other adverse effects** : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation and<br>any regional local authority requirements. Dispose of surplus and non-recyclable<br>products via a licensed waste disposal contractor. Waste should not be disposed of<br>untreated to the sewer unless fully compliant with the requirements of all authorities<br>with jurisdiction. Waste packaging should be recycled. Incineration or landfill<br>should only be considered when recycling is not feasible. This material and its<br>container must be disposed of in a safe way. Empty containers or liners may retain<br>some product residues. Do not puncture or incinerate container. |
