## Section 2. Hazard(s) identification

| Classification of the substance or mixture<br><u>GHS label elements</u><br>Hazard pictograms | : SKIN CORROSION/IRRITATION - Category 2<br>SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 2A<br>SKIN SENSITIZATION - Category 1   |
|--|---|
|  |   |
| Signal word  | : WARNING   |
| Hazard statements  | : H315 - Causes skin irritation.<br>H317 - May cause an allergic skin reaction.<br>H319 - Causes serious eye irritation.  |
| Precautionary statement  | <u>S</u>  |
| Prevention   | <ul> <li>P280 - Wear protective gloves. Wear eye or face protection.</li> <li>P261 - Avoid breathing vapor.</li> <li>P264 - Wash thoroughly after handling.</li> </ul>  |
| Response   | <ul> <li>P362 + P364 - Take off contaminated clothing and wash it before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> <li>P305 + P351 + P338 - IF IN EYES: Rinse cautiously with water for several minutes.</li> <li>Remove contact lenses, if present and easy to do. Continue rinsing.</li> <li>P337 + P313 - If eye irritation persists: Get medical advice or attention.</li> </ul> |
| Storage  | : Not applicable.   |
| Disposal   | : P501 - Dispose of waste according to applicable legislation.  |
| Supplemental label elements  | : Not applicable.   |
| Other hazards which do n result in classification  | ot : None known.  |

## Section 3. Composition and ingredient information

Substance/mixture

: Mixture

| Ingredient name  | % (w/w)   | CAS number | Classification  |
|--|-----------|------------|---|
| øs-[4-(2,3-epoxipropoxi)phenyl]propane   | ≥10 - ≤30 | 1675-54-3  | FLAMMABLE LIQUIDS - Category 4<br>SKIN CORROSION/IRRITATION -<br>Category 2<br>SERIOUS EYE DAMAGE/ EYE<br>IRRITATION - Category 2A<br>SKIN SENSITIZATION - Category 1 |
| Formaldehyde, oligomeric reaction products with 1-chloro-2,3-epoxypropane and phenol | ≥10 - ≤30 | 9003-36-5  | SKIN CORROSION/IRRITATION -<br>Category 2<br>SKIN SENSITIZATION - Category 1  |
| 4,4'-methylenebis[N,N-bis(2,3-epoxypropyl)<br>aniline]                               | ≤10       | 28768-32-3 | SKIN SENSITIZATION - Category 1   |
| Phenol, polymer with formaldehyde, glycidyl<br>ether                                 | ≤5        | 28064-14-4 | SKIN CORROSION/IRRITATION -<br>Category 2<br>SERIOUS EYE DAMAGE/ EYE<br>IRRITATION - Category 2A<br>SKIN SENSITIZATION - Category 1                                   |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified and hence require reporting in this section.

The total concentration of ingredients in this product, reported or not in this section, is 100%.

| Occupational exposure limits, if available, are listed in Section 8. | LV. |  |
|--|-----|--|
| Section 4. First aid measures  |     |  |

| Section 4. Firs       | st aid measures <b>which which y</b>   |
|-----------------------|--|
| Description of necess | ary first aid measures   |
| Eye contact           | : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.  |
| Inhalation            | : Remove victim to fresh air and keep at rest in a position comfortable for breathing.<br>If not breathing, if breathing is irregular or if respiratory arrest occurs, provide<br>artificial respiration or oxygen by trained personnel. It may be dangerous to the<br>person providing aid to give mouth-to-mouth resuscitation. Get medical attention if<br>adverse health effects persist or are severe. If unconscious, place in recovery<br>position and get medical attention immediately. Maintain an open airway. Loosen<br>tight clothing such as a collar, tie, belt or waistband. In case of inhalation of<br>decomposition products in a fire, symptoms may be delayed. The exposed person<br>may need to be kept under medical surveillance for 48 hours. |
| Skin contact          | : Wash with plenty of soap and water. Remove contaminated clothing and shoes.<br>Wash contaminated clothing thoroughly with water before removing it, or wear<br>gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the<br>event of any complaints or symptoms, avoid further exposure. Wash clothing before<br>reuse. Clean shoes thoroughly before reuse.  |
| Ingestion             | : Wash out mouth with water. Remove dentures if any. If material has been<br>swallowed and the exposed person is conscious, give small quantities of water to<br>drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless directed to do so by medical personnel. If vomiting occurs,<br>the head should be kept low so that vomit does not enter the lungs. Get medical<br>attention if adverse health effects persist or are severe. Never give anything by<br>mouth to an unconscious person. If unconscious, place in recovery position and get<br>medical attention immediately. Maintain an open airway. Loosen tight clothing such<br>as a collar, tie, belt or waistband.                                   |

### Most important symptoms/effects, acute and delayed

| Date U Issue/Date U IevisiUII . Date U Dievious Issue . 4/10/2023 VeisiUII . 2 2/1 | Date of issue/Date of revision | *** | Date of previous issue | : 4/18/2023 | Version : 2 2/1 |

## Section 4. First aid measures

| Potential acute health effect                  |   |  |
|--|---|--|
| Eye contact                                    | : Causes serious eye irritation.  |  |
| Inhalation                                     | No known significant effects or critical hazards.   |  |
| Skin contact                                   | : Causes skin irritation. May cause an allergic skin reaction.  |  |
| Ingestion                                      | : No known significant effects or critical hazards.   |  |
| Over-exposure signs/symp                       | otoms   |  |
| Eye contact                                    | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |  |
| Inhalation                                     | : No specific data.   |  |
| Skin contact                                   | Adverse symptoms may include the following:<br>irritation<br>redness  |  |
| Ingestion                                      | : No specific data.   |  |
|  |   |  |
| Indication of immediate med                    | lical attention and special treatment needed, if necessary  |  |
| Notes to physician                             | : In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.  |  |
| Specific treatments                            | : No specific treatment.  |  |
| Protection of first-aiders                     | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |  |
| See toxicological informatio                   | ** droft only ***   |  |
| Section 5. Fire-fig                            |   |  |
| Extinguishing media                            |   |  |
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |  |
| Unsuitable extinguishing media                 | : None known.   |  |
| Specific hazards arising from the chemical     | : In a fire or if heated, a pressure increase will occur and the container may burst.   |  |
| Hazardous thermal decomposition products       | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>halogenated compounds  |  |
| Special protective actions for fire-fighters   | : Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |  |
| Special protective equipment for fire-fighters | <ul> <li>Fire-fighters should wear appropriate protective equipment and self-contained<br/>breathing apparatus (SCBA) with a full face-piece operated in positive pressure<br/>mode.</li> </ul>   |  |
| Hazchem code                                   | : •3Z   |  |

## Section 6. Accidental release measures

### Personal precautions, protective equipment and emergency procedures

| For non-emergency<br>personnel | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or<br>mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|--------------------------------|----|--|
| For emergency responders       | :  | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions      | :  | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).  |
| Methods and materials for co   | nt | ainment and cleaning up  |

| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry |
|-------------|---|
|             | material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |

## Section 7. Handling and storage

### Precautions for safe handling

| Protective measures  | <ul> <li>Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapor or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.</li> </ul>                                  |
|--|--|
| Advice on general occupational hygiene                             | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

## Section 8. Exposure controls and personal protection

### **Control parameters**

### **Occupational exposure limits**

| Ingredient name                                    | Exposure limits  |
|--|--|
| bis-[4-(2,3-epoxipropoxi)phenyl]propane            | DFG MAC-values list (Germany, 7/2022).<br>Skin sensitizer. |
| 4,4'-methylenebis[N,N-bis(2,3-epoxypropyl)aniline] | DFG MAC-values list (Germany, 7/2022).<br>Skin sensitizer. |

Appropriate engineering controls

: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

| Date of issue/Date of revision | *** |
|--------------------------------|-----|
|--------------------------------|-----|

| Section 8. Expos                | ure controls and personal protection  |
|---------------------------------|---|
| Environmental exposure controls | : Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process<br>equipment will be necessary to reduce emissions to acceptable levels.   |
| Individual protection meas      | ures  |
| Hygiene measures                | : Wash hands, forearms and face thoroughly after handling chemical products, before<br>eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.   |
| Eye/face protection             | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.  |
| Skin protection                 |   |
| Hand protection                 | : Chemical-resistant, impervious gloves complying with an approved standard should<br>be worn at all times when handling chemical products if a risk assessment indicates<br>this is necessary. Considering the parameters specified by the glove manufacturer,<br>check during use that the gloves are still retaining their protective properties. It<br>should be noted that the time to breakthrough for any glove material may be<br>different for different glove manufacturers. Recommended : 1 - 4 hours<br>(breakthrough time): nitrile rubber ; 4 - 8 hours (breakthrough time): Viton®/butyl<br>rubber |
| Body protection                 | <ul> <li>Personal protective equipment for the body should be selected based on the task<br/>being performed and the risks involved and should be approved by a specialist<br/>before handling this product.</li> </ul>   |
| Other skin protection           | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>   |
| Respiratory protection          | : Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended : organic vapor (Type AX) and particulate filter   |
|                                 |   |

## Section 9. Physical and chemical properties

| <u>Appearance</u>                                       |  |
|---|--|
| Physical state  | : Liquid.                                      |
| Color   | : Gray.  |
| Odor  | : Characteristic.                              |
| Odor threshold  | : Not available.                               |
| рН  | : Not applicable.                              |
| Melting point   | : Not available.                               |
| Boiling point, initial boiling point, and boiling range | : >200°C (>392°F)                              |
| Flash point   | : Closed cup: >200°C (>392°F) [Pensky-Martens] |
| Fire point  | : >200°C (>392°F)                              |
| Evaporation rate  | : Not available.                               |
| Flammability  | : Not available.                               |
| Lower and upper explosion limit/flammability limit      | : Not available.                               |
| Vapor pressure  | :  |

## Section 9. Physical and chemical properties

## Section 10. Stability and reactivity

| Reactivity                         | : No specific test data related to reactivity available for this product or its ingredients.           |
|------------------------------------|--|
| Chemical stability                 | : The product is stable.   |
| Possibility of hazardous reactions | : Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| Conditions to avoid                | : No specific data.  |
| Incompatible materials             | : No specific data.  |
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

## Section 11. Toxicological information

### Information on toxicological effects

### Acute toxicity

Not available.

### Acute toxicity estimates

| Route          | ATE value |
|----------------|-----------|
| Not available. |           |

### Irritation/Corrosion

Not available.

### **Sensitization**

## Section 11. Toxicological information

Not available.

### Mutagenicity

Not available.

### **Carcinogenicity**

Not available.

### Reproductive toxicity

Not available.

### **Teratogenicity**

Not available.

### Specific target organ toxicity (single exposure)

Not available.

### Specific target organ toxicity (repeated exposure)

Not available.

### Aspiration hazard

Not available.

## Information on the likely : Not available. routes of exposure

### Potential acute health effects

| Eye contact  | <ul> <li>Causes serious eye irritation.</li> <li>No known significant effects or critical hazards.</li> </ul> |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards.   |
| Skin contact | : Causes skin irritation. May cause an allergic skin reaction.  |
| Ingestion    | : No known significant effects or critical hazards.   |

### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness |
|--------------|--|
| Inhalation   | : No specific data.  |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness                     |
| Ingestion    | : No specific data.  |

### Delayed and immediate effects and also chronic effects from short and long term exposure

| <u>Short term exposure</u>  |   |
|-----------------------------|---|
| Potential immediate effects | : Not available.  |
| Potential delayed effects   | : Not available.  |
| <u>Long term exposure</u>   |   |
| Potential immediate effects | : Not available.  |
| Potential delayed effects   | : Not available.  |
| Potential chronic health ef | fects   |
| Not available.              |   |
| General                     | : Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |

### Section 11. Toxicological information

| Carcinogenicity       | : No known significant effects or critical hazards. |
|-----------------------|---|
| Mutagenicity          | : No known significant effects or critical hazards. |
| Teratogenicity        | : No known significant effects or critical hazards. |
| Developmental effects | : No known significant effects or critical hazards. |
| Fertility effects     | : No known significant effects or critical hazards. |
|                       |   |

### Numerical measures of toxicity

Acute toxicity estimates

N/A

## Section 12. Ecological information

### <u>Toxicity</u>

Not available.

### Persistence and degradability

Not available.

### **Bioaccumulative potential**

| Product/ingredient name   | LogPow      | BCF        |   | Potential |
|---|-------------|------------|---|-----------|
| Formaldehyde, oligomeric<br>reaction products with<br>1-chloro-2,3-epoxypropane<br>and phenol<br>4,4'-methylenebis[N,N-bis<br>(2,3-epoxypropyl)aniline] | 2.7<br>2.12 | draft only | * | Low       |

### Mobility in soil

Soil/water partition : Not available. coefficient (Koc)

Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

**Disposal methods** : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.
