

Injection Packer Set

For processing gap-bridging products

In complex constructions, such as bridges, pillars as well as machines and systems, gaps can form on top plates, bridge bearings, or flange connections due to different environmental influences. As a result, a flush frictional connection is no longer ensured. With the help of the WEICON Injection System and a gap-bridging product, like the epoxy resin system WEICON WR, the void can be filled. The Injection Packer Set includes perfectly compatible components, by which individual and project-related processing solutions can be provided. The Injection Packer Set for the connection between cartridge and injection packer is available as well as two different sizes of injection packers. The Injection Packer Set comprises a threaded nozzle R1/4"-8 PA6, one metre tube PE 10x8 mm, and a tube valve PE. Injection Packers are available in the sizes 50x30x10 mm and 50x25x25 mm.

Instructions for use

When using WEICON products, the physical, safety-related, toxicological and ecological data and regulations in our EC safety data sheets (www.weicon.com) must be observed.

Scope of delivery

Injection Packer Set

Available sizes

10057667 Injection Packer Set, 1 PCE

Characteristics

Minimum shelf life	at room temperature	∞ mon.
--------------------	---------------------	--------

Approvals / Guidelines

MIL-Spec	complies with	MIL-T-83523

Note

The specifications and recommendations given in this technical data sheet must not be seen as guaranteed product characteristics. They are based on our laboratory tests and on practical experience. Since individual application conditions are beyond our knowledge, control and responsibility, this information is provided without any obligation. We do guarantee the continuously high quality of our products. However, own adequate laboratory and practical tests to find out if the product in question meets the requested properties are recommended. A claim cannot be derived from them. The user bears the only responsibility for non-appropriate or other than specified applications.
