

## Electrician Scissors XL

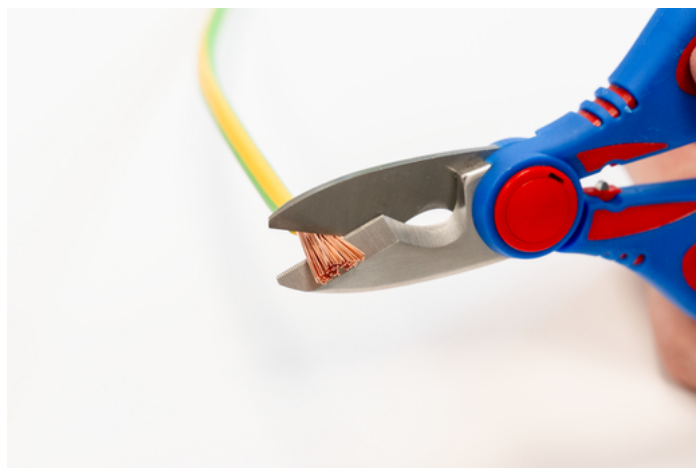

The Electrician Scissors XL have been developed for three different areas of application: cutting – stripping – crimping. They are designed for use in many different situations in everyday working life, which makes them a valuable addition to other electrical tools. They have been specially created to meet the needs of professional users and are used both in the skilled trades and in industry.

The cable scissors can be used for cutting and stripping Cu/Al wires and for crimping wire end ferrules from 0.5-6 mm<sup>2</sup>. The scissors are characterised by a very high cutting performance. They cut fine-stranded copper and aluminium cables up to a cross-section of 50 mm<sup>2</sup>. It is possible not only to cut but also to strip wires and cables quickly and easily with this special tool. The cable is held in place in the groove during the cutting process. The fine micro serration of the blades enables flush and slip-free cutting, resulting in a very precise cut. The non-slip 2-component handles made of impact-resistant fibreglass-reinforced plastic ensure safe working.

### Technical Data

Application range	fine-stranded copper and aluminium cables up to 50 mm <sup>2</sup> cutting edge with micro-serration for a smooth cut
Material	blades made of special stainless steel
Hardness grade of blade	56 HRC
Additional value	stripping, crimping of wire end ferrules 0.5 - 6 mm <sup>2</sup>
Accessories	incl. a safety box with belt clip
Weight	117 g
Length	160 mm
Article number	10100025

Attention:  
Tool not to be used on live cables or conductors.
