BELT REPAIR-KIT

- ▶ fast processing without tools
- ▶ highly elastic, wear-resistant, impact- and abrasion-resistant
- ▶ short processing time
- ▶ high chemical and pressure resistance

Belt Repair-Kit

WEICON Belt Repair-Kit is a 2-component polyurethane system for the fast repair and coating of rubber surfaces.

The Belt Repair-Kit offers fast and easy processability. The system is suitable for various applications, such as the repair and coating of conveyor belts, the repair of rubber coatings, for use as flexible wear protection, and for the fast repair of worn-out rubber surfaces.

For large-area
repairs (holes)

For smaller
repairs (cracks)
