| Emergency telephone<br>number                        | : +1 202 464 2554 / TRANSPORT EMERGENCY CONTACT - USA (24h): Tel: +1 202 464 2554  |

### Section 2. Hazards identification

| OSHA/HCS status                            | : This material is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200). |
|--|---|
| Classification of the substance or mixture | : SKIN SENSITIZATION - Category 1   |
| CHS label elemente                         |   |

**GHS label elements** 

Hazard pictograms

2

| Signal word<br>Hazard statements    | : Warning<br>: H317 - May cause an allergic skin reaction.   |
|-------------------------------------|--|
| Precautionary statements            |  |
| Prevention                          | : P280 - Wear protective gloves.<br>P261 - Avoid breathing vapor.  |
| Response                            | <ul> <li>P363 - Wash contaminated clothing before reuse.</li> <li>P302 + P352 - IF ON SKIN: Wash with plenty of water.</li> <li>P333 + P313 - If skin irritation or rash occurs: Get medical advice or attention.</li> </ul> |
| Storage                             | : Not applicable.  |
| Disposal                            | : P501 - Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazards not otherwise<br>classified | : None known.  |

1/10

### Section 3. Composition/information on ingredients

Substance/mixture

: Mixture

| Ingredient name %              | ο<br>Ο | CAS number |
|--------------------------------|--------|------------|
| tert-pentyl hydroperoxide <0.3 | 0.3    | 3425-61-4  |

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

### Section 4. First aid measures

#### **Description of necessary first aid measures** : Immediately flush eyes with plenty of water, occasionally lifting the upper and lower Eye contact eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention if irritation occurs. Inhalation : Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. Skin contact : Wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. Continue to rinse for at least 10 minutes. Get medical attention. In the event of any complaints or symptoms, avoid further exposure. Wash clothing before reuse. Clean shoes thoroughly before reuse. Wash out mouth with water. Remove dentures if any. If material has been swallowed Ingestion and the exposed person is conscious, give small guantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

| Most important symptoms/e   | effects, acute and delayed  |
|-----------------------------|---|
| Potential acute health effe | <u>cts</u>  |
| Eye contact                 | : No known significant effects or critical hazards.   |
| Inhalation                  | : No known significant effects or critical hazards.   |
| Skin contact                | : May cause an allergic skin reaction.  |
| Ingestion                   | : No known significant effects or critical hazards.   |
| Over-exposure signs/symp    | <u>otoms</u>  |
| Eye contact                 | : No specific data.   |
| Inhalation                  | : No specific data.   |
| Skin contact                | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                   | : No specific data.   |
| ndication of immediate me   | dical attention and special treatment needed, if necessary  |
| Notes to physician          | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments         | : No specific treatment.  |
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |

Date of issue/Date of revision: 10/20/2022Date of previous issue: 10/19/2022Version: 1.032/10

### Section 4. First aid measures

See toxicological information (Section 11)

### Section 5. Fire-fighting measures

| Extinguishing media                            |   |
|--|---|
| Suitable extinguishing media                   | : Use an extinguishing agent suitable for the surrounding fire.   |
| Unsuitable extinguishing media                 | : None known.   |
| Specific hazards arising from the chemical     | : In a fire or if heated, a pressure increase will occur and the container may burst.   |
| Hazardous thermal decomposition products       | : No specific data.   |
| Special protective actions for fire-fighters   | <ul> <li>Promptly isolate the scene by removing all persons from the vicinity of the incident if<br/>there is a fire. No action shall be taken involving any personal risk or without suitable<br/>training.</li> </ul> |
| Special protective equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |

### Section 6. Accidental release measures

| Personal precautions, protect                            | iv | e equipment and emergency procedures   |
|--|----|--|
| For non-emergency<br>personnel                           | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilled material. Avoid breathing vapor or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
| For emergency responders                                 | :  | If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| Environmental precautions                                | :  | Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air).  |
| Methods and materials for<br>containment and cleaning up | :  | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |
| Small spill  | :  | Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.  |

# Section 7. Handling and storage

### Precautions for safe handling

| Protective measures | : Put on appropriate personal protective equipment (see Section 8). Persons with a       |  |
|---------------------|--|--|
|                     | history of skin sensitization problems should not be employed in any process in which    |  |
|                     | this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid    |  |
|                     | breathing vapor or mist. Keep in the original container or an approved alternative made  |  |
|                     | from a compatible material, kept tightly closed when not in use. Empty containers retain |  |
|                     | product residue and can be hazardous. Do not reuse container.                            |  |

# Section 7. Handling and storage

| Advice on general occupational hygiene                             | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.  |
|--|--|
| Conditions for safe storage,<br>including any<br>incompatibilities | : Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination. See Section 10 for incompatible materials before handling or use. |

### Section 8. Exposure controls/personal protection

#### **Control parameters**

#### **Occupational exposure limits**

| Ingredient name                  |  | Exposure limits   |  |  |
|----------------------------------|--|---|--|--|
| tert-pentyl hydroperoxide        |  | None.   |  |  |
| Appropriate engineering controls | : Good general ventilation should be s contaminants.   | sufficient to control worker exposure to airborne   |  |  |
| Environmental exposure controls  | they comply with the requirements or cases, fume scrubbers, filters or eng   | Emissions from ventilation or work process equipment should be checked to ensure<br>they comply with the requirements of environmental protection legislation. In some<br>cases, fume scrubbers, filters or engineering modifications to the process equipment<br>will be necessary to reduce emissions to acceptable levels. |  |  |
| Individual protection measu      | res  |   |  |  |
| Hygiene measures                 | eating, smoking and using the lavato<br>Appropriate techniques should be us<br>Contaminated work clothing should r   | roughly after handling chemical products, before<br>bry and at the end of the working period.<br>Sed to remove potentially contaminated clothing.<br>not be allowed out of the workplace. Wash<br>g. Ensure that eyewash stations and safety<br>location.   |  |  |
| Eye/face protection              | Safety eyewear complying with an approved standard should be used when a risk<br>assessment indicates this is necessary to avoid exposure to liquid splashes, mists,<br>gases or dusts. If contact is possible, the following protection should be worn, unless<br>the assessment indicates a higher degree of protection: safety glasses with side-<br>shields.   |   |  |  |
| Skin protection                  |  |   |  |  |
| Hand protection                  | Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. Recommended : 1 - 4 hours (breakthrough time): nitrile rubber ; 4 - 8 hours (breakthrough time): Viton®/butyl rubber |   |  |  |
| Body protection                  |  | e body should be selected based on the task being<br>d should be approved by a specialist before  |  |  |
| Other skin protection            |  | onal skin protection measures should be selected<br>and the risks involved and should be approved by a<br>ct.   |  |  |
| Respiratory protection           | appropriate standard or certification. respiratory protection program to en  | or exposure, select a respirator that meets the<br>Respirators must be used according to a<br>sure proper fitting, training, and other important<br>rganic vapor (Type AX) and particulate filter   |  |  |

| Decomposition temperature                  | : | Not available.         |                 |                  |                        |     |        |
| Viscosity                                  | : | Dynamic: 22            | 25000 mF        | Pa·s (225000 cP) |                        |     |        |
| Flow time (ISO 2431)                       | : | Not available.         |                 |                  |                        |     |        |
| Particle characteristics                   |   |                        |                 |                  |                        |     |        |
| Median particle size                       | : | Not applicab           | ole.            |                  |                        |     |        |

# Section 10. Stability and reactivity

| Date of issue/Date of revision     | : 10/20/2022   | Date of previous issue   | : 10/19/2022 | Version | :1.03 | 5/10 |  |  |
|------------------------------------|--|--|--------------|---------|-------|------|--|--|
| Hazardous decomposition products   | : Under normal conditions of storage and use, hazardous decomposition products should not be produced. |  |              |         |       |      |  |  |
| Incompatible materials             | : No specific data.  |  |              |         |       |      |  |  |
| Conditions to avoid                | : No specifio  | : No specific data.  |              |         |       |      |  |  |
| Possibility of hazardous reactions | : Under norr   | : Under normal conditions of storage and use, hazardous reactions will not occur.            |              |         |       |      |  |  |
| Chemical stability                 | : The produ  | : The product is stable.   |              |         |       |      |  |  |
| Reactivity                         | : No specific  | : No specific test data related to reactivity available for this product or its ingredients. |              |         |       |      |  |  |

## Section 11. Toxicological information

#### Information on toxicological effects

#### Acute toxicity

| Product/ingredient name   | Result    | Species | Dose      | Exposure |
|---------------------------|-----------|---------|-----------|----------|
| tert-pentyl hydroperoxide | LD50 Oral | Rat     | 864 mg/kg | -        |

#### Acute toxicity estimates

Not available.

#### Irritation/Corrosion

Not available.

#### Sensitization

Not available.

#### **Mutagenicity**

Not available.

#### **Carcinogenicity**

Not available.

#### **Reproductive toxicity**

Not available.

#### **Teratogenicity**

Not available.

#### Specific target organ toxicity (single exposure)

Not available.

#### Specific target organ toxicity (repeated exposure)

Not available.

#### Aspiration hazard

Not available.

#### Information on the likely : Not available. routes of exposure

### Potential acute health effects

| Eye contact  | : No known significant effects or critical hazards. |
|--------------|---|
| Inhalation   | : No known significant effects or critical hazards. |
| Skin contact | : May cause an allergic skin reaction.              |
| Ingestion    | : No known significant effects or critical hazards. |

#### Symptoms related to the physical, chemical and toxicological characteristics

| Eye contact  | : No specific data.  |
|--------------|--|
| Inhalation   | : No specific data.  |
| Skin contact | : Adverse symptoms may include the following:<br>irritation<br>redness |
| Ingestion    | : No specific data.  |

#### <u>Delayed and immediate effects and also chronic effects from short and long term exposure</u> <u>Short term exposure</u>

 Date of issue/Date of revision

## Section 11. Toxicological information

| Potential immediate<br>effects | : Not available.  |
|--------------------------------|---|
| Potential delayed effects      | : Not available.  |
| Long term exposure             |   |
| Potential immediate<br>effects | : Not available.  |
| Potential delayed effects      | : Not available.  |
| Potential chronic health eff   | ects  |
| Not available.                 |   |
| General                        | : Once sensitized, a severe allergic reaction may occur when subsequently exposed to very low levels. |
| Carcinogenicity                | : No known significant effects or critical hazards.   |
| Mutagenicity                   | : No known significant effects or critical hazards.   |
| Teratogenicity                 | : No known significant effects or critical hazards.   |
| Developmental effects          | : No known significant effects or critical hazards.   |
| Fertility effects              | : No known significant effects or critical hazards.   |
|                                |   |

# Section 12. Ecological information

#### **Toxicity**

Not available.

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

Not available.

#### Mobility in soil

Soil/water partition: Not available.coefficient (Koc)

Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| Disposal methods | : The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. |

## Section 16. Other information

Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks. Although HMIS® ratings and the associated label are not required on SDSs or products leaving a facility under 29 CFR 1910.1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered trademark and service mark of the American Coatings Association, Inc.

The customer is responsible for determining the PPE code for this material. For more information on HMIS® Personal Protective Equipment (PPE) codes, consult the HMIS® Implementation Manual.
