

LED Work Light

WEICON TOOLS has developed a special accessory product for wire strippers to illuminate dark work environments – the WEICON TOOLS LED Work Light.

The WEICON TOOLS LED Work Light ensures proper illumination of the work environment, helping to facilitate the precise use of tools. The small, compact light directly illuminates the blades of the wire stripper and therefore illuminates the area of application. In this way, the Work Light increases safety during electrical installations. The LED light has been specially designed to meet the needs of professional users and is used in both trade and industry.

Electricians should always work with the power turned off when handling electrical installations, wires or devices. During work, e.g. in a construction site, there is often insufficient lighting or illumination. This new work light offers a perfect solution.

The work light is very easy to attach to the stripping tool. To attach it, simply remove the printed plastic plate on one side of the stripper and press the light with its two mounting points into the designated holes. This ensures that the work light always remains in the correct position and cannot fall or slip.

The lamp is switched on by pressing the switch. Press several times to select the brightness level (three levels with 50, 127 or 250 lumens). To switch off the lamp, press and hold the on/off switch.

The LED Work Light has a length of 48 mm and a weight of 15 g. The LED light has IP65 certification and is both dustproof and splash-resistant.

The Work Light has a 180 mAh lithium battery and can be used for approx. 2 hours on a medium setting after a charging time of 40 minutes. The service life of the battery charge varies depending on the selected light intensity.

The WEICON TOOLS LED Work Light is available in the colours red and black.

Technical Data

Application range	for optimum illumination of dark working environments, adjustable in 3 stages up to 250 lumens with a light colour of 6500 Kelvin
Additional use	Mobile light source; can be mounted on various WEICON TOOLS wire strippers (No. 5 / No. 5 Green Line / No. 5 Pro / No. 5 Solar / No. 5 Classic / No. 7 Magic / No. 7F / No. 7 Solar)
Material	Polycarbonate
Additional value	Rechargeable lithium battery 180mAh, incl. USB-C charging cable
Approval / certificate	CE-tested Protection class tested IP65
Weight	15 g
Length	48 mm
Article number	10101948

Attention:
Tool not to be used on live cables or conductors.
